

Abdul Haq Mohammed, PMP®

Program Manager — Engineering Services & Operations

mahaqsiddiq@gmail.com | +91-9963818172 | linkedin.com/in/mahaqsiddiq | Hyderabad, India

SUMMARY

Engineering & Program Manager with 10+ years of experience driving technical delivery, operational excellence, & scalable engineering operations across design engineering, industrial automation, manufacturing, & engineering services. Led end-to-end operations for 3 engineering programs with \$500K annual operational ownership supporting \$30M US revenue, managing a 60+ member engineering team across 2 locations. Oversee delivery of 800+ custom BoM requests monthly while driving measurable business impact, including 50% throughput improvement within 7 months and 22% delivery improvement across 300+ engineers through lean, TP-based planning & resource optimization.

CORE COMPETENCIES

Program Management | Engineering Management | Operations Management | P&L Management | Lean Methodology | Agile Ways of Working | Process Optimization | Cross-functional Team Leadership | Stakeholder Management | Change Management | CAD/CAE | Industrial Automation | R&D.

EXPERIENCE

Unirac Inc.

Program Manager

Hyderabad, India

Aug 2022 – Present

Leading engineering operations for a 60+ member team across 2 locations in India.

- Program Cost Accountability: Managed \$500K annual operational budget across 3 engineering programs supporting \$30M US revenue; optimized utilization and cross-program resource allocation.
- Cross-functional Project Delivery: Delivered Salesforce–engineering systems integration within 3 months by coordinating cross-functional teams and driving stakeholder alignment; transitioned process to BAU.
- Design Operations: Led delivery of 800+ monthly custom BoM requests with 5-day TAT; implemented complexity-based planning, improving throughput without additional headcount; maintained 11% rework and 6% error rates.
- Organizational Influence: Contributed to India Operations initiatives including culture charter, rewards & recognition, and organization-wide policy decisions.
- Leadership Development: Collaborated with HODs to strengthen project management maturity and leadership capability across functions.
- Lean & Throughput Improvement: Increased team throughput by 50% within 7 months through complexity-based capacity planning and strategic resource optimization.
- Operations Transformation: Led lean TP-based utilization model rollout across 300+ engineers; improved delivery performance by 22% within 4 months and established standard planning practice.
- Agile Practices: Implemented agile planning and daily standups across 12 managers; institutionalized throughput-based operational planning.

HBL Power Systems Ltd.

Design & Development Manager

Hyderabad, India

Mar 2021 – Jul 2022

Founding manager for Equipment & Mechanical Engineering function across 2 locations and 15+ departments.

- **Automation Delivery:** Delivered 7 battery manufacturing automation projects within ₹15L budget, reducing manual effort and process time through cross-functional feasibility studies.
- **Cost & Timeline Optimization:** Reduced Li-ion equipment costs by 40% through re-engineering and indigenization; accelerated project execution timelines by 40%.
- **R&D & Innovation:** Established Robotics & Automation CoE with academia; led design and development of a 3-axis robot prototype in SolidWorks.
- **Compliance & Safety:** Implemented ISO 45001-compliant safety interlocks across 3 manufacturing departments.
- **Function Building:** Built and scaled the function by hiring engineers and establishing engineering processes, standards, and reporting systems.

Topgrip Industries
Sr. Design Engineer

Hyderabad, India
 Jan 2019 – Feb 2021

Sole design engineer — full ownership of product development, testing, and DFMA across railway and industrial applications for a 2-year tenure.

- **Product Re-engineering:** Re-engineered railway components, achieving ~40% weight reduction through material and geometry optimization, improving cost and delivery efficiency.
- **Manufacturing Optimization:** Designed jigs, fixtures, and quick-change tooling systems, improving production flow by 50% and reducing manual effort.
- **Quality & Standardization:** Developed CAD and DFMA standards, reducing production errors and enabling regulatory compliance through Quality Assurance Plan implementation.
- **Capability Development:** Trained 4 interns in design and manufacturing fundamentals; led coolant mixer development through project completion.

The University of Akron
Graduate Research Assistant

Akron, OH, USA
 Sep 2016 – May 2018

Advanced R&D on Li-ion battery thermal management under Dr. Siamak Farhad and Dr. Gopal Nadkarni — resulted in first-of-its-kind dual-purpose cooling plate design.

- **Research & Design:** Designed dual-purpose cooling plates maintaining thermal stability during thermal runaway; optimized geometry using COMSOL simulations, reducing pressure drop by 76%.
- **Publications:** Published in Applied Thermal Engineering (2019) and presented at SAE World Congress WCX 2018.

Earlier Experience

Project Intern — Schaeffler Group USA (EV/HEV safety procedures, ISO/IEEE/SAE standards) | Design Engineer — Zips FSAE & FSAE Electric, University of Akron | Team Manager — Baja SAE (30-member team, national competition) | Project Manager — Robocon India (national award winner 2013 & 2014).

EDUCATION

M.S. Mechanical Engineering — The University of Akron, USA	2016 – 2018
Credential of Readiness (CRe) — Harvard Business School Online	2018
<i>Business Analytics, Economics & Accounting for Managers.</i>	
B.E. Mechanical Engineering — Osmania University, Hyderabad	2011 – 2015

CERTIFICATIONS

Project Management Professional (PMP) — Project Management Institute | Jul 2024.
 Generative AI Overview for Project Managers.
