

Bhanu Pratap Singh
Assistant Professor / Project Director /Lecturer / Lab Technician / Hr Marketing

Mail ID: bhanu26081992@gmail.com

Mobile: +91-8580908421

Address: H No 16/7 kanchanpura Nivari Mp 472442

PROFESSIONAL SUMMARY:

A versatile and accomplished professional with over 12 years of diverse experience in the IT industry, complemented by 6 years in academia. Expertise in Robotic Process Automation (RPA), Full Stack Development, and IT consulting, with a proven track record of automating complex business processes to drive efficiency and reduce costs. A dedicated educator skilled in curriculum development, mentoring, and fostering student success in Computer Science. Currently pursuing a Ph.D. to further contribute to the academic and research community.

PROFESSIONAL EXPERIENCE:

Industrial Experience 12 Years

Teaching Experience 6 Years

Banking Experience 3 Years

Sales Experience 4 Years

Recruiter Experience 2 Years

INDUSTRIAL EXPERIENCE

WT IT Solutions Pvt Ltd (Dehradun) Internship Trainee(Android Developer) 1/7/2013-1/9/2013

Manro Pvt Ltd Noida (US IT Recruiter) 1/3/2016-1/4/2017

Digcia Technologies Pvt Ltd (RPA Developer) 1/9/2018-1/9/2019

Lorvan Technologies Pvt Ltd (Automation Administration) 1/9/2020-1/12/2020

Maintec Technologies Pvt Ltd (IT Recruiter) 1/2/2021-1/2/2022

Nics Pvt Ltd Full (Stack Development)

Ces Expert Pvt Ltd (Networking Experience)

TEACHING EXPERIENCE

HITAM Hyderabad Assistant Professor Teaching Assistant 1/2/2025-current

Rishihood University (New Delhi) Assistant Professor 1/11/2024 - 1/2/2025

Mewar University (Raj) Assistant professor Lecturer Lab Technician 12/2/ 2024- 10/ 5/ 2024

Kpir institute Coimbatore (Tamil Nadu) Assistant Professor CSE 1/ 6 /24 - 1/ 9/ 24

Nics noida(Uttar Pradesh) Computer professor 1/4/ 21 - 1/1/2023

IT SKILLS

- An experienced IT consultant having 14 years of experience which includes 11.7 years of experience in Robotic Process Automation.
- Extensive involvement in Robotic Process Automation development process by using Automation Anywhere.
- Web, Windows based application automation.
- Exception handling and Problem solving.
- Analyzing the problems and implement the processes to improve.
- Innovative ideas to reduce the time span of a process.
- Hands on experience in creating Windows Application.
- Hands on experience in SQL Servers.
- Extensive involvement in automating deployment process by using VSTF Release management
- Have played significant roles in all stages of Development Life Cycle.
- Having good skills in Documentation and Unit testing
- Working in Agile methodology by implementing scrum
- Software and Web Development: Creating new applications, websites, or mobile apps.
- Infrastructure Upgrades: Replacing or upgrading hardware, network components, or migrating to new servers.
- Cloud Migration: Moving an organization's data and systems to a cloud-based environment.
- Cybersecurity Initiatives: Implementing security measures and solutions to protect data and systems.
- Data Management & Analytics: Projects focused on collecting, organizing, and analyzing data to gain insights.
- Digital Transformation: A broad initiative to reshape a business model using technology.
- Planning: Defining project objectives, scope, and resources.
- Execution: Carrying out the planned tasks and activities.
- Monitoring & Control: Tracking progress, managing risks, and ensuring the project stays on schedule and budget.
- Closing: Completing the project, documenting the outcomes, and transferring ownership. A specific goal: Each IT project is designed to solve a business problem, improve an operation, or create new opportunities through technology.
- Leveraging technology: Projects involve IT infrastructure, information systems, software, or hardware.
- A structured approach: This involves planning, organizing, leading, and controlling the project from initiation to completion.
- Delivering a product or service: The outcome is often a new product, a system upgrade, or an implemented IT service.
- Website development: Creating and optimizing a company's website for a better user experience.
- Mobile app development: Designing and building applications for mobile devices.
- Software Implementation: Deploying new software solutions, such as a Customer Relationship Management (CRM) or Enterprise Resource Planning (ERP) system.
- Data analytics and business intelligence: Implementing systems to collect, analyze, and visualize data for decision-making.

TEACHING SKILLS :

- Refer students to additional research resources as appropriate
- Maintain frequent open-office hours to help students address schedule challenges and focus their rest
- Engage students in topics such as English composition, creative freewriting methods, and literary criticism and analysis
- Discuss texts and essays by authors and scholars such as Jacques Barzun, Peter Elbow, Horace, Donald Murray, Sir Arthur Quiller-Couch, and E. B. White
- Explore novels by major 18th and 19th Century writers, including Samuel Richardson and William Makepeace Thackeray
- Provide students with tips and tactics for efficient reading and clear comprehension of source materials
- Teach students to develop and sustain written critical arguments, providing thorough, constructive feedback on graded papers
- Draw strong link between college curricula and various internships and entry-level career opportunities for student
- Lesson Planning: Creating structured lessons that align with learning objectives and student needs.
- Classroom Management: Fostering a productive learning environment and keeping students on task.
- Communication: Clearly conveying information and ideas through public speaking, language command, and presentation skills.
- Subject Area Knowledge: A deep understanding of the content to effectively instruct and facilitate learning.
- Assessment and Evaluation: Using feedback and assessments to monitor student progress and improve teaching methods.
- Instructional Delivery: Effectively presenting material and adapting methods to best deliver lessons.

SKILLS :

Class scheduling
Constructive feedback
Critical thinking
Curriculum development
Independent research
Public speaking

Comparative analysis
Critical analysis
Cross-department collaboration
Higher education
Mentoring
Reporting and documentation

Computer Programming/Coding
Data Analysis
Graphic Design
Language Fluency
Accounting
Digital Marketing
Operating specific machinery
Soft Skills

Communication: Exchanging information and actively listening.
Leadership: Organizing and motivating people toward a shared goal.
Problem-Solving: Identifying issues and finding effective solutions.
Teamwork: Collaborating harmoniously with colleagues to achieve shared objectives.
Adaptability: Adjusting to new situations and challenges.
Time Management: Organizing tasks to be completed promptly.
Critical Thinking: Objectively evaluating situations to make informed decisions.

Communication.
Flexibility.
Determination.
Teamwork.
Ability to Learn.
Problem Solving.
Loyalty.
Resilience.

MARKETING SKILLS/ ACEDMIC COUNSELLING:

CRM Salesforce Data Analysis Communication Negotiation
Lead Generation, LinkedIn, email, referrals
Microsoft Office, Excel, Word, PowerPoint
Strategic Planning

Experience:

Byju's 2022-2023 delhi ind
Satgurukul international 2021-2022 delhi ind Cyber initiation 2020-2021 Delhi ind
Ap group 2019-2020 gujarat ind Business Development Manager (sales)

Developed new strategies to increase penetration into clinical groups at pharmaceutical companies leading to over \$3M in annual revenue
Communicated with 12 experts in genomics to stay on top of market trends and obtain insights to drive internal growth
Conducted due diligence for 21 potential mergers and acquisitions, maintaining valuation metrics based on current market trends
Liaised with scheduling, field operations and engineering on project development and asset optimization for refined mproduct Marketing terminals across 7 states

ACHIEVEMENTS:

Placement Highest Package 35LPA
Average Placement 6LPA
Work With International University/ Client
Best Faculty Award
Sports Competition Awards
NSS/NCC Coordination
Conducted Seminar/Meeting/Departmental Meeting
Conducted Cultural Program
Conducted Inter University Competition

Technical Skills:

Automation Tools : UiPath, Automation Anywhere, Blue Prism.
Languages/Tools : c, c++, SAP Basis
Web Technologies : HTML ASP.Net Java
Javascript Database Technologies : SQL Server NodeJs
Operating Systems : MS-DOS, Windows Server Android IOS

Education Credentials :

B. Tech CSE Bundelkhand University Jhansi 2014.
M. Tech CSE PK university 2024
MBA HR Marketing Ignou 2024
Phd CSE PK University (pursuing)

Project Description:**Project#1:****Banking Process Automation:**

Client : Kredobank.
Duration : Apr 2018 to
2022 Role : .net Developer
Software : ASP

Brief overview of the Project

Kredo bank is the Ukraine based bank with the largest Polish investment in banking institution in Ukraine. Kredobank national network contains central branch and 130 outlets throughout Ukraine. Today, European investment is 99.6% in the share capital of Kredobank, Ukrainian capital is 0.4%. KREDOBANK is a member of the Association of Ukrainian banks, Ukrainian credit and banking union, First stock trading System, Kyiv interbank currency exchange. Also, Kredo bank is a member of such international payment systems, as Master card worldwide , Visa International and the Deposit Guarantee Fund.

Roles and Responsibilities

- Web and Windows based application automation.
- Exception handling and Problem solving.
- Analyzing the problems and implement the processes to improve.
- Innovative ideas to reduce the time span of a process.
- Using TFS Release management for automating deployment process.
- Business Logic implementation / coding as per the design specifications.
- Split the requirements and check the feasibility of the projects with automations.
- Designing workflow and prepare scripts to automate functional requirements
- Interact with clients to get the detailed workflow and clarification clearance
- Involved in User Interface Design as per Client specifications.
- Involved in unit testing and Bug Fixes.

Project#2:

Client : Jamii Bora Bank.

Duration : Apr 2017 to Jan

2018 Role : .net Developer

Software : ASP

Brief overview of the Project

The bank was founded, as a Charitable Trust, by fifty destitute families on the streets of Nairobi, Kenya's capital and largest city. In March 2010, it merged with another financial institution with a banking license and transformed into a fully fledged commercial bank.

In March 2010, Jamii Bora merged with City Finance Bank (CFB), a small private financial services provider which, in the past, had provided services to large corporations and high-net-wo

individuals. In the merger, CFB acquired JBB and took on the name of its new acquisition. Other investors in the bank include Baraka Africa Fund (BAF), and other individual investors

Roles and Responsibilities:

- Web and Windows based application automation.
- Exception handling and Problem solving.
- Analyzing the problems and implement the processes to improve.
- Innovative ideas to reduce the time span of a process.
- Using TFS Release management for automating deployment process.
- Business Logic implementation/coding as per the design specifications.
- Involved in User Interface Design as per Client specifications.
- Involved in unit testing and Bug Fixes.

Project#3:**Swift Robotics - Dell Order Processing**

Client : Sonata software.

Duration : Nov 2016 to Mar 2017

Technologies: Full Stack Web Development

Brief overview of the Project:

Swift Robotics Platform is to automate the Order Processing along with Automation Anywhere automation tool which will help the client to reduce the operation costs, increase in quality, control and the much needed process standardization. This BRD will focus on new shifting rule to make the shifting between regions similar to the shifting within same region in terms of the process, charges, and configuration. Second scope is on Robotic development which would consume and respond to data which would be consumed by the Robots to do the necessary actions in the Order processing

Roles and Responsibilities:

- Extensive involvement in Robotic Process Automation development process by using Automation Anywhere
- Web, Windows and Mainframe based application automation.
- Exception handling and Problem solving.
- Analyzing the problems and implement the processes to improve.
- Innovative ideas to reduce the time span of a process.
- Work with BAs to understand stakeholder and functional requirements
- Work with BA to design To Be solution and create Solution document
- As a part of Quality Assurance team for all the project, involved in Initial testing, User Acceptance Testing (U.A.T) & Deployment of live environmen
