SUMMARY

- Embedded Software Test Engineer with 3.3 years of experience in verification and validation of safety-critical automotive and avionics systems.
- Expertise in unit testing, MC/DC coverage, requirement analysis, and compliance with ISO 26262 and DO-178C standards.
- Strong understanding of SDLC, STLC, ASPICE, and automotive communication protocols including CAN, UDS, and Automotive Ethernet.
- Hands-on experience in test automation using Selenium WebDriver with Python, including framework design using Page Object Model and CI/CD integration.
- Skilled in root cause analysis, defect tracking, and delivering high-quality software under tight deadlines.

EXPERIENCE

L&T Technology Services

Software Test Engineer

Sep 2022 – Present

Mysore, Karnataka

- Performed unit testing, MC/DC coverage analysis, and requirement-based validation for automotive software.
- Developed and executed automated test scripts using Selenium WebDriver for web application testing.
- Designed reusable automation frameworks using Page Object Model (POM) and integrated TestNG for execution and reporting.
- Worked with tools such as IBM RTRT, VectorCAST, Jira, Polarion, Plastic SCM, and Selenium.
- Performed cross-browser testing (Chrome, Firefox, Edge) and integrated automation scripts with CI/CD pipelines.
- Analyzed ECU defects and performed root cause analysis.
- Contributed to ASPICE-compliant development and validation processes.

TECHNICAL SKILLS

Languages: C, Embedded C, C++, Python

Automation Testing: Selenium WebDriver, PyTest, Page Object Model (POM), Data-Driven Testing

Tools: IBM RTRT, VectorCAST, TPT, Astree, Jira, Octane, Plastic SCM, Bitbucket

CI/CD & Version Control: Jenkins, Git

Web Technologies: HTML, CSS, Basic JavaScript

Protocols: UDS, CAN, Automotive Ethernet

Standards: ASPICE, ISO 26262, DO-178C

Simulation: MATLAB

Others: CANoe, DLT Viewer, Wireshark, VS Code

PROJECTS

Ford | Python, Selenium, TestNG/PyTest, Jenkins

Automation Test Engineer

- Developed automated test scripts using Selenium WebDriver with Python to validate end-to-end web application workflows.
- Designed and implemented a scalable automation framework using Page Object Model (POM) for better maintainability and reusability.
- Automated regression and smoke test suites, reducing manual testing effort by 40% and improving release efficiency.
- Integrated PyTest for test execution, reporting, and test case management.
- Implemented data-driven testing using external data sources (Excel/JSON).
- Performed cross-browser testing across Chrome, Firefox, and Edge.
- Integrated automation suite with Jenkins for CI/CD pipeline execution.

Hyundai | Embedded C, VectorCAST, Jira, Polarion, Plastic SCM

Unit Test Engineer

- Designed test cases as per DO-178C Level A standards.
- Executed unit test scripts using VectorCAST.
- Performed MC/DC coverage and gap analysis.
- Raised defects and linked them with Jira tickets.
- Participated in peer reviews and generated test reports.

Daimler eATS and EVA2M | C, RTRT, Jira, Polarion, Plastic SCM, Bitbucket

Unit Test Engineer

- Created unit test plans and performed source code verification.
- Configured RTRT and executed unit testing activities.
- Developed test scripts and validated requirements.
- Performed MC/DC coverage analysis and defect tracking.

BMW IVI Project | DLT Viewer, Wireshark, Jira, Octane

HIL Test Engineer

- Developed and executed HIL test cases for infotainment systems.
- Configured and maintained HIL benches with ECU integration.
- Performed regression testing, diagnostics, and defect tracking.
- Conducted root cause analysis and fishbone analysis for defects.

EDUCATION

Vasavi Engineering College

Aug 2018 – May 2022

B.Tech CGPA: 8.02/10

Andhra Pradesh, India

CERTIFICATIONS

- Control Design by MathWorks
- Stateflow by MathWorks

ACHIEVEMENTS

- Received “Spot Award” for consistently delivering high-quality work within deadlines.
