Career Objective

To work in a dynamic organization where I can apply my expertise in TCAS analysis, signaling systems, and troubleshooting to improve operational performance. I aim to contribute to enhancing the reliability and safety of railway systems, while continuously developing my skills for management roles.

Professional Experience

Medha Servo Drives Pvt. Ltd.

Data Analysis Team – TCAS Analysis

- **TCAS Data Analysis:** Conducted comprehensive analysis for both **Loco TCAS** and **Station TCAS** systems, verifying data integrity and ensuring the systems function according to performance and safety standards.
 - **Signaling Knowledge:** Leveraged knowledge of **railway signaling systems** to support TCAS integration and improve operational reliability. Ensured synchronization between signaling equipment and TCAS systems for efficient collision avoidance and operational safety.
 - **System Verification:** Verified the **Station TCAS RFID TAG/TIN Layout, TOC, and RFID tag data** for compliance with technical specifications, ensuring compatibility with railway signaling standards.
 - **Real-Time Monitoring:** Monitored **NMS (Network Management System)** data in real time to assess **yard/station performance** during trial runs, identifying potential system failures or safety risks related to signaling and TCAS.
 - **Production Support & Troubleshooting:** Worked closely with **Field/Site Engineers** to troubleshoot and resolve technical issues within the TCAS and signaling systems, reducing downtime and optimizing system reliability.
 - **5S Implementation:** Played a key role in implementing **5S procedures**, which improved workflow, reduced defect rates by **40%**, and enhanced customer satisfaction.
 - **Reporting & Documentation:** Prepared monthly **performance reports** and **technical documentation**, detailing system performance, potential issues, and corrective actions, as well as aligning with signaling and TCAS standards.
 - **Collaboration & Support:** Collaborated with cross-functional teams to ensure smooth integration of TCAS with signaling systems, optimizing operational safety and performance.
 - **Testing of Signalling and Tcas cards :** Conducted thorough testing of signaling and tcas cards, ensuring compliance with industry standards and enhancing system reliability for aviation safety. Identifying software bugs that could have led to significant system failures, which ultimately reduced defect rates by 30%.
-

Education

Bachelor of Technology (B.Tech) in Electrical and Electronics Engineering (EEE)

Baba Institute of Technology and Science, Visakhapatnam, A.P.

Graduation Year: 2021

CGPA: 7.74

Diploma in Electrical and Electronics Engineering (EEE)

Rajiv Gandhi RECS Polytechnic College, Kasimkota, A.P.

Graduation Year: 2018

Percentage: 87.11%

10th Standard

Z.P.H School, Aganampudi, A.P.

Board: State Board of Secondary Education

Graduation Year: 2015

CGPA: 9.0

Project

B.Tech Project: ARDUINO BASED ANDROID CONTROLLED ROBOTIC ARM

Description:

This project involved designing an Android-controlled robotic arm via Bluetooth technology using Arduino. The goal was to create a cost-effective solution for performing tasks in environments where human interaction is unsafe or impractical. This system is designed to be versatile and used in various industrial applications.

Strengths

- Strong **Leadership Skills**
 - Highly **Creative** and solution-oriented
 - **Adaptable** to new challenges and work environments
 - Highly **Self-Motivated** with a focus on continuous improvement
 - Excellent **Interpersonal Skills** and teamwork capabilities
 - Proficient in **Time Management** to ensure deadlines are met and systems are optimized
-

Personal Details

- **Father's Name:** Venkanna
 - **Date of Birth:** 30th July 1999
 - **Marital Status:** Unmarried
 - **Gender:** Female
 - **Nationality:** Indian
