India | Open to Relocation

DOMAIN EXPERTISE

- Radar Systems (Signal Processing)
- Air Defence Systems
- Counter-UAS
- EW Systems
- Tactical Communications
- SATCOM
- Sensor Fusion
- Command & Control Integration

LEADERSHIP IMPACT

- Delivered >95% availability of mission-critical systems
- Accelerated GSQR → Trials → Induction lifecycle
- Led indigenisation of 421+ components
- Managed large engineering organizations (800+ personnel)
- Delivered measurable efficiency improvements using Lean Six Sigma

Open to leadership roles in Defence Technology, Program Management, Engineering Leadership, and Strategic Operations.

Let's connect to drive next-generation defence capabilities and transformation.

EDUCATION

- B.E. – Electrical & Electronics Engineering
- M.Tech - Comn Engg
- MBA – Human Resources (IGNOU)
- MBA – Supply Chain & Logistics Management

EXECUTIVE SUMMARY

Strategic defence technology leader with 27+ years of experience delivering complex, mission-critical capabilities across Radar, Air Defence, Electronic Warfare (EW), Communication, and SATCOM systems.

Proven expertise in leading end-to-end program lifecycles—from GSQR formulation and system design to trials, induction, and lifecycle sustainment—while driving alignment across DRDO, DPSUs, private defence industry, and global OEMs.

Currently leading large-scale engineering and sustainment operations, managing ₹200 Cr+ annual budgets and ₹10,000 Cr+ national assets, and transforming organizations through PMP®-driven governance and Lean Six Sigma methodologies.

WHAT I BRING

- Defence Program Leadership across Radar, Air Defence & EW ecosystems
- Project & Portfolio Management using PMP® frameworks
- Indigenisation & self-reliance (421+ components developed)
- Multi-stakeholder integration across DRDO, BEL, BDL, OEMs & Armed Forces
- Operational excellence with >95% system availability

PROFESSIONAL EXPERIENCE

General Manager – Engineering & Production

Army Base Workshop

May 2025 – Present

Leadership & Operations

- Lead a large engineering organization (840+ personnel) managing ₹200 Cr budget & ₹10,000 Cr asset base
- Drive production planning, sustainment strategy, and operational excellence for radar-linked air defence systems

Transformation

- Achieved 15% reduction in turnaround time via Lean Six Sigma initiatives
- Built a performance-driven, accountable engineering culture

Strategic & Technical Oversight

- Directed sustainment of Radar, Air Defence, Artillery, EW & Communication systems
- Led indigenisation of 421+ components, strengthening national self-reliance
- Enhanced predictive maintenance and reliability frameworks

Chief Engineering Officer / Radar Program Lead

Army HQ – DRDO (LRDE Interface)

Jul 2022 – Apr 2025

Program Leadership

- Directed lifecycle management of advanced systems: WLR, BFSR, LLLR(I), MFCR, ADFCR, Counter-UAS
- Applied PMP® governance frameworks to manage multi-agency programs

CERTIFICATIONS

- PMP® – Project Management Institute (USA)
- Lean Six Sigma Green Belt – KPMG

Strategic Integration

- Acted as key interface across DRDO, BEL, BDL, DLRL, private industry & global OEMs
- Enabled seamless coordination between design, production, and operational stakeholders

Technical Governance

- Led GSQR formulation, TEC processes, and system validation
- Oversaw RF, antenna, signal processing, power & platform integration

Strategic Contribution

- Contributed to national programs: QRSAM, MRSAM, Akash NG
- Accelerated trial-to-induction cycles

Assistant Director – Operations & Sustainment

HQ Northern Command

2018 - 2022

- Managed operational readiness of Radar, EW, UAV & surveillance systems
- Oversaw OEM contracts, lifecycle sustainment, and maintenance strategy
- Delivered high system availability in extreme/high-altitude environments

Senior Operations Manager – EW Systems

2015-2018

- Managed ₹800+ Cr EW program (Samyukta) and ₹150+ Cr AMC portfolio
- Ensured high uptime, cost control, and mission reliability

Earlier Roles

2001 – 2015

Program Manager – Radar & Communication Systems

Logistics & Engineering Manager – High Altitude Operations

Team Leader – All Arms Technical Units

- Managed logistics across 1500 sq km high-risk terrain
- Built in-house repair ecosystems, reducing downtime & costs
- Led training, HR, and operational readiness
