1-81,Srungadhara Agraharam village,
Rowthulapudi Mandal, Kakinada
district, Andhra Pradesh,533406

Dear Hiring Team,

I am writing to express my interest in opportunities within Operations, Rolling Stock and Signalling systems at your esteemed organization. With 9 years of experience in railway operations and maintenance, I bring strong hands-on expertise across both CBTC (Hyderabad Metro) and ETCS (Etihad Rail, UAE) environments.

In my current role as a Train Driver with Etihad Rail Mobility, I operate passenger trains under ETCS, ensuring safe and efficient operations while managing real-time troubleshooting, depot shunting, and emergency response. Previously, I worked with Keolis Hyderabad Metro as a Train Operator and was promoted to Station Controller, where I handled CBTC-based operations, coordinated with OCC, managed station systems (ATS, CCTV, BMS, AFC, FACP, PAS and PIDS), and ensured passenger safety and service reliability.

Earlier in my career, I gained strong technical experience as a Data Logger Customer Support Engineer and Electronic Interlocking System Maintenance Engineer with Indian Railways. In these roles, I was involved in installation, maintenance, fault diagnostics, and system monitoring of signalling equipment, including vital and non-vital systems. This experience strengthened my ability to troubleshoot complex issues and support system reliability and safety.

I offer a unique combination of operations and maintenance expertise, along with strong knowledge of signalling systems, testing & commissioning, and safety compliance. I am confident in my ability to contribute effectively to your team by enhancing system performance, reliability, and operational efficiency.

I would welcome the opportunity to discuss how my skills and experience align with your requirements. Thank you for considering my application.

Yours sincerely,
Palla Veera Babu.

OBJECTIVE

Results-driven railway professional with 9 years of experience in train, station operations and maintenance, with strong expertise in CBTC (Hyderabad Metro) and ETCS (Etihad Rail) signalling systems. Experienced in train driving, station handling, electronic interlocking, system monitoring, troubleshooting, and testing & commissioning activities. Proven ability to ensure safe, efficient, and reliable railway operations under diverse environments. Seeking a challenging role in operations, rolling stock or signalling systems with leading organizations like where I can contribute to enhancing system performance, safety, and reliability.

EDUCATION

2011	Government Polytechnic College Narsipatnam Diploma in ECE 77.91
2014	Sri Aditya Engineering College Surampalem (JNTUK) Bachelor of Technology in ECE 67.07
2023	BSR Institute of Fire and Safety Engineering College Vizianagaram SBTET Industrial Safety 82.4

EXPERIENCE

March 2015 - Jan 2016	Efftronics Systems Private Limited Vijayawada Data Logger Customer Support Engineer - Installed, configured, and commissioned data logger systems for railway signalling applications across stations - Performed preventive and corrective maintenance to ensure continuous system reliability and uptime - Monitored signalling system performance through data log analysis and track simulation system - Diagnosed and troubleshoot faults related to signalling and data logging systems, ensuring minimal downtime - Coordinated with Railway S&T team to report issues, provide technical insights, and support fault resolution - Conducted system testing and validation to ensure accurate data capture and compliance with railway safety standards
--------------------------	--

March 2018
-
September
2018

PAGES Consultancy Private Limited (Siemens Rail Automation Private Limited)
Electronic Interlocking System Maintenance Engineer

- Performed maintenance and troubleshooting of Electronic Interlocking (EI) systems, ensuring safe and reliable train operations
- Diagnosed and rectified faults in interlocking logic, track circuits, point machines, signals, and associated interfaces
- Conducted preventive and corrective maintenance activities to minimize system failures and downtime
- Monitored system health and analyzed faults to improve reliability and operational efficiency
- Coordinated with field teams and control offices for quick fault resolution and restoration of signalling systems
- Maintained records, logs, and supported billing/documentation activities related to maintenance and service work
- Assisted in testing, commissioning, and validation of EI systems as per railway safety standards

September
2018 -
February
2026

Keolis Hyderabad Mass Rapid Transit System Private Limited

Train Operator and Station Controller

Train Operator

- Operated metro trains in compliance with signalling systems(CBTC) and safety protocols, ensuring punctual and safe passenger service
- Executed shunting operations within depot, delivered on-the-job training to new joiners on train operations, safety procedures, and system handling
- Ensured passenger safety by strictly adhering to operational rules, signalling aspects, and emergency procedures
- Performed real-time troubleshooting of onboard systems, including propulsion, braking, doors, and TCMS interfaces
- Analyzed event logs, fault codes, and diagnostic data to identify and resolve system failures
- Coordinated with signaling, OCC, and Rolling stock maintenance teams for quick fault isolation and recovery
- Supported testing & commissioning activities for trains and signaling systems during operations and depot movements

Station Controller

- Managed overall station operations, ensuring safe, efficient, and smooth passenger movement
- Conducted HIRA (Hazard Identification and Risk Assessment) inspections, identified hazards, recorded in logbooks, and ensured timely mitigation
- Coordinated with OCC (Operations Control Centre) for train regulation, incident handling, and service management
- Performed crowd control and revenue management, including monitoring ticketing counters and auditing staff performance
- Supervised and monitored systems such as CCTV, BMS, PAS, PIDS, and AFC gates
- Handled local ATS operations, including route setting, peak-hour train regulation, and guiding train operators during train faults
- Executed manual point operations during emergency or system failures
- Ensured safety compliance through earth rod provision after revenue hours and during maintenance activities
- Managed incident or accident response, including first aid and fire fighting services and coordination with emergency services
- Controlled and monitored Permit to Work (PTW) activities, coordinated with vendors and ensured safe execution of work within station premises
- Maintained high standards of staff discipline, safety compliance, and operational performance

March 2026

-

Etihad Rail Mobility Abu Dhabi

Train Driver

- Operate passenger trains under ETCS signalling, ensuring safe, punctual, and efficient service
- Perform shunting operations within depot, including manual point operation, for training and emergency requirements
- Carry out coupling and uncoupling activities for different passenger rolling stock during failure of equipment
- Handle multiple train types including CRRC inspection trains, CRRC passenger trains, and CAF trains
- Ensure passenger safety and comfort, adhering strictly to operational and safety procedures
- Coordinate and assist in safe passenger evacuation during emergency situations
- Monitor passenger areas and onboard conditions using CCTV systems
- Identify and troubleshoot operational and technical faults in real time
- Perform fuel refilling activities as per operational requirements
- Provide training and guidance to new drivers, ensuring adherence to standards and best practices
- Maintain strict compliance with railway safety rules, ETCS protocols, and company procedures

SKILLS

- ETCS (European Train Control System) Operations
- Electronic Interlocking (EI) Systems
- Signalling Systems Monitoring & Troubleshooting
- Depot Operations & Shunting Procedures
- Passenger Train Driving & Handling
- Testing & Commissioning Support
- Preventive & Corrective Maintenance
- System Testing & Validation
- HIRA (Hazard Identification & Risk Assessment)
- Permit to Work (PTW) Safety Coordination
- CCTV, BMS, PAS, PIDS Monitoring and Controlling
- Training & Mentoring New Staff
