PROFESSIONAL SUMMARY

Engineering Leader with 21+ years of progressive experience in Embedded Systems architecture, hardware and software development, and large-scale railway and automotive program execution. Proven track record of building and scaling cross-functional engineering organizations of 40+ members delivering multi-million-dollar rolling stock programs across domestic and international markets.

Expert in real-time embedded platforms (Baremetal, eCos, Embedded Linux) with extensive experience in safety-critical and high-reliability system design. Demonstrated ability to define technical vision, drive architecture governance, and manage complete product lifecycles from concept through commissioning.

Accountable for engineering budgets, delivery performance, cost optimization, and technology roadmap alignment with long-term business strategy across multi-site railway programs. Recognized for strengthening engineering governance, improving operational efficiency, and enhancing customer confidence through predictable delivery.

Key Achievements

- Scaled engineering organization from 5 to 40+ engineers across hardware, software, and systems domains.
- Delivered TCMS and Papis solutions across metro, high-speed, and mainline rolling stock platforms.
- Achieved 25% BOM cost reduction through architecture optimization and vendor consolidation.
- Led early adoption of Ethernet-based Train Backbone (IEC 61375-2-5) in Indian railway systems.
- Successfully executed NYCT (USA) program with zero critical post-commissioning failures.

Executive & Technical Competencies

- Engineering Organization Leadership (40+ engineers)
- Technical Strategy & Product Roadmap Governance
- Large-Scale Railway Program Delivery & Risk Management
- Safety-Critical Architecture (EN50126/128/129, IEC 61375 – ETB/ECN/MVB/WTB)
- Cost Optimization & Margin Enhancement
- Technical Bid Strategy & Commercial Alignment
- Engineering Budget & Cost Center Ownership
- Product Lifecycle & Obsolescence Management
- Embedded Linux / RTOS (eCos, Baremetal)
- Executive & Global Stakeholder Engagement

Chief Architect / Technical Project Director 01/2023 - Current**CENTUM Electronics Ltd.** Bengaluru, India.

- Directed end-to-end engineering strategy for Public Address, Passenger Information, and Video Surveillance systems across metro and high-speed rail programs.
- Owned technical roadmap, architecture governance, and lifecycle management including obsolescence strategy.
- Accountable for annual engineering budgets and AOP planning, managing multi-million-dollar rolling stock programs across metro and high-speed platforms
- Drove cost-optimized architectural strategies for current and upcoming programs.
- Served as primary technical interface for customers, executive stakeholders, and bid review committees.
- Led technical bid strategy, requirements compliance, and solution definition for large-scale railway programs, ensuring competitive positioning and margin alignment.
- Governed end-to-end program delivery through structured quality frameworks, risk management, and stage-gate reviews.
- Delivered engineering solutions for major metro and high-speed rail programs including DMRC RS17, Chennai Metro Phase 2, and Vande Bharat, EMU/MEMU platforms.
- Built and led a 40+ member multidisciplinary organization including system architects, hardware, software, validation, and field engineering teams.
- Structured design reviews, configuration management, and release governance.
- Reduced BOM cost by 25% through design optimization and vendor negotiation.
- Partnered with sales and commercial teams to improve bid win-rate and protect program margins through optimized technical solutions.

Sr Manager R&D, 04/2020 – 01/2023**Medha Servo Drives Pvt Ltd**, Hyderabad, India, India

- Led system integration and validation of TCMS, CCTV, and Papis systems for domestic and NYCT (USA) programs.
- Managed subsystem interfaces with Train Control & Management Systems (TCMS).
- Achieved 95% on-time delivery through structured risk mitigation and cross-functional coordination.
- Mentored 30+ engineers and established competency and succession planning frameworks.
- Maintained strong awareness of industry trends, standards, and technological advancements to continuously improve system architecture and engineering processes.

Manager - R&D, 04/2016 - 03/2020**Medha Servo Drives Pvt Ltd**, Hyderabad, India, India

- Led integration and deployment of TCMS, CCTV, and Papis systems across metro platforms.
 - Managed installation, commissioning, validation, and customer acceptance activities.
 - Drove development initiatives aligned with evolving train backbone technologies.
-

Assistant Manager R&D, 10/2011 - 03/2016

Medha Servo drives Pvt Ltd, Hyderabad, India, India

- Spearheaded development of Ethernet-based Train Communication Networks aligned with IEC 61375-2-5.
- Implemented dynamic network formation architecture enhancing scalability and redundancy.
- Led commissioning and deployment of TCMS solutions across Metro and EMU platforms.

Sr Engineer R&D, 04/2008 - 09/2011

Medha Servo Drives Pvt Ltd, Hyderabad, India, India

- Hardware and Software development for Train Communication Networks-MVB and WTB based on IEC675-1
- Successful integration to Electric Locomotives with MU coupling and
- Metro Trains and EMU
- Installation and commissioning of MVB and WTB Network in Metro,
- DEMU, EMU

Engineer R&D, 06/2005 - 03/2008

Medha Servo Drives Pvt Ltd, Hyderabad, India, India

- Software Development of Menu driven VFD Graphical HMI for Electric & Diesel Locomotives
- Software Development of Microprocessor based Control and Fault Diagnostic System for Electric Locomotives

EDUCATION

Osmania University, TG-India, India, 2005

Bachelor of Engineering: Electronics and Communications Engineering

REGULATORY & STANDARDS EXPERTISE

- EN 50155 / EN 50128 compliance exposure
- SIL-aligned system development practices
- Cybersecurity governance for onboard railway systems
- Requirements & configuration management (DOORS, Jira, PLM, Git)
- Multi-site engineering leadership & offshore coordination
- Engineering cost center ownership
