

CHAMUNDESWARI DASARI

Engineering Manager | Software Engineering Leadership

Hyderabad, India | +91-9247500069 | chamundeswari.dasari@gmail.com | linkedin.com/in/chamundeswari-dasari-9a0195108

PROFESSIONAL SUMMARY

Engineering Manager with 18+ years of software engineering experience, including 5+ years in engineering leadership and management roles. Proven track record of leading and scaling high-performing teams of 8–15 engineers across complex enterprise application development, application modernization, and cloud migration projects. Deep expertise in microservices architecture, REST APIs, Agentic AI, API Security, distributed systems optimization, event-driven design patterns, CI/CD pipelines, and DevOps practices. Experienced in Agile/Scrum delivery, sprint planning, backlog management, stakeholder communication, and translating business requirements into technical roadmaps. Hands-on background with AWS, Azure, Docker/Kubernetes concepts, and AI-assisted developer productivity tools. Passionate about fostering engineering excellence, mentoring talent, and driving continuous improvement.

CORE COMPETENCIES

Engineering Leadership & People Management | Application Modernization & Migration | Microservices & Event-Driven Architecture

REST/SOAP APIs | CI/CD Pipelines & DevOps | Agile / Scrum / Kanban | Cloud Platforms (AWS, Azure) | Docker / Kubernetes

Technical Roadmaps & SDLC | Team Hiring & Onboarding | Stakeholder Communication | Database Tuning & Optimization | AI/ML Integration

PROFESSIONAL EXPERIENCE

Engineering Manager / Engineering Lead | Appen

Nov 2023 – Present | Hyderabad

Led engineering for a global AI data platform supporting 1.5M+ contributors across 170+ countries

- Led, mentored, and developed a cross-functional team of 12 engineers (backend + mobile), conducting performance evaluations, providing constructive feedback, and creating individual development plans to foster professional growth.
- Recruited, onboarded, and retained top engineering talent; managed team capacity planning, sprint allocation, and resource optimization aligned to quarterly OKRs.
- Facilitated daily standups, sprint planning, retrospectives, and other Agile ceremonies, ensuring predictable delivery cadence and accountability.
- Architected and delivered scalable microservices-based backend systems using Java and Spring Boot with REST APIs, enabling a 90% revenue shift within six months through the Crowdgen platform launch.
- Led end-to-end delivery of enterprise applications from requirements through production deployment, partnering with Product Management to define technical roadmaps and translate business requirements into technical specifications.
- Drove application modernization initiatives including PASOE-equivalent migrations, cloud enablement on AWS, and integration with modern cloud services and APIs.
- Implemented DevOps practices including CI/CD pipeline optimization (Jenkins), automated testing, and DevSecOps tooling (Snyk, SonarCloud), achieving 95% SLA adherence.
- Directed AWS infrastructure optimization, reducing cloud costs by 40% through right-sizing, decommissioning legacy systems, and enforcing architectural governance.
- Achieved 98%+ production stability through observability (New Relic), zero-downtime database upgrades, and proactive incident management with structured root cause analysis.
- Championed AI-assisted developer workflows using Cursor and GitHub Copilot, reducing development cycle time and improving team throughput.

Full Stack Architect | invenioLSI

May 2023 – Oct 2023 | Hyderabad

Individual contributor with leadership influence on high-scale distributed API systems

- Designed system architecture for a distributed API platform processing 10M+ daily transactions, applying REST/SOAP API integration patterns, microservices design, and fault-tolerant architecture.

- Established engineering standards and governance, reducing technical debt by 40% through architectural reviews and targeted refactoring initiatives.
- Streamlined CI/CD pipelines using Jenkins and GitLab CI, increasing deployment efficiency by 35% and introducing shift-left DevSecOps security practices.
- Collaborated with cross-functional teams (QA, Security, DevOps, DBA) to ensure alignment on delivery, quality standards, and operational readiness.

Lead Software Engineer | Blue Yonder
 Sep 2019 – Mar 2023 | Hyderabad

Technical lead for enterprise supply chain platform modernization

- Led migration of 20+ monolithic legacy applications to a microservices architecture, improving scalability, reducing blast radius, and enabling independent service deployment on cloud-native infrastructure.
- Managed technical debt reduction and refactoring initiatives; introduced reusable component frameworks improving maintainability by 30% and accelerating engineering velocity.
- Achieved 98.5% defect-free production releases by establishing comprehensive SDLC standards, automated testing practices, and incident response processes.
- Mentored engineers on scalable design, OOP principles, and coding best practices; conducted architectural reviews to elevate team capability.
- Coordinated database schema changes, data migrations, and version upgrades with zero unplanned downtime.
- Provided architectural guidance during critical distributed system incidents, leading root cause analysis and cross-team resolution.

Senior Software Engineer | Broadcom (CA Technologies)
 Jun 2015 – Jun 2019 | Hyderabad

Enterprise-scale platform reliability and observability engineering

- Contributed to large-scale enterprise platform development with emphasis on performance optimization, reliability, and operational excellence.
- Led WAR-room incident response for critical distributed systems, coordinating cross-functional remediation and stakeholder communication.
- Enhanced CI practices, monitoring and alerting capabilities using observability tools, reducing mean time to detection (MTTD) and mean time to recovery (MTTR).
- Performed root cause analysis and implemented corrective actions to resolve systemic issues and strengthen long-term platform reliability.

EARLIER EXPERIENCE

Senior Consultant – Capgemini, Bengaluru	May 2014 – May 2015
Sr. System Analyst – Payments Platform – Wave Crest Payments, Hyderabad	Jul 2011 – Sep 2013
Member Technical – ADP India, Hyderabad	Apr 2010 – Jun 2011
Technical Lead – Mahindra Satyam, Hyderabad	Sep 2007 – Mar 2010

TECHNICAL SKILLS

Languages & Frameworks: Java, Spring Boot, Python, React JS, JavaScript, SQL

APIs & Integration: REST APIs, SOAP, JSON/XML, Swagger/OpenAPI, Web Services, Microservices, ESB/Middleware patterns

Architecture: Microservices, Event-Driven Architecture, Distributed Systems, PASOE concepts, High Availability Design

Databases: PostgreSQL, MongoDB, MySQL, Oracle, Redis, Elasticsearch — schema design, query optimization, data migration

Cloud & DevOps: AWS (RDS, S3, EC2), Azure, Docker, Kubernetes (conceptual), Jenkins, GitLab CI, CI/CD, Ansible awareness

Security & Quality: DevSecOps, Snyk, SonarCloud, Automated Testing, Code Reviews, Shift-left security

Observability: New Relic, Logging & Monitoring, Incident Management, Root Cause Analysis

Messaging: Kafka, Event-Driven Architecture

Agile & Leadership: Scrum, Kanban, SAgile awareness, Sprint Planning, Backlog Grooming, Retrospectives, OKRs

AI Tools: GitHub Copilot, Cursor, AI/ML integration concepts, AI-powered workflow automation

Version Control: Git, GitHub, SVN, Collaborative development workflows

EDUCATION

Master of Computer Applications (MCA) | JMJ College for Women, Tenali | 2003 – 2006 | 82% aggregate

ADDITIONAL HIGHLIGHTS

18+ years of continuous enterprise software engineering experience spanning payments, supply chain, AI data platforms, and API infrastructure across global organizations including Broadcom, Blue Yonder, and Appen. Experienced in working with cross-functional stakeholders, architecture review boards, and technology governance committees. Strong background in vendor coordination and platform support escalations.
