

DEEPAK T. IPPE +91 9822290253

ELECTRONICS EMBEDDED SOFTWARE
TECHNOLOGY

PRODUCTS AND SERVICES

Technical Management, Project Management, Six sigma Green Belt,
UK and USA work experience

QUALIFICATION

- B.E. in Electronics & Telecommunication from Pune University, Maharashtra State in 1996 with Higher Second Class.
- Diploma in Electronics & Telecommunication from the Bombay Technical Board of Maharashtra State in 1993, with First Class.
- Computer diploma courses from NIIT Institute, Pune.
- Project Management Training and implementation from Eaton, Honeywell and Cummins.
- Six Sigma Training and Green Belt from Eaton, Honeywell and Cummins.

Experience: Total experience: 29+ Years

- Speed Engineering Solutions : From April 2025 to Nov 2025 as Senior Manager Onsite LT Manager Recruitment and Techno commercial
- TSD Techno Services, Pune India : From August 2020 to August 2024 as a Technical Leader for different clients for offshore projects
- Intellore Systems Pvt. Ltd.: From August 2018 to July 2020 as an Individual Contributor
- R.K. Enterprises: From Oct.2015 to July2018 as System and Software Lead
- Cummins India Limited: From Feb 2011 to Dec. 2014 as a Sr. Manager System and Software
- Honeywell Automation India Ltd.: Industrial Automation and Controls: Services and Product Development From 2007 to 2011: Lead Engineer
- Eaton Industries Pvt. Ltd.: Hydraulic & HST Projects: 3 Years From 2004 to 2007: Project Lead
- Mechatronics Systems Pvt. Ltd.: Water Resource Management: 2 Years From 2002 to 2004: Design Manager.
- CMS (R & D) : Working on Traffic signal controller: 1 year from 2001 to 2002
- R.K. Enterprises Pune-37: Industrial Automation and controls for Government organizations: 5 Years From 1996 to 2001: Senior Design Engineer

PROFILE

- Over 29+ years of professional experience in Technical Management, Electronics and Embedded Product Development and Services, Design & Development, R& D.
- Executed a variety of projects involving gathering requirements from the customer, requirement analysis, High level design, design & development from the scratch and testing projects.
- Worked for various domains including Ministry of Defence, Water resource Management, Industrial Automation and Control, Automotive & Hydraulic sectors, Motor control, IoT, Robotics.
- HandsOn and well versed in the following:
 - Capturing requirement analysis, Design & development, and implementation of the projects.
 - Hardware design and development using professional tools like ORCAD, Eagle, Altium, LTSpice & PSpice simulation packages, Design for EMI/EMC.
 - Firmware High level design, Firmware development using Assembly and 'C' and 'C++' languages.
 - Software development using VB, VB.Net, WIN32API and VC++(6.0), Software documentation using UML, Web designing in HTML, CSS, JavaScript, PHP, Database .
 - Solving the Team member issues, interaction with the customers, understanding their requirements and providing the right solution.
- **Overseas experience:**
 - **Knowledge sharing with UK Team within UK for Eaton.**
 - **Working experience with Flowserve in USA for Honeywell.**

SKILL SET

- **Project Management:**
 - Leading the teams technically, Building organization capability by taking Interviews and Training, Work Breakdown structure, Purchase.
 - MS Office, Microsoft Project, Microsoft Visio, Teams, Jira, ClickUp.
 - Excellent and in depth understanding of all aspects of a system design. Results oriented.
 - Excellent knowledge of supplier interaction, DFM (design for manufacturability), DFT (Design for testability), DFSS (design for six sigma), design for EMI/EMC compliance and troubleshooting of EMI/EMC issues.
- **Six sigma:**
 - VOC, AHP, FMEA, Risk analysis, MSA, Transfer functions, Data analysis
 - Done the Six-sigma training from Eaton and Honeywell and Cummins.
 - Obtained the Green Belt Certification.
- **Customer / Marketing Support:**
 - Prepared proposals, Concept notes, FRS, HRS, SRS, HLD, ATPs and operating and user manuals for the products.
- **Electronic System Design:**
 - Product development with electronic design hardware & firmware in both Analog and Digital domain, Mixed Signal Design
 - Worked with many Instrumentation amplifiers, ADCs, DACs, Signal Conditioner modules, OPAMS, and 8/16/32 bit micro-processors/ controllers, memories, RTCs, LCD & Seven segment displays, PCI & ISA cards, Power electronics and other peripheral chipsets.
 - Communication interfaces using Ethernet TCP/IP, RS232, RS485, CAN, MODBUS, Http, MQTT, JSON protocols.
 - EMI/EMC point of design. Familiar with various CE, CSA and UL standards. EFT, ESD protection using transzorbs, large capacitors. Intrinsic safe design using barriers. Familiar with the zone 1 and zone 2 design. IP65 design for enclosures.
- **Software:**
 - Assembly, C, C++ languages for Firmware development. WIN32 API and VC++ (6.0), MFC, VB.UML documentation. Various compilers and IDEs. Sybase and MS ACCESS database and SQL language. Web designing in HTML, CSS, JavaScript, PHP, Database.
- **Microcontrollers / Microprocessors / Memories:**
 - 8085,8088, Z-80, Philips 80c51,80c320, Atmel 89c52, Dallas5000, Microchips 16F818,16F877 & 18F4580, Freescale Controllers, ATMega128, ATMega2561, Arm Processors LPC2478 and LPC1768,MSP430 series, STM32 and PIC SAM32 Controllers, Raspberry Aurdino Bluepill processors, Renesas Processors

➤ **Digital IOs and signal conditioning:**

Design of Digital Input for +12V DC, +24 DC, AC inputs with Opto Isolators & for EMC.

Design of Digital Output for +12V DC, +24 DC, Solenoid coils, SSR, Relays, and Alarms with snubber and protection scheme. MOSFET drivers, H- bridge using MOSFETs, PWM control. Various sensors.

➤ **Role and responsibilities handled:**

- Interacting with the International clients, vendors
- Taking the high-level requirements from the clients
- Making technical proposals and concept notes
- Estimate cost and timeline of the project
- Making project schedule
- Analyzing high level requirements and translating into detailed design specifications.
- Hardware design, analysis, simulation, design-documentation, verification and validation.
- Firmware design, coding analysis, maintain CMMI 3 level.
- Troubleshooting and problem solving using various tools.
- VA / VE on existing products.
- Electrical engineering capability assessment and capability enhancement planning.
- Prepare building blocks for electrical circuit design.
- Mentoring and training junior team members.
- Developing training plans and organizing trainings/workshops for the electrical engineering team.
- Client,Vendors,SCM interactions

LIST OF FEW PROJECTS

➤ **TSD Techno Services, Pune India:**

Working on Electronics and Embedded and Software Products and Services.

It includes hardware design and development, Firmware development, Software Development, IoT Development, Industrial Automation, PoC and Prototypes

We are working on various Microcontrollers, Processors, sensors, displays, Communication protocols, compilers, debuggers, development boards and Operating systems.

➤ **Intellore Systems Pvt. Ltd. Pune:**

Worked on LoRa based Flow Meter for USA client. Done the POC and support to firmware. Communication with client and stakeholders.

Worked on isolation of ECG section and BP section as per medical compliance

Worked on Enclosure IP68.

Worked on requirement phase of Resin material metering equipment for IL client

Worked on Zone Air controller estimation for USA client.

Worked on High level design on Material Flow rate controller for Australia Client.

➤ **R.K. Enterprises Pune:**

Airborne system Power Supplies Control and monitoring over TCP/IP and audio protocol for DRDO Agra Government org.

Inertia control software update for Inertia control Bajaj Auto

LRF power and logic board test Jig for Bharat Electronics Pune

Working on Vision projects for BARC.

➤ **Cummins India Limited: India Design Centre: PGBU**

Working on Hardware and Firmware, Software ECRs.

Warranty reduction program,

VB.Net coding for FATS machine,

Electronic Lab development for electronics product verification and validation.

Working on Genset controllers.

➤ **Honeywell Automation India Limited Pune, India**

Handling US client account.

Project Management: Requirement capturing, Estimation of cost and time,
Component procurement, technically driven the team through the project

Board redesign with AVR ATmega128 controller and firmware development
in 'C' language of Analyzers for US customer.

Liquid control registers for US client

Project Management: Requirement capturing, Estimation of cost and time,
Component procurement, technically driven the team

Hardware development using Arm7 controller.
Zone1, Class 1, Div 1 design. Intrinsic safety design
for electronics. Expulsion proof enclosure design.
Design for ATEX and UL certified. IP65 enclosure.

Waltron Analyzers Ethernet connectivity.

Worked on ISA100 One wireless adapter.

➤ **Eaton Industries Pvt. Ltd. Pune, India**

Hydraulics Valve Electronics for US client

Project Management: Requirement capturing, Estimation of cost and time,
Component procurement, technically driven the team, HLD, interaction with
the customer.

PIC microcontroller-based Hardware. 6-layer PCB development.

Firmware development in 'C' language. PWM control.

Hydraustatic Transmission for On Road & off-Road vehicles for US

Client:

Project Management: Requirement capturing, Estimation of cost and time,
Component procurement, technically driven the team, HLD, interaction with
the customer.

PIC microcontroller-based Hardware. 4-layer PCB development.

EMI/EMC point of design.

Firmware development in Assembly and 'C' language. PWM and PID
Control.

Hydraulic Valves Test Jig for UK client

Project Management: Requirement capturing, Estimation of cost and time,
Component procurement, technically driven the team, HLD, interaction with
the customer

Add on board development with USB, High speed, High resolution
Data Acquisition Systems using National Instrument card

Software development in .dot Net.

➤ **Mechtronics System Pvt. Ltd, Pune India**

Data Logger with Modem capability for P.C.M.C

Project Management: Requirement capturing, Estimation of cost and time, Component procurement, technically driven the team, HLD, interaction with the customer

CPU card and Modem card development

Firmware development in 'C' language.

➤ **CMS, Pune India**

Visual Messaging System for Traffic Control

Project Management: Requirement capturing, Estimation of cost and time, Component procurement, technically driven the team, HLD, interaction with the customer

Main board and RS485 board development

Firmware development in 'C' language

Front end development in VC++ (6.0)

➤ **R.K. Enterprises, Pune India**

PLC System for Bhaba Atomic Research Centre, India:

Development of CPU card with Intel CPU 80c320 and I/O cards

Firmware development in Assembly and 'C' languages.

Laser Range finder Test equipment for Bharat Electronics, India:

Multiplex RS485 card development.

Firmware development in 'C' language and Front-end development in WIN32 API.

Alarm Annunciator for N.R.S.A., India:

Design of 32 Digital I/O card.

Firmware development in 'C' language and Front-end development in WIN32 API

PERSONAL INFORMATION

Name: Mr. Deepak Tukaram Ippe

Phone: +91 98222 90253

E-mail: deepak.ippe@gmail.com

Birth Date: 05/08/1974

Marital status: Married

Address: Flat No. 104, Wing I, Hubtown Country woods, Tilekarnagar,
Kondhwa BK. Pune-411048

Languages Known: English, Hindi and Marathi

Hobbies: Learning new things, Playing and watching Cricket,
Watching Movies, Guiding students for Education
