

Malagouda L K

CSM, CSPO, ICP-ACC (Agile Coach)

Technical Project Management experience in Embedded product development (HW, FW & SW).

Total experience of 25 Yrs

+91-9740252720

khanapuri@gmail.com

335, 4th main, Tatanagar,
Bengaluru-560092

EDUCATION

M. Tech (IISc.) – 2003

B.E. – 1997

Diploma – 1993

PROFESSIONAL SUMMARY

- Jun 2024 to TillDate, Senior Program Manager, **Tata Elxsi**, Bengaluru, Nov-2022 to Jun 2024, Principal Solution Architect, TechM, Bengaluru.
- Mar-2022 **Director**, **Tessolve Semiconductors**, Bengaluru, 2021- Sr. Manager, Cognizant, Hyderabad
- 2018 – Manager (Industry, Siemens, Bengaluru); 2016 – Tech. Manager (Lennox, Chennai)
- 2007 to 2016 – Project Manager/Team Manager (Industry, **Siemens**, Bengaluru)
- 2005 – Technical Lead (MindTree, Bengaluru)
- 1998 to 2005 – Scientist (**ISRO**, Bengaluru)

DOMAIN EXPERTISE

- Aerospace, Military product development & testing
- Industrial Automation & HVAC product development & testing

Immediate Joiner

Senior Program Manager

Tata Elxsi, Bangalore, Jun 2024 to May 2026

- Expertise in rescuing **critical projects** by Study, Root Cause Analysis, proposing the solutions to recover, optimization techniques, cost saving ideas, Test automation, Quality improvement & ruggedness to reduce defects by taking ownership and accountability to bring the project to stable state within 3-4 weeks.
- Responsible as Senior Program Manager for Qualcomm account to handle 5G software development with revenue of \$4M [rescue and Recover the project and release blocked billable amount of \$1M].
- Delivery management for embedded projects on NXP iMX8 MCU consists of, LTE, WiFi, BLE porting and testing, C++ application development (MQTT services, file management, cloud transfer), Web application, Mobile App development(iOS & Android), BLE commissioning, Backend API development,etc..
- Risk management, recruitment, planning, Quality management, stake holder management and KPI improvements (Technical, Automation, Finance, resource and Quality
- Improved project execution, tracking, testing and implementing test automation to improve overall project timelines.
- AMX project: Able to provide the improvements ideas within 3 weeks of studying the project. Did root cause analysis on 250 Field critical issues and proposed 5 initiatives to improve project quality, Stabilization of multiple vendor code product release by providing different controls [API validation, quick implementation of test automation,CI/CD,...etc
- Delivery Leadership Program : Trained and developed the Delivery leadership competency for 72 delivery leaders in organization[Assessment and 3-Tier framework design with competency gap analysis]
- Handled Three major Org level OKRs towards financial dashboard development and Leadership frame work development. Also OKR champion for the department to handle Org OKRs.
- SPOC from Tata Elxsi to Drive Ideas generation, Hackathons and identifying projects for TATA group awards.

Principle solution Architect,

TechM, Bangalore, Nov, 2022 to June 2024

Team Size : project inspection stage

- Responsible for preparing Embedded product development proposals (RFQ Conception HW&SW development testing project closure)
- Showcasing our competency to new customers and acquiring the new projects.
- Developing and executing business strategies to achieve short and long-term goals.
- Drive innovative ideas, solutions and products through leadership and decisive action.
- Responsible for department level talent acquisition with niche skills in embedded systems.
- Competency development for embedded department by identifying competency gap analysis
- Guiding other projects teams, performance improvements, motivating teams and resolving problematic developments and situations.
- Building and enhancing the company's public profile at events, speaking and conference engagements, etc.

Director, Embedded systems,

Tessolve Semiconductors, Bangalore

Mar-2022 to Oct-2022, Team Size : 60+

- Responsible to handle independently Embedded Systems center which includes Hardware development, software development, CoE, Hardware Labs, IT, Hiring, operations, procurements, PCB Fabrication, PCB Assembly, Firmware and BSP development, Test bench, Test automation ...etc

CERTIFICATIONS	
▪ Certified CSM & CSPO ▪ Certified Agile Coach ▪ MBTi certification ▪ Practicing Life coach counseling, conflict management, Meditation practices.	
INTEREST & PASSION	
▪ Project management for Hardware design & validation, software development, Firmware development ▪ Core embedded systems ▪ People management ▪ Talent acquisition ▪ Onsite Delegation activities ▪ Agile coach	▪ Handling \$10m account for embedded product development center with 20+ projects (USA, Europe, Israel, India, China) ▪ Showcasing our competency to new customers and acquiring the new projects. ▪ Responsible for preparing Embedded product development proposals (RFQ Conception HW&SW development testing project closure) ▪ Developing and executing business strategies to achieve short and long-term goals. ▪ Budget forecasting, providing market insights and strategic advice, developing and implementing business plans to improve cost-efficiency models (CI/CD, Test automation, reducing wastage, reducing rework). ▪ Drive innovative ideas, solutions and products through leadership and decisive action. ▪ Maintaining positive and trust-based relations with stake holders ▪ Guiding team, performance improvements, motivating team and resolving problem ▪ Building and enhancing the company's public profile at events, speaking and conference engagements, etc.
SKILLS	
▪ Project management strategies and Agile coaching(initial) ▪ Project Quality & Execution management ▪ Hardware debugging ▪ Software development ▪ Team Building ▪ Conflict Management ▪ Defining targets at Org level ▪ Unique skills to improve team Performance	Sr. Project Manager, CTS, Hyderabad/Bangalore Aug-2021 to Feb 2022 Team Size : 25 ▪ Working with Onsite and offshore team for the development of Harris Radio software developing on C++. Responsible project deliverie ▪ s, scheduling, risk management and technical support. ▪ Involved in Google test framework development for the project ▪ Developed the Makefile by excluding existing QT libraries and single makefile to build 8 components ▪ Proposed design document for DevOps implementation, implementation in progress using Jenkins pipeline.
ACHIEVEMENTS	
▪ Appreciation from Lennox CTO for acquiring product ownership & achieving automation goals within 6 months ▪ Siemens considered as critical employee of the organization (FY14 & FY15) ▪ Technology Scout award (global award) of 2008 from Siemens Germany, Awarded in Salzburg, Austria ▪ Two times STAR employee work appreciation award from Siemens (2008 & 2015) ▪ Deputed as youngest scientist from ISRO to IISc for higher studies. ▪ Obtained 2nd rank to university in B.E. degree ▪ Obtained 8/8 in M.Tech	Manager, Siemens, Bangalore Feb-2018 to Feb 2020 Team Size : 65 ▪ Responsible for 4 automation projects, HMI, TPD, Apps team, Energy suite – validation of firmware and HMI software. ▪ People Management responsibilities for 65 team members for competency building, performance management, training, career development ▪ Responsible for identifying competency gap and providing cost effective trainings for same (internal & external) ▪ Working towards improving the performance of low performance employees. ▪ Single handedly executing to acquire contract employees for organization. ▪ Department level Budget forecasting. ▪ Coaching towards agile transformation - beginner ▪ Empowering team members to achieve highest level of performance. ▪ Strategies for test automation – 250% improvements, MBT initiatives (MBT suite), technical guidance to team. ▪ Monthly ODC report generation, Handled the project worth upto \$5m revenue. ▪ First time achieved major contributions in idea/paper submission Technical Manager, Lennox : 2016 –2017 Team size : 30+ ▪ Successfully managed four projects with the team size of 30+. Planning, tracking & project execution activities to meet on-time releases. ▪ Within 3 months able to take complete ownership of 2 projects and received appreciation from CTO for showcasing automation team capabilities. ▪ Taken self-initiatives towards full automation and able to automate many product validation. This reduced 3-4MM effort to one week. Taken challenges to automate all tools within this financial year. ▪ Implemented many quality processes to improve the product deliveries. ▪ Implemented the concept “doing things first time right” ▪ Trained team using “Mind Movie technique” to improve Turnaround time (TAT) for bug fix and achieved 4x improvements in TAT.

Invention Disclosure

- Updating existing boot loader (update not supported) without JTAG interface (2010E02358 (internal) dated on 09.02.2010). 100% individual contribution to this invention.

PUBLICATIONS

- Co-authored a paper titled "Star Sensor in control loop-A hurdle race" presented in the seminar of "Star sensors for the remote sensing spacecraft-The TES experience" in Dec 2001

UNIVERSITY RELATIONS

- Innovation workshop conducted at SJBIT Engg College BLR.
- Voluntarily training students to improve the results.

PERSONAL ACHIEVEMENTS

- First time success of star sensor with Piggy-back PCB to support new chipset
- First time automation - 4 sensors data acquisition & calibration of Sensor
- Smallest Spectrophotometer (HW & SW)
- Alternate IOP HW PCB board to mitigate the risk
- Identified design issues in IOP HW (USB & >8MB memory access)
- Boot loader update after products sold in market.
- Defect analysis (RCA)
- Mind movie technique to reduce TAT
- Low performance improvement of 30+ employees
- 300 new employees hiring in 2 years

- Established and acquired team ramp-up in new domain (building automation).
- Taken initiatives in people development skills & competency management, able to create trust and confidence with stake holders in short time of one month.
- Responsible to track and forecast the budget.
- Able to achieve within 6 months– full product ownership after 5yrs, Highest level of automation, Improved quality of programming, 200+ ideas created, resolved conflicts within team, High performance work culture development (individual & team), Scrum team forming and sprint reviews.
- Started coaching team towards Agile transformation, High performance work culture.

Team Manager, Siemens, DF-PD : 2014 –2016

Team Size : 100

- People Management responsibilities for 100 team members for competency building, performance management, training, career development
- Responsible for identifying competency gap and providing cost effective trainings for same (internal & external)
- Resolved 50+ conflicts in 3 years, thereby increased the productivity, relationship and health of team member.
- Worked towards improving the performance of 30+ low performance employees.

Talent acquisition : 2014 – 2016 (Additional Responsibilities)

- Single handedly executed to acquire 300 new employees in 2 years.
- Dashboard developed to know the project status through visual representation.
- Improve the effectiveness of recruitment by selecting quality panel members, CV selection, interview process and selection process.

Onsite Delegation Activity:

- Single handedly executed cross boarder employee engagement (onsite delegation activities) for 200 employees in 3 years.

Improved the most complicated and risky delegation process activity by implementing delegation process chart and check list method, which helped to bring down delegation process from 3

- to 4 weeks to 3 to 4 days.

Project Manager – May 2011 – Jan 2014

PE –Frame Application, Siemens, DF-PD

- Successfully managed the team size of 18. Responsible for estimation, scheduling, tracking, risk management and delivery of the project.
- Achieved 400% increase in bug fix (from 500 to 2000 bugs) activity by closely tracking and implementing "Mind movie technique to improve the TAT. This established huge confidence with partner which yielded to get ownership for complex feature development in Bengaluru.
- Resulted in receiving BPSS from 7/10 to 9/10.
- Also implemented Scrum team and sprints.

Team lead and Techno Manager, Siemens, Industry - Oct' 2007 –May 2011

Intelligent/Innovative Operator Panel – Embedded product development.

- Successfully managed the team size of 20. Responsible for estimation, scheduling, tracking, risk management and delivery of project.
- ARM7 processor based HW validation, board bringup, device driver development, GUI development & protocol implementation
- Developed boot loader and ported OS to ARM7 board
- Responsible for porting Adonis Siemens proprietary OS to ARM7 processor.
- Developed device drivers for all peripherals like Keypad, LCD, RS232 & USB stack).
- Developed GUI based application to maneuver GUI application with control keys.
- Acquired and built the team from two members to 20 members.
- Introduced test automation, checklist before releasing code, RCA and rugged testing helped us to reduce defects <5% of total defects in system test.

- 200+ employees cross boarder delegation execution
- Lennox : Acquired full product ownership & achieving automation goals within 6 months (Removed the dependency on both technical & management role from US)
- Saved Rs. 30 million by negotiating with vendor.
- Working towards agile coaching
- Resolved critical issues, in Codec, CAN FD, Power sequence, etc
- Involved in innovative embedded design and development activities.
- Evaluation of Model Based Testing and tool selection and Test driven development
- Coach/Mentor at Cherie Blair Foundation for Women, London, UK.
-

- Achieved zero defects slippage in towards final versions.
- Identified major issues in hardware production, which helped to save the cost by terminating the HW production.
- Provided hands-on support to develop and review different drivers required for the hardware.
- Mitigated risk of actual hardware unavailability and ported the software to actual hardware in record time of 2 days.

Project Lead – May 2006 to Aug 2007

Conversion of existing RS232 protocol systems into wireless system using 2"x2" daughter board. Carrier offshore development, MindTree

- Prepared project proposal, requirement capturing, Design Documents, Test Plans
- Market survey to finalize development system.
- Porting of BSP to NetOS operating system
- Unit Testing, Performance testing on target using development board.
- Technical support for teammates.

Project Lead – Nov 2005 to May 2006

Driver development for Jacinto TI DSP, MindTree

- Porting of McASP driver to DSP-BIOS operating system (supported DMA, interrupt and polling data acquisition)
- Unit Testing, Performance testing on target using TI's DSP prototype board.
- Prepared Design Documents, Test Plans, Test Case Scripts
- Analysis and bug-fixed bugs raised in system test

Technical support for

- teammates for RS232, SPI and I²C drivers.

Scientist, ISRO – 1998 to 2005

Senior Scientist – 1 Year

Advanced star tracker using LEON (open core) processor, ISRO

- Simulations and analysis of LEON processor using modelsim & implemented MIL 1553 module on AMBA bus.
- Ported the new device to sparc compiler.
- Prepared Design Documents, Test Plans, Test Case Scripts & Involved in code reviews
- Technical leader for overall development. This product is part of Chandrayan mission for tracking stars.

Scientist: PCI based MIL-STD-1553B avionics communication board design and GUI based data acquisition, ISRO – 1 year

- Developed PCI based slave 1553 protocol add-on card (PLX-9052 interface).
- Responsible for defining all hardware signals as per satellite interface
- Simulations and analysis of FPGA signals using modelsim for PLX-9052 interface (BU61580 for 1553 interface).
- Verified signals using logic analyzer & oscilloscope.
- Preparation of Harness interface with satellite as per signal standards.
- Technical leader for overall development. This product was successfully used in day today calibration and testing of present star sensors. Around 30 test consoles developed to fulfill present launch requirements. From last 18 years 50+ consoles are in continuous use.
- Developed GUI based real-time data acquisition and command control software on Linux platform
- Developed real-time star tracker graphics display for star calibration.

Designed and Developed software to automate distortion measurement, ISRO – 1 year

- Developed real-time CCD data acquisition and calibration software.
- Reads CCD pixels and converts to digital signals. Three axes turntable is controlled through RS232 communication.
- Algorithm analyze the data and provides the distortion parameters for calibrating image sensor to receive high accuracy information.
- This software is used tilldate & helping to reduce the effort from 15 days to

100 minutes (dark room support).

Automation of all sun sensors calibration & algorithm developed using least square method, ISRO – 2 years

- Developed real-time sensor data acquisition and calibration software.
- Acquires data from sensors for every angle rotation of the turntable in front of sun simulator. Three axes turntable is controlled through RS232 communication.
- Algorithm analysis the data and provides the calibrated parameters to calibrate the sensor.
- This software helped ISRO to increase sensor development in production mode. This software reduced effort from 45 days to 45 minutes.

Design & Developed of CCD based compact spectrophotometer, M.Tech, IISc – ISRO – 1 year

- Developed the compact spectrometer using ISA add-on card.
- Designed and developed CCD based data acquisition interface with diffraction grating.
- Calibrated 2K linear CCD using standard lights.
- Developed hardware, PCB and interface with PC.
- Signals are captured and monitored as spectral graph on screen.
- Received a score of 'S' grade (8.0/8.0) for the project.

Sensors and Satellite integration

- Qualification, Characterization and calibration of Sun and Star sensors: This includes Focusing of the Optics, Bench test, Environmental tests (EMI/EMC and vibration tests), calibration of the sensors, and integration checks with the satellite (electrical and calibration).
- Developed an innovative way of using piggyback boards for star sensor to replace modern components. Able to achieve first successful onboard working star sensor in ISRO history.
- Responsible and Member of launch day preparation. Post launch validation and calibration of sensors as per actual.

Yours Faithfully,

Malagouda
