Contact No: +91 9035529292 | Email: kranti.karan@gmail.com

PROFESSIONAL SUMMARY

Engineering leader with 12+ years of experience building and scaling AI-native platforms across SaaS, FinTech, HealthTech, and enterprise ecosystems. Proven track record leading high-performing engineering teams, driving AI platform strategy, and delivering production-grade systems powered by LLMs, AI Agents, RAG pipelines, and cloud-native infrastructure.

Strong expertise in Python, LangChain, OpenAI, OpenRouter APIs, Hugging Face, distributed systems, microservices, and scalable backend architecture using Node.js, AWS, Kafka, Docker, and Kubernetes. Experienced in engineering leadership, technical roadmap execution, platform modernisation, SDLC optimisation, and scaling engineering organisations in fast-paced startup and product environments.

PROFESSIONAL EXPERIENCE

Engineering Manager – Claimsync.ai (US-based HealthTech Startup)

Dec 2025 – Apr 2026

- Led engineering delivery for an AI-driven healthcare platform focused on clinical decision support and medication optimisation.
- Architected AI workflows using Python, LangChain, OpenAI APIs, embeddings, and RAG-based retrieval systems.
- Built intelligent recommendation systems, workflow automation pipelines, and scalable backend services for healthcare operations.
- Managed cross-functional teams across AI/ML, backend, frontend, and cloud infrastructure functions.
- Improved engineering execution through SDLC optimisation, sprint governance, and structured release management.

Founder – HireNema

June 2025 – Mar 2026

- Built and scaled an AI-native hiring platform using Python, Node.js, React.js, PostgreSQL, AWS, and microservices architecture.
- Developed AI Agents and LLM-powered interview copilots using LangChain, OpenAI, OpenRouter APIs, and Hugging Face models.
- Built RAG pipelines, embedding-based search systems, vector search workflows, and intelligent resume ranking engines.

- Designed scalable REST APIs, asynchronous AI workflows, and workflow automation systems supporting intelligent recruitment operations.
- Implemented Docker-based deployments, CI/CD pipelines, and cloud-native infrastructure on AWS.

Director of Mobile Engineering – Gloify

Oct 2022 – May 2025

- Led engineering delivery across 25+ concurrent SaaS, FinTech, mobility, and enterprise platforms with ownership of architecture, execution, and engineering governance.
- Managed and mentored 20+ engineers across backend, AI/ML, frontend, DevOps, QA, and architecture teams.
- Architected scalable AI-enabled platforms using Python, Node.js, AWS, Kafka, PostgreSQL, and a distributed microservices architecture.
- Introduced AI-driven automation systems, intelligent workflow pipelines, and operational optimisation solutions across enterprise products.
- Improved engineering quality, deployment reliability, and platform scalability through CI/CD standardisation, SDLC optimisation, and cloud-native engineering practices.
- Led production support, incident management, root cause analysis, and operational stability initiatives across distributed systems.
- Collaborated with stakeholders and clients to define technical roadmaps and deliver scalable production-grade AI platforms.

Engineering Manager – Gloify

Feb 2021 – Oct 2022

- Managed end-to-end delivery across multiple AI-enabled backend and platform engineering initiatives.
- Led Agile teams responsible for Python services, Node.js backend systems, APIs, cloud infrastructure, and enterprise applications.
- Designed scalable microservices architecture, backend systems, and workflow automation platforms for SaaS ecosystems.
- Improved API performance, engineering reliability, and platform scalability through backend optimisation and infrastructure modernisation.
- Implemented CI/CD pipelines, engineering governance frameworks, and scalable development standards across teams.

Lead Developer – Moonraft Innovation Labs

Jun 2019 – Jan 2021

- Led engineering implementation for enterprise-scale digital platforms focused on scalability and performance optimisation.

- Developed scalable backend services, reusable APIs, and modular application components supporting enterprise workflows.
- Improved engineering quality through architecture governance, code reviews, mentoring, and development best practices.
- Resolved critical production bottlenecks and improved maintainability across distributed applications.

Senior Software Developer – Goalwise

Sep 2017 – Mar 2019

- Developed scalable fintech applications using React.js, Node.js, JavaScript, and REST APIs.
- Improved application performance, backend integrations, and feature delivery through reusable engineering systems and API-driven workflows.
- Collaborated with product and engineering teams to deliver scalable customer-focused digital experiences

Web Developer – E-centric Consultancy Services

Jul 2016 – Aug 2017

- Built responsive enterprise applications using Angular, JavaScript, REST APIs, HTML5, and CSS3.
- Delivered stable production releases and scalable backend integrations in collaboration with engineering and QA teams.
- Improved frontend performance, engineering quality, and application stability across enterprise projects.

Web Developer – Technomas Solutions

Jul 2014 – Jun 2016

- Developed scalable web applications using Angular, TypeScript, JavaScript, and REST APIs.
- Integrated third-party APIs, backend services, and enterprise workflows into customer-facing applications.
- Improved application maintainability, responsiveness, and frontend performance through optimisation initiatives.

TECHNICAL STACK

AI & LLM Stack:

Python, LangChain, OpenAI APIs, OpenRouter APIs, Hugging Face, AI Agents, RAG Pipelines, Prompt Engineering, Embeddings, Vector Databases, Workflow Automation, LLM Orchestration

Backend & Infrastructure:

Node.js, FastAPI, REST APIs, Microservices Architecture, Distributed Systems, AWS, Kafka, Docker, Kubernetes, CI/CD Pipelines, Event-Driven Architecture

Frontend & Databases:

React.js, AngularJS, JavaScript, TypeScript, PostgreSQL, MongoDB, MySQL

Engineering & Leadership:

Engineering Leadership, Agile Delivery, SDLC Optimisation, Production Support, Incident Resolution, Platform Reliability, Technical Roadmap Execution, System Design

EDUCATION

Degree	Institute	Percentage	Year of Passing
B.Tech (ECE)	GEC, Bhubaneswar	70%	2014

KEY ACHIEVEMENTS

- Built and led one of the highest-performing engineering teams for Lead School, earning client recognition for delivery quality and execution excellence
- Promoted to Director of Engineering at Gloify for consistently improving engineering output, delivery predictability, and technical leadership
- Delivered a 12-month flagship enterprise platform while simultaneously shipping multiple mid-sized projects without compromising quality
- Improved API performance, frontend speed, and infrastructure efficiency through deep architectural optimisation initiatives
- Recognised for building scalable engineering processes that improved execution visibility and reduced delivery bottlenecks
