

Mr. Krunal Pala

Product, Technology and People-First Leader | AI Leadership | CRM Expert | GTM Expert

palakrunaln@gmail.com | +91-94293 33791 | [LinkedIn](#) | Bengaluru, India

Executive Summary

- **17+ years** of engineering leadership building **enterprise platforms, cloud-native solutions, and leading global teams** at top product and consulting companies including Google, Atlassian, Intuit, Publicis Sapient, Conga, and TCS.
- Currently at **Google India** since December 2022 as Senior Engineering Manager, led strategic initiatives such as developing an in-house CLM platform that delivered \$40M in savings and won Google Cloud Impact Award for 2023, powers 80% of Google Cloud deals, and integrates with 13 enterprise systems to accelerate revenue realization.
- Trusted advisor blending deep technology expertise with GTM strategy, customer experience, customer support engineering, SRE, partner enablement, partner technology —consistently aligning engineering execution with business outcomes.
- Proven record of end-to-end product delivery across various industries Technology Cloud companies, FinTech, Insurance, Banking, Retail, Telecom, Aviation, and Government domains — spanning research, roadmap, engineering, and adoption.
- Recognized for servant, empathetic, and visionary leadership with a curiosity-first mindset, driving operational excellence and customer-focused innovation across global teams in India, UK, Mexico, and the US.
- Passionate about building high-performing teams, optimizing processes for ROI, and delivering scalable, high-impact solutions that drive measurable business growth. Scaled the team from 10 to 40+ FTEs recently at Google.

Skills Matrix & Expertise

Category	Skills & Tools
Programming & Frameworks	Java/J2EE, Spring, Hibernate, Python, Node.js, React, Angular, TypeScript
Cloud Technologies	AWS (Lambda, EC2, S3, Step Functions, RDS, Dynamo DB), Serverless Architectures, multi-cloud strategy: AWS, Salesforce
CI/CD & Release Management	Jenkins, GitHub, Bitbucket, Bitbucket pipelines, SFDX CLI, AWS CodePipeline, GitHub Actions, Gearset, Autorabbit,
Salesforce Platform	Architecture & Solutions in Sales cloud, Service cloud, Experience cloud. Apex, LWC, Visualforce, Salesforce DX, CPQ (Conga, Salesforce CPQ), Conga CLM, Expertise in Quote to Cash & Procure to Pay Processes, AppExchange Product development, Unlocked and Unmanaged Package development, Events driven Architectures – CDC, Platform events, and other external tools like Kafka, AWS SQS, SNS. Salesforce Org & Deployment strategies, Data Governance
API, Security, and Integration	RESTful & GraphQL APIs, Kafka, Pub/Sub, OAuth2, JWT, Webhooks, AWS API Gateway, Postman, Full lifecycle architectures - design, security, monitoring, and monetization, Splunk
Data, Pipelines, and Persistence	Oracle, MySQL, PostgreSQL, MongoDB, DynamoDB, AWS Glue, Informatica, Jitterbit
Low Code Platforms	Administration and Customization of Atlassian Suite (Jira, JSM, Confluence), Customization of Slack (Bots, Workflows), Low Code Platforms - Workato, Make.com
AI & Emerging Tech	Generative AI, AI Workflows, LLMs, LLM APIs, Agentic AI, Lovable.
Product Management and Engineering	Shapes product vision with market insights and data-driven decisions, building strong business cases and driving roadmap execution across the full lifecycle. Champions customer-centric design and scalable delivery by leading architecture, budget management, effective milestones and MVP, vendor evaluation, and cross-functional execution with agility, adaptability, and measurable business impact.
Executive Leadership	Leads global engineering teams with focus on innovation, execution, and talent growth, aligning product and technology strategy with business goals, market insights, GTM execution, and scalable delivery. Builds data-driven business cases to optimize processes for ROI, while championing customer-first, agile leadership, and continuous improvement.
Strategic Execution	Drives cross-functional collaboration with conflict resolution, data-driven prioritization, and scalable engineering strategies, while championing process improvements and industry best practices. Operational leader in execution and delivery, skilled in vendor evaluation, budgeting, resource planning, crisis management, OKRs, and MVP launches.
Team Leadership & Culture	Built and scaled high-performing, user-focused engineering teams, with leadership rooted in accountability, ownership, innovation, and quality. Skilled in talent strategy and developer experience — coaching, mentoring, hiring, growth, retention, and driving productivity through exceptional engineering culture.
Domain Expertise	Government Treasury Technology, Taxation and Accounting Technology, Retail Tech, Hi-Tech, Internet and Software Engineering, SaaS, PaaS, Insurance, Banking and financial services, Risk Technology, Legal Tech, Energy and Utilities, Aviation, Sales and Go-To-Market Technology, CRM Technology, Customer Experience and Customer Service Technology, Fraud Tech, Partner Tech

Experience

Career Break September, 2025 to Present

- Freelancing and Consulting SMB.
- Learning new technologies AI and obtaining certification – Certified AI generalist, Google AI Agents course.

Senior Engineering Manager (L6) at Google, December 2022 to August 2025

Key Responsibilities:

- **Directed Software Engineering practices in Go-To-Market domain at Google Cloud, driving end-to-end execution and ownership across** – Marketing, Sales, Legal, Compliance, Finance, Operations, Customer Experience and Support Technology.
- **Directed production support and SRE practices** for high-volume, business-critical systems. Championed Engineering excellence, operational excellence, and continuous process improvements across cross functional teams.
- **Owned product strategy, vision, mission and roadmap** by partnering with Product, Business stakeholders and external vendors, enabled business transformation with customer-centric solutions, future-ready architectures, strategic planning and consulting.
- **Managed Operations across** 10+ cross-functional team including engineering leaders, engineers, product managers, analysts, testers, program managers, and vendor partners in multiple technologies – Cloud, DevOps, Microservices, Salesforce, Java, Angular, Microservices, AI, LLM and agentic AI.
- **Strategic leadership** – Influenced, Defined and executed org wide OKRs for long-term business growth, fostered a high-performance culture and promoting career growth. Capacity planning, vendor governance and budget forecasting.
- Oversaw **hiring, performance management**. Rewards and recognition. Advocated for equity, inclusion, and recognition across engineering functions, Cross trained and developed people for new technologies including AI.

Key Achievements:

- **\$40M cost savings:** Built in-house contracting platform replacing third-party tools; won **Google Cloud Technical Impact Award (2023)**. Technologies – Public APIs of Google Drive and Google Docs, Java, Salesforce, Angular.
- **\$11B+ in deal enablement:** Delivered **17+ product initiatives** supporting 47K+ transactions across global sales with new product onboarding framework. Faster product onboarding times from 1 month to 1 week.
- Created auto-disposition solutions in Customer Support Engineering and agentic bots which leverages existing knowledge base to cater to 20% of the customer requests.
- **\$7M saved via AI:** Introduced LLM-based innovation in contract redlining, improving turnaround time and boosting NPS by **27%** by making transparent redlining for contracts.
- **Production excellence, SRE & observability:** Spearheaded over 10+ process improvements. Established playbooks, runbooks, and dashboards for proactive monitoring and root-cause resolution. Processed **~6.5K deals & 2,500+ tickets/month** with near-zero escalations, creating daily and weekly reporting cadences that empowered architects and leadership with data-driven decision-making.
- **Customer-first innovation:** Delivered innovative redlining customer experience that enhanced deal velocity and user satisfaction.
- **Partner collaboration:** Led vendor strategy, staff augmentation, and governance; enabled seamless delivery across 1P and 3P technologies.
- **Team growth & culture:** Built onboarding processes, mentorship, and leadership development programs. Launched cross-functional recognition programs, drove inclusivity/equitability in engineering, and fostered innovation.

Technical Leader at Atlassian, October 2021 - October 2022

Key Responsibilities:

- **Strategic Planning:** Collaborated with business leaders to define a **3-year technical vision and roadmap**, influencing stakeholder buy-in for key OKRs and strategic trade-offs.
- **Technical & Product Leadership:** Served as the **CRM Platform Owner** for Salesforce and a full-stack owner for public-facing Atlassian sites, overseeing architecture, solution design, and quality standards. Evaluated enterprise tools, influenced Build vs Buy decisions.
- **Team & Vendor Management:** Managed the full talent lifecycle from hiring and onboarding to retention and growth. Oversaw vendor relationships, budget forecasting, and resource pipelines to ensure project success.
- **Process Improvement:** Drove operational and engineering excellence by simplifying intake and delivery processes, and by removing barriers to enable high-velocity collaboration.
- **Crisis Management:** Led cross-functional engineering teams, built from ground up during Ukraine crisis; hired, onboarded, and scaled high-performing teams.
- Oversee **production support, SRE** practices, and operational excellence for customer-facing systems.
- **Engineering and Platform:** Designed solutions and enterprise architectures for scalable, resilient platforms.
- **Team:** Drive hiring, mentoring, performance reviews, and career development across engineering teams.

Achievements & Impact:

- **Crisis Management & Business Continuity:** Led BCP and DR, the team's response to the Ukraine crisis, **rebuilding a 6-member team within 45 days** and **increasing delivery velocity by 20%** within 3 months, surpassing pre-crisis performance.
- **Business Transformation & Growth:** Architected and executed the platform's maturity track to scale with a projected revenue growth from **\$2B to \$5B**, creating a robust foundation for future expansion. Featured continuously 3 times in a row for CIO monthly newsletters for impactful team achievements. (Jun-Aug'22).
- **Strategic Planning:** Co-created 3-year roadmap and OKRs with leadership, enabling long-term resource planning and execution.
- **Operational Efficiency:** Streamlined engineering intake and delivery processes, improved cross-team collaboration, and reduced delivery bottlenecks.
- **Customer Experience:** Enhanced partner and customer-facing portals with modern SaaS architecture, improving performance, reliability, and usability. Led a team of 7 members and collaborated with 8 xFN teams (including Legal, Marketplace, Comms, Analytics, and Privacy) during Atlassian's Partners Portal migration to Cloud, enabling 32K+ B2B Partners across the globe.
- Led a team of 12 members and 3 xFn teams to develop a smart ticketing application to reduce the IRT(initial response time) of the Deal Desk Team that **saved senior business team members 4 hours per day** in work allocation, significantly improving overall team productivity.
- **Platform Innovation:** Pioneered the **unlocked packages architecture** and roadmap for the Salesforce Platform, enhancing modularity and enabling faster feature delivery.
- **Talent & Partnerships:** Built a cross-functional engineering team from the ground up, hiring **10 new team members** and initiating **two new vendor partnerships** to secure specialized talent pools.

Staff Engineer at Intuit, May 2018 - October 2021

Key Responsibilities

- **Technical Leadership:** Defined enterprise-level architecture and solutions, serving as the **Product Owner** for the Salesforce CI/CD platform and guiding teams on engineering best practices.
- **End-to-End Delivery:** Drove multiple business initiatives from ideation to delivery, ensuring successful project execution across DevOps, Security, and call centre optimization.
- **Team Development:** Built and managed high-performing cross-functional engineering teams, overseeing the full talent lifecycle from hiring and mentorship to performance reviews.
- **Stakeholder Management:** Influenced business leaders and stakeholders to define a clear product roadmap, manage dependencies, and make data-driven decisions to meet strategic goals.
- **Vendor & Resource Management:** Conducted resource planning, managed vendor relationships, and identified new partnerships to expand talent pools and increase developer velocity.

Achievements & Impact:

- **Platform Innovation:** Led a **15+ member** cross-functional team to deliver Salesforce unlocked packaging pipelines, saving **\$700K and 10,000 man-hours annually**. Increased deployment velocity from weekly to **multiple times a day**, earning the **Intuit Engineering Excellence Award FY21**
- **Customer Experience Optimization:** Improved screen pop success rates by **57%**, reducing average call handling time from **28 to 20 minutes—\$12M YoY savings**.
- **Security & Trust Leadership:** Led fraud prevention and system abuse initiatives—**protected \$2M in client assets**, avoided reputational risk.
- **Developer Productivity:** Reduced release cycle time from **7 days to 1 hour**; optimized test classes saving **2.15 hours/deployment** and **\$260K YoY** in developer time.
- **Architecture Leadership:** Designed scalable solutions for enterprise needs; influenced product milestones and roadmap decisions.
- **Vendor Strategy:** Initiated 2 new vendor partnerships; evaluated 3 enterprise platforms for cost, quality, and fitment.

Senior Associate Technology L2 at Publicis.Sapient, December 2016 - May 2018

Key Responsibilities & Achievements

- **Team Leadership:** Managed a team of 10 developers and QAs across projects in the government, aviation, and CoE sectors. Mentored and coached the team, growing an account from 2 to 8 members.
- **End-to-End Delivery:** Served as the delivery manager for the **SessionM AppExchange App**, overseeing the entire project from architecture to implementation and managing all client engagement.
- **Strategic Growth:** Led presales and consulting efforts that resulted in significant account growth. Successfully hired **17 out of 50** Salesforce Senior Developers to scale the team.
- **Process Improvement:** Defined new deployment and release strategies for brand-new implementations and instituted code reviews and process improvements to drive operational efficiency.

- **Client & Product Management:** Acted as the product owner for the **Colorado State Umbrella of Projects** on the Salesforce platform. Conducted on-site visits to the U.S. for three weeks to gather requirements and provide consulting for clients.

Earlier roles

Associate Principal Engineer at Conga (Apttus), July 2015 - October 2016

IT Analyst at Tata Consultancy Services, Dec 2007 - July 2015

Education

Dharmsinh Desai University, Nadiad, Gujarat, India.

Bachelor of Engineering - BE, Electronics and Communications Engineering,

- June 2004 - May 2008, First Class with Distinction.

Recognition & Awards

Google Cloud Technical Impact Award (2023) – In-house CLM platform

Intuit Engineering Excellence Award (2021) – CI/CD innovation

Atlassian CIO Spotlight (2022) – Featured in three consecutive CIO newsletters
