Core Competencies

- Rail Operations Management
- Depot operations/Traffic Regulation/OCC operations
- Testing and Commissioning (T&C)
- Traction & Auxiliary power management
- Degraded Mode of Operations
- System design activities
- Signalling and operation design documents

Roles & Responsibilities

- Metro Rail Operations CBTC
- OCC Operations
- ATS, Radio, AMS, PAS, PIDS
- Testing & Commissioning activities
- Emergency Preparedness
- Timetable preparation
- PTW Process
- Fire safety
- Disaster Management

Skills

- ATS
- CBTC Signalling
- SSI
- Disaster Management
- Rollingstock concepts
- Power Supply & Traction
- SCADA, BMS, CCTV
- System Design documents

WORK EXPERIENCE

❖ System Design Lead

Dec 2022 – Till Today

- Company Name : Alstom Transport India Limited
- Owned by : Alstom
- Location : Hyderabad
- Working as Design lead for system activities and specifications like SyRS, SyAD, SyOCD, SyID, TMS, SIG PSD interface and OMPD and headway simulation.
- Responsible for delivery of All design documents in the mean time in coordination with project team.
- As a lead for the system activities, responsible for team workload and review of all team member activities.
- Problem solving and implementing the technical thoughts in the design activities
- Expert in operating modes and principles Document (OMPD) and Train movement specifications(TMS) designing.
- Providing solutions for different projects and documents in operations point of view.
- Providing technical responses for customer or client queries
- Participating in different types of designing activities.
- Supporting operations related concepts for different projects.
- Ensuring on time delivery of system specifications and application data.
- Maintaining Team management activities and team members work load.
- Distributing the work in the team and ensuring the quality of the work and deliveries.
- Providing technical responses for operation related concepts
- Updating the design documents based on the customer requirements.
- Participating in internal reviews of design documents.

Education

- MBA in HR & M
- B. Tech in Electrical & Electronics Engineering

Industry Preferences

- Railway Transportation
- Light Rail
- Metro Rail
- Mass Rapid Transit
- Tram
- Rail Industry
- Designing
- Automation
- Urban Rail transportation

Languages

- Telugu 
- English 
- Hindi 

Software Skills

- Windows operating system and installation

- Proficiency in MS-Office and related tools

- Expert in Designing Technical drawings and tools in MS-Paint

Business Skills

- Ability to work independently or a team
- Strong verbal and communication skills
- Ability to work within extremely tight deadlines.

❖ OCC Deputy Manager/Chief Controller- Metro Rail operations

Oct 2021 – Nov 2022

- Company Name : Hyderabad Metro Rail Limited
- Owned by : Keolis Transport (France), L&T (India)
- Company Profile : Mass Rapid Transit System (MRTS)
- Location : Hyderabad
- Worked as Deputy Manager for overall Metro Rail Operations for **Automatic Train Control Systems** which was the first ever technology used in India.
- Good hands-on experience in **ATS** Application in real time Train operations.
- Currently looking after Total Metro rail Operations like **ATS** and **CBTC** signaling systems along with **SCADA**.
- Well familiar with signaling systems and Power Like **ATS, ATC, CBTC** Signaling and **SCADA**.
- As a Assistant Chief Controller involving in day to day Metro Rail operations and preparing and implementing multiple Timetables for safe Train movement.
- Good experience in handling Incidents and System related failures.
- Well familiar with Signaling and ATS related concepts to overcome the failures during operations in normal and abnormal scenarios.
- Actively participated in the multiple versions of **ATS** testing and validation process by **THALES**.
- Expert in handling Metro Rail Degraded mode operations.
- Actively Participated in **RDSO** and **CMRS** inspections and testing scenarios.
- Witnessed and handled multiple scenarios of **ATS** and **ZC** related testing activities.
- Good experience in handling ATS and signaling related faults and troubleshooting procedures.
- Preparing the **Timetables** for day-to-day metro rail operations.
- Exporting the timetables.
- Transferring the timetables from servers to ATS.
- Preparing the new Standard Operating Procedures (SOP's).
- Verify and validating the SOP's and updating as per the safety standards.
- Manages day to day operation and works with the assistance of OCC Controllers.

Proactiveness

Multitasking

Coordination

Adaptability

❖ OCC Controller / Traffic controller - Metro Rail operations

Jan 2014 – Oct 2021

▪ Keolis Hyderabad Mass Rapid Transit System Pvt Ltd.

- Had multiple competencies like Traction power controller, Traffic controller and BMS controller in OCC.
- Had good experience in ATS handling and revenue operations.
- Done the all degraded activities in both revenue and testing scenarios.
- Implementing the all troubleshooting techniques of signalling and rolling stock during revenue service failures.
- Identifying the unsafe conditions in the **ATS** during testing.
- To conduct regular at all Project stages safety/ Operational audit/ inspections and prepare audit reports
- Responsible for the smooth functioning & Safe Train Movement of all trains running on their respective main line during his shift
- Monitors supervise & Controls **ATS**, **CBTC** Signalling and **SCADA** during normal & abnormal scenarios.
- Manages failures on the train and Signalling system, regulate traffic using relevant procedures and resume normal operation as quickly as practicable.
- Coordinates with maintenance teams (works, track work, power supply, overhead line etc.) and planning cell and monitors the execution of work accordingly.
- Expert in handling Degraded movements like single line, twin single line movement and fall back modes.
- Coordinates with traction power controller and depot controller for all field works (permits to work granted by Chief controller) especially the ones that need power blocks & Train Movement.
- Coordinates with other OCC Controllers, Train Crew Controller, Train Operators & Station Controllers and maintenance staff while managing normal & abnormal scenarios.
- Select and implement timetable as per schedule in consultation with OCC Chief Controller.
- Strictly follows operational procedures and rules.
- Maintains the Traffic Controller logbook.
- Responsible for elaborating reports and analysis on train running.
- Maintains and develops his competency on the system.
- Can take Depot controller and Traction Power controller position, if required.
- Good handling experience in Traction and Auxiliary power supply systems.
- Good hands-on experience on SCADA.
- Monitoring of BMS and CCTV systems.
- Any other works assigned by Chief Controller
- To coordinate mock-drills
- To provide on-job training to new recruits.

❖ Field Engineer - Electrical Project Execution

May 2013 – Dec 2013

- Company Name : Voyants Solutions Pvt Limited
- Company Profile : QA & QC for HV & LV lines
- Location : Warangal
- Field engineer for APRHVDS project owned by APNPDCL
- QA & QC analyzation for APRHVDS project execution of APNPDCL Warangal
- Planning and evaluation of project status and calculation of daily progress And visualize the status as per client requirement.

❖ Site Engineer - Electrical Business Development

Mar 2011 – May 2013

- Company Name : Ramky Infrastructure Limited
- Company Profile : Infrastructure, construction, Electrical Business
- Location : Madhya Pradesh
- Site Engineer for Feeder Separation project of MPMKVVCL.
- HT, LT and Substations survey with GPS and execute the load flow analysis and calculation.
- Preparing planning for new HT and LT line execution as load flow analysis.
- Preparing and analysis of substation and HT and LT line diagrams.
- Proposing of Bay requirements based on load and client requirement.
- Material acquisition and monitoring of project execution.
- Preparation of daily work progress reports.

❖ Site Engineer - Transmission & Distribution lines

Jun 2009 – Feb 2011

- Company Name : Sidhanth electricals & switchgears
- Company Profile : Infrastructure, construction
- Location : Maharashtra

❖ Trainings

- Design of Telecom system - LTMRL For Metro Operations
- Fire Fighting Trainer - Keolis Hyderabad MRTS
- First Aid - Keolis Hyderabad MRTS
- Signalling & Train Control - Communication based train control-Thales
- Rolling stock - Hyundai Rotem
- PA/PIDS - Thales International
- SCADA - Schneider Electric.
- Visual studio - Keolis Hyderabad MRTS

❖ Personal Details

- Date of Birth : 29-05-1988
- Marital Status : Married
- Present Location : Hyderabad, Telangana(Work)
- Permanent Location : Guntur, Andhra Pradesh (Native)
- Nationality : Indian
