LakshmiNarayan S

Director of Engineering

Bosch Global Software Technologies, Bangalore, INDIA

Brief experience summary

- Proven expertise in leading a large engineering & development team in the area of **Embedded Products** – Software-System engineering for eMobility solutions– Automotive domain.
- Successful lead multiple business acquisition, Industrialisation of products(series launch), establishment of offshore development centre's for leading OEMs, defining development and business models, achieved high client satisfaction.
- Possess strong leadership skills, expertise in steering core expert team & complex topics, fostering innovation culture. Handling complete SW V-cycle development a per ASPICE methodologies, achieved multiple end-to-end product development. Mentoring teams in complex design and problem resolution. Deep expertise in software & System engineering – ASPICE methodologies – functional safety software development.
- Development responsibilities in Infotainment Head Unit, ADAS functionalities, MultiFunction-HeadDisplay, Connected Services, Gateway for leading European, Japan and NA OEMs.
- Powertrain units (EMS), VehicleControlUnits, BatteryMgmt and eMobility solution.
- Expertise in BSW for multiple uC, Cybersecurity, FOTA, ASIL B/C/D-Functional Safety (ISO26262) functions, Immobiliser, Predictive Diagnostics, CAN-OBDD, Bootloader, Complex Powerstages/ASICs drivers.

Key Achievements –

- Establishing, setting up and steering a new offshore development centre for a leading OEM in India, Chennai.
- Leading a strategic initiative resulting in business turnaround with a North America OEM.
- Instrumental in leading a complete transfer of OEM account from Bosch Germany to Bosch India.
- Leading an OEM engagement, pre-qualifier, strategic initiatives and eventually establishing an offshore development team (Offshore Development Center-ODC) in India.

Business and Leadership skills –

- Strong interpersonal skills, technical, Collaborative, Solution-oriented mindset, Entrepreneurial and Strategic thinking and decision-making abilities.
- Driving Large customer Acquisitions, Sales support, Customer handling & strategy, Business targets Coaching & mentoring, Diversity mgmt. Business responsibility ~10mUSD.

Areas of Responsibilities in Current role (Director of Engineering)

• Business planning, Customer Acquisition strategy, competitor baselining, Market trends and analysis • Technology roadmap, product strategy, formulating future business areas • Operation and location support • Pre-sales/RFQ support-customer front end team, negotiation and change mgmt • Organisation transformation & Fit-for future initiatives	• Steering end to end development based out of India, product launch support activities • Focus on Delivery Excellence, Stakeholder Satisfaction Index • Achieve cross collaborating across multiple engineering/functional teams for product development/delivery • Priority management and trade-off decision, Product launch Sign Off • Quality assurance, Problem resolution	• Team's Competency management • Team engagement, motivations & aspiration management • Performance management, foster innovation culture • Target for Automation and CI/CD • Diversity, CSR, coaching & mentoring and team building

Work Experience :

❖ Department Head/Technical Director (BGSW):

- **Technical Director – Product Business area [2024 – Current]**
 - Responsible for Fuel Cell Components/Electric Drives for CV segment, Transmission Control unit, EMS Sensor components Platform responsibilities for global OEMs.
- **Department Head [North America region] [2018 – 2023]**

- Responsible for leadership and management of all the functional areas in the Engineering Department. Successfully lead a core development team.
- Functional area – Emobility Solutions, Vehicle Control Unit, Integration Platforms – VCU (uC + Microprocessor based system) for EV.
- **Department Head [China Business region] [2015-2018]**
 - Responsible for leadership and management of all the functional areas in the Engineering Department. Successfully lead a customer engineering team.

Functional Area Summary :

- P&L, Quality assurance, Program Acquisitions, Industrialisations and Launch support. Leading engineering team of 325+ associates.
- Responsible for Organisational transformation, Fit-for-Future initiatives, Delivery excellence, Productivity, Partnership/OEMs engagements.
- Leading cross functional team (Development in various sub-segments of SW, HW, PRMs, Sales) achieving with significant improvement in EBOM and EBIT targets.
- Successfully lead client engagement for EMS across multiple regions including, **North America, China**, Japan, and Europe. Active engagement in new age OEMs for Vehicle Control Units (VCU) – West coast customer in electrification(BEV) and Fuel cell programs (FCCU).
- Attrition management, consistently achieved high satisfaction index, Diversity and OS partnership mgmt
- Active team competency and aspiration management, building a highly competent talent pool.
- **Group/Technical Leader (BGSW): (2012 – 2014)**
 - Successfully lead a Build to Specs program which involved cross-skill and cross collaboration across the organisation for a leading North America OEMs.

❖ Domain Architect/Group Leader (Wipro Technologies – Automotive division) : 2002-2012

- Successfully established and steered Offshore development team of 80+ for a leading European Automotive OEM in the area of System, SW development and validation.
- Played multiple roles/responsibilities including Solution Architect/Onsite/requirements designer @ OEM location, Technical Lead and Delivery Lead.
- Expertise in HMI development for Infotainment. Multifunction Head Unit-Cluster & Telematics gateway systems. Expert knowledge on Advanced Driver Information, Driver profiling, GSP based Navigation.
- Telematics Solution with capabilities Stolen Vehicle tracking, VR systems. advanced Diagnostics, Charge scheduling, Remote locking, Remote start/stop, Security & Safety.
- Technical & Business Proposals, responsible for RFQ response, Strategic initiatives, demonstrators. Provided Pre-sales support for customer acquisition.
- Sound knowledge in ISO and SEI-CMMI model, AUTOSAR, ASPICE and software engineering methodologies and safety concept ISO26262.

SW developer (Robert Bosch Software and services): 1996-2002

Core Technical Competency Summary: -

- Expertise in domains & subsystems of eMobility & Hybrid systems, Fuel Cell and BMS.
- Technical expertise in HMI & functional development for Infotainment & in Telematics systems. Expert knowledge on Advanced Driver Information and GSP based Navigation.
- Technical expertise in various automotive domain like Body electronics, Comforts systems, Transmission Controller and Smart sensors and devices.
- Good knowhow on multiple uC 8/16/32 and ARM architecture, vXWorks and Linux based systems.
- Active member in AUTOSAR consortium. Model Based Development (MDB) using Matlab/Simulink/Rapsody/Target link and code generation for production program.
- Expertise in Functional & System requirements, Software Requirements, Architecting, Designing, Development, Testing and Vehicle validation.

Educational Qualification

Institute	Degree	Course	Year
Sir M Visveswaraya Institute of Technology, Bangalore University, Karnataka, India.	Bachelor of Engineering (First Class)	Electronics & Communications	1995 Batch
