Professional Summary

Electronics and Communication Engineering graduate with strong foundational knowledge in IT systems, troubleshooting, and technical support. Experienced in handling system-level issues through academic and project-based work involving software applications, IoT systems, and real-time monitoring solutions. Skilled in problem-solving, incident analysis, and technical documentation with a strong focus on customer support and service delivery. Seeking an entry-level IT Customer Service Representative role to contribute to IT operations, support end-users, and enhance service reliability in a fast-paced environment.

Technical Skills

- **Languages:** Basics of Python, SQL
- **Operating Systems:** Microsoft windows (desktop usage, system configuration, trouble shooting basics)
- **Tools/Technologies:** MySQL (creating tables, understanding primary keys and basic Relationships, basic queries like SELECT, INSERT, UPDATE)
Arduino IDE
MS Excel (Basic functions, formatting, charts)
IT support & troubleshooting
Incident Identification & resolution
Platforms: ServiceNow
- **Domains:** VLSI Design (basic knowledge of CMOS technology and VLSI design flow)
Machine Learning (Basic knowledge supervised and unsupervised learning concepts)
Internet of Things (IOT) (Basic IOT implementation using Arduino)

Education

- **B. Tech in Electronics and Communication Engineering**
Sri Vasavi Engineering College (2021 – 2025), CGPA: 7.91
- **Intermediate (MPC)**
Sasi Junior College (2019 – 2021), Marks: 944/1000
- **SSC**
Bhashyam EM School (2018 – 2019), GPA: 9.2

Project Experience

Language Translator (Python) — Developed a desktop GUI application using Tkinter and the translate library to perform real-time language translation.

- Designed and built the user interface with Tkinter for ease of use
- Integrated translation engine to support X (you can insert number) languages
- Ensured smooth, responsive real-time translation with low latency
- Added error handling, logging, and input validation to improve robustness

Smart Home Automation (IOT & ML) — Designed and implemented a smart home system using Arduino and sensors, machine learning models, and Python to enable intelligent device control via a mobile interface.

- Integrated environmental and motion sensors using Arduino boards for data collection
- Developed ML models to predict/control home appliance behavior automatically

- Connected system to cloud services to allow mobile control and remote monitoring
Ensured low latency data flow and reliable operation through real-time updates and error handling

Laser Security System with telegram Alert (Embedded System & IOT)-Integration/Developer

- Designed and built a laser-security system using **ESP32 microcontroller**, laser module, and LED indicators
- Integrated a **Telegram bot** to send real-time alerts when the laser beam is interrupted
- Powered the system using standard wiring and ensured stable power delivery
- Programmed logic on the ESP32 to detect beam break, light the LED, and trigger Telegram notification
- Tested and optimized system for reliability, reducing false alerts
- Telegram alert involves network APIs, possible server client interactions

Internships & Industrial Training

- **Machine Learning with Python – Sri Shasha Prayathi Technologies (May–Jun 2023):** Built regression and classification models using Scikit-learn; achieved over 85% prediction accuracy.
- **VLSI Design Intern – 1Stop.ai (Jun–Jul 2023):** Researched CMOS fundamentals; implemented and simulated logic gates using layout tools.
- **C Programming Internship – Learnsmasher (Jul 2023):** Practiced modules on basic and intermediate C programming concepts.
- **Machine Learning with IoT – SpyPro Security Solutions (Jun–Jul 2024):** Developed real time IoT monitoring prototypes enhanced with ML decision-making logic.

Certifications

Cloud Computing (NPTEL), Arduino Programming, VHDL Programming, Embedded Systems fundamentals, Participated in All INDIA NCAT conducted by Naukri

Co-Curricular Activities

- Participated in workshops on Generative AI and Cybersecurity
- Presented innovative projects at technical expos and college tech fests; enhanced public speaking and demo skills before 100+ attendees

Personal Details

- Father's Name: M N V Satya Narayana
- Languages known: English, Telugu
- Natinality: Indian

location: Bangalore
