EXPERIENCE

Deputy Project Lead 01/2024 - Present
Siemens Technology and Service Pvt Ltd Pune, India

Sub Project Manager for Nagpur Metro Phase II 2024 - Present
Nagpur Metro Phase II Pune, India

- End to end project delivery for DCS subsystem for Nagpur Metro phase II
- Designing of Fixed Signalling Network for Station to Station Connectivity
- Designed Metro Rail Signalling Network architecture for OCC, BCC, Depot, and stationlevel connectivity.
- Configured Layer 2 switches for station-level connectivity, ensuring seamless communication between signalling subsystems.
- Planning and survey of Radio for wayside signaling network.
- Created WRU allocation plans in CAD for metro signalling systems.
- Performed radio planning and generated radio communication configuration files for wayside communication.
- Preparation of Link Budget analysis for Wayside Radio for seamless Network connectivity throughout the length of the track
- Migration of Airlink Radio from A8 to A10 version of existing Phase I line and integrating it with new extension reaches
- Preparation of IP Allocation Plans for Fixed Signalling Network and Radio Communication System to ensure structured addressing and redundancy.
- Developed fiber allocation plans for complete network infrastructure, including OCC/BCC and depot connectivity.
- Configured network security elements including FortiGate firewalls (401F, FG81F, 121F) and Cisco Firepower 1120 for DMZ and secure communication.

Bid Management 2024 - Present
Pune, India

- Metro Railway projects, with estimation of cost for the project
 - Managed bids for major projects: Penang LRT3, Mumbai Ahmedabad High-Speed Rail, Western Railway TMS (Churchgate–Surat), and Mumbai Metro Line 5 and Line 6
 - Analyzed tender documents for technical specifications related to DCS subsystems and interfaces.
 - Fulfilling of Requirement Management and Compliance Management for contractual clauses in DOORS for Analyzed Contract.
 - Prepared Bill of Quantities (BoQ) and optimized network elements for cost-effective solutions.
 - Developed network architecture designs for OCC/BCC, depot, and stations to support accurate cost estimation.
 - Design of the DCS Sub system along with preparation of BoQ for the project
- Marquee Bids Won:- Mumbai Ahmedabad High Speed Rail , Mumbai Metro Line 6

SUMMARY

Network Engineer with 10.2 years of experience in Metro Railway Signalling, IP/MPLS, GPON, and Optical Fiber networks. Proven expertise in designing and implementing Layer 2/Layer 3 network architectures, VLAN and trunk configurations, and redundant network solutions for mission-critical railway systems. Skilled in ensuring compliance with IEC and EN50159 standards, optimizing network security, and managing bid processes for large-scale rail projects. Adept at troubleshooting, performance optimization, and delivering reliable, high-availability solutions for transportation networks.

KEY ACHIEVEMENTS

- Improved support efficiency
Reduced hardware support issues by 30% within a year.
- 99.995% Network UpTime
Proactive Network Health Checkup leading to 99.995% of Network Uptime for L2 Access Domain in Jio GigaFiber Project
- Successful bid management
Managed bids worth \$5 million successfully.
- Migration project lead
Led a team to migrate radio links seamlessly.

TRAINING / COURSES

MIT SDE
PDGM in Telecom Management

EXPERIENCE

Technical Lead	01/2022 - 01/2024
Nokia Solutions and Network India Pvt Ltd	Mumbai, India
- Responsible for handling PAN India hardware support issues for clients. - Managed PAN India hardware support issues for clients, ensuring timely resolution and minimal downtime. - Oversaw hardware lifecycle management, including replacements and preventive maintenance. - Actively participated in major outage handling, ensuring rapid restoration and client satisfaction. - Conducted proactive network health checks to identify and mitigate potential risks. - Collaborated with clients and backend teams to develop feasible solutions for complex technical issues. - Prepared MTTR (Mean Time to Repair) and MTTF (Mean Time to Failure) reports for root cause analysis and performance improvement. - Designed and implemented technology-based solutions to meet diverse operational needs. - Managed hardware management and replacements. - Actively involved in major outages for clients. - Conducted proactive network health checks to identify issues that could be troublesome in the future and worked on resolving them. - Coordinated with clients and backend teams to find feasible solutions and ensure timely restoration of outages. - Prepared MTTR and MTTF reports for root cause analysis. - Devised technology-based solutions to meet various operational needs. - Guided staff members through technical challenges and identified areas for improvement.	

Senior NOC Advisor II	01/2021 - 01/2022
Concentrix Daksh India Pvt Ltd	Hyderābād, India
Project: Google Fiber Inc USA - Managed NOC operations for broadband services, ensuring smooth service delivery and minimal downtime for Google Fiber Inc USA. - Handled multi-vendor devices for seamless network interoperability. - Extensive hands-on experience with Nokia ISAM 7360 OLT and Nokia 7362 Mini OLT for GPON deployments. - Worked with Nokia BNG 7750 for subscriber management and traffic control. - Managed and troubleshot Adtran TA500 OLT for fiber access services. - Performed advanced troubleshooting on Juniper routers, including protocol-based peering issues. - Ensured effective resolution of FTTX/GPON-related issues through cross-functional collaboration.	

Deputy Manager	09/2015 - 01/2021
Reliance Jio Infocomm Ltd	Mumbai, India
Project: Jio GigaFiber - Role: L2 FTTx TAC Engineer - Monitored GPON network alarms and created tickets for timely resolution. - Performed basic to advanced troubleshooting on Nokia ISAM 7360 OLTs. - Executed end-to-end configuration of Nokia OLT ISAM 7360 for FTTX deployments. - Applied policies and QoS to enhance customer experience and service quality. - Collaborated with Cisco BNG team for troubleshooting complex GPON/FTTX issues. - Raised AR requests to Nokia for hardware and AMS-related concerns. - Managed software upgrade activities across network elements. - Implemented geo redundancy for OLTs, achieving 99.999% uptime. - Prepared fault management reports for root cause analysis and performance improvement. - Analyzed SDC files using MYCOM for preventive maintenance and network assurance.	

EDUCATION

B. E Electronics and Telecommunication	08/2011 - 06/2015
Mumbai University	Mumbai, India
Higher Secondary Certificate	06/2009 - 06/2011
RCF Junior College	Raigad
Secondary School Certificate	2009
Dr S Radhakrishnan Vidyalaya	Mumbai, India

SKILLS

GPON · Network Designing · MPLS ·
Radio Network Planning and Designing ·
Network Planning ·
Hirschmann MACH104 ·
FortiGate Firewalls · AutoCAD ·
Compliance: IEC, EN50159 · VLAN ·
Trunking · QoS · Redundancy Protocols ·
Optical Fiber · Bid Management · Nokia ·
Metro Rail Signalling ·
Firewall Configuration · Cisco
