

PROFESSIONAL SUMMARY

Detail-oriented and analytically driven Horticulture postgraduate (OGPA: 8.02/10) with specialization in Post-Harvest Management. Experienced in structured agricultural research, data collection, quality analysis, supply chain evaluation, and interpreting experimental outcomes. Seeking to leverage strong quantitative reasoning, field research exposure, and domain expertise in a research analytics role. STET-qualified with demonstrated ability to synthesize complex data into actionable insights.

CORE COMPETENCIES

Data Collection & Field Research	Quality & Quantitative Analysis	Supply Chain & Value Chain Analysis
Post-Harvest Technology & Food Science	Report Writing & Communication	Problem Solving & Multi-tasking

EDUCATION

M.Sc. Horticulture – Post-Harvest Management SKUAST-Kashmir • OGPA: 8.02/10 — consistently strong academic performance across research and applied courses • Thesis research involved systematic data collection, experimental analysis, and interpretation of post-harvest outcomes • Coursework covered research methodology, statistical analysis, quality evaluation, and supply chain modelling	2022 – 2024
B.Sc. (Hons.) Agriculture Integral University, Lucknow • Graduated with 82.2% — ranked among top performers in the cohort • Gained foundational knowledge in agricultural sciences, crop physiology, and field data management	2017 – 2021
Secondary Teacher Eligibility Test (STET) BSEB • Qualified – demonstrates strong command of subject matter and communication ability	2025
Intermediate (12th Science) S.M. Inter College, Bihar • 64% — Science stream	2016
Matriculation (10th) Don Bosco Academy, Bihar • 64%	2014

RESEARCH & FIELD EXPERIENCE

Rural Agricultural Work Experience (RAW) Field Research Programme • Conducted primary data collection across multiple agricultural sites; analysed crop health, yield parameters, and post-harvest indicators • Prepared structured field reports and presented findings to faculty supervisors • Applied observational and survey methods to assess real-world agricultural challenges	6 Months
National Service Scheme (NSS) Community Survey & Field Work • Participated in community-level data survey; gathered and organised socio-agricultural data for review	7 Days

CERTIFICATIONS & SPECIALIZED TRAINING (MSME / SKUAST-KASHMIR)

All certifications awarded by MSME Development Institute / SKUAST-Kashmir unless noted.

• CA Storage & Processing of Horticultural Produce (Advanced ESDP)	• Nanotechnology for Better Agriculture (NAHEP Training)
• Integrated Supply Chain of High Value Crops (Apple & Saffron)	• Processing, Preservation & Marketing of Milk as Functional Food
• Post-Harvest Handling & Preservation of Agricultural Produce	• Entrepreneurship in Vermicomposting – MSME, SKUAST-K
• Quality Analysis of Organic Manures & Composts	• Design, Development & Maintenance of Agricultural Machinery

KEY STRENGTHS FOR RESEARCH ANALYTICS

Structured Thinking: Trained in hypothesis-driven research with emphasis on experimental design and outcome measurement	Analytical Rigour: Applied quality analysis and quantitative evaluation methods across multiple laboratory and field projects
Data Interpretation: Experienced in drawing evidence-based conclusions from multi-variable agricultural datasets	Written Communication: Proficient in preparing detailed research reports, field observations, and analytical summaries
Domain Advantage: Deep agricultural and food science knowledge for agri-research, food industry, or sustainability analytics	Adaptability: Successfully managed academic research, field work, and certification programmes concurrently

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Native), Urdu (Working)	Open to: Research Analyst, Junior Research Officer, Data Analyst (Agri/Food), Market Research roles
Location Preference: Open to relocation across India
