PROFESSIONAL SUMMARY

Aspiring Machine Learning Engineer with practical experience in data analysis, model development, and NLP applications. Proficient in Python, SQL, and ML frameworks, with exposure to Generative AI, LLMs, and tools like LangChain. Strong understanding of EDA, feature engineering, and model evaluation. Eager to contribute to scalable AI solutions and grow in a dynamic, innovation-driven environment.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, HTML, CSS
- **Backend and Frameworks:** FastAPI, Django, Flask, React, REST APIs, Microservices, Numpy, Pandas, Matplotlib, Seaborn, PowerBi
- **AI and ML:** Gemini API, LLM Integration, Semantic Search, Vector Embeddings, AI Agents, Machine Learning, Pytorch, Tensorflow, NLP, Langchain, Prompt Engineer
- **Cloud and Services:** AWS Lambda, AWS Real-Time Streaming, Firebase Authentication, Firestore, Google OAuth, Azure services
- **Databases:** PostgreSQL, pgvector, MySQL, Firestore

EXPERIENCE

Vestalabs August 2025 – Present

Software Engineer | Remote

- Built AI-powered applications using Large Language Models (LLMs), Machine Learning NLP and Gemini API for semantic search and intelligent data retrieval
- Developed and shipped production features for real-time web applications using FastAPI, AWS Lambda, AWS Streaming, and PostgreSQL pgvector; built event-driven backend systems handling high-concurrency user load.
- Integrated LLM-based semantic search using Gemini AI and vector embeddings, multilingual voice search via Sarvam AI and WebSpeech API, Firebase Authentication, Firestore, and push notifications across multiple production applications.
- Designed and implemented RAG-based pipelines using embeddings to improve search accuracy and relevance

Slickbit Technologies May 2025 – August 2025

Software Engineer

- Built a full-stack interview monitoring system using FastAPI with automated SMTP email dispatch; integrated Gemini LLM to auto-generate role-specific questions and score responses, reducing manual shortlisting effort by over 60%.
- Developed an AI-powered interview system using LLM-based question generation and evaluation
- Integrated Gemini API to dynamically generate role-specific interview questions and scoring logic. Built backend services using FastAPI for real-time interaction and sponse processing

Codegnan Institute September 2024 – March 2025

Full Stack Engineering Trainee

- Completed training in Python, REST API development, HTML, CSS, JavaScript, and MySQL. Built a real-time weather reporting application based on user location. Gained hands-on experience in developing and integrating full-stack features.

PROJECTS

LetMeIn-AI – AI-Powered Real Estate Platform | FastAPI, AWS Lambda, AWS Streaming, PostgreSQL pgvector, Firebase, AI Integration

- AI-powered real estate platform with LLM-based semantic search using Gemini embeddings and PostgreSQL pgvector, multilingual voice search via Sarvam AI and WebSpeech API with LLM fallback, and Google OAuth via Firebase. End-to-End ML Project where AI integration for productivity.
- Built a Generative AI-powered system using Gemini LLM for automated property listing generation
- Integrated Gemini LLM API for generating property listings and multilingual embeddings to support search and bulk data processing. Implemented voice-to-text functionality using Web Speech API and integrated Sarvam AI as a fallback for cross-platform speech recognition.

Declano – Real-Time Chess Web Application | FastAPI, AWS Lambda, AWS Streaming, PostgreSQL pgvector, Firebase

- Production real-time chess platform built with FastAPI, event-driven queues, AWS streaming, AWS Lambda for video analytics, LLM semantic search via PostgreSQL pgvector, and Firebase Authentication with real-time chat.
- Built a FastAPI backend integrated with AWS IVS for low-latency live chess streaming and AWS S3 for video storage, enabling scalable real-time streaming workflows.
- Implemented event-driven analytics using AWS Lambda and managed users, stream metadata, and real-time data synchronization with PostgreSQL and Firebase.

AI Interview Coach | FastAPI, React, Gemini API, Firebase Firestore

- Built a FastAPI backend and React frontend where the user enters their job role and Gemini API dynamically generates role-specific interview questions, simulating a real interview session from start to finish.
- Developed an AI-powered interview assistant using LLM for dynamic question generation. Implemented answer evaluation based on relevance, depth, and accuracy. Built real-time feedback and performance tracking system
- Full-stack interview prep platform using FastAPI and React; Gemini API generates role-specific questions, scores answers for relevance and depth, and stores session history in Firebase Firestore with live feedback on the frontend.

EDUCATION

Bachelor of Technology, Computer Science and Engineering (Data Science) Malla Reddy Engineering College, Hyderabad	2020 – 2024
--	--------------------

Intermediate – MPC Narayana Junior College – Hyderabad	2018 - 2020
--	--------------------

SSC Sanskruithi High School – Nalgonda	2018
--	-------------

CERTIFICATIONS

- Microsoft Certification, Introduction to Programming Using Python
- Data Science for Engineers, IIT Madras (NPTEL)
- Microsoft Certification, AZ-900 (Azure Fundamentals)
