

PRADEEP GHORPADE

Global Engineering, Electrification & Digital Transformation Executive

pradeepece2@gmail.com | [+91-7975241082](tel:+91-7975241082) | [linkedin.com/in/pradeep-ghorpade](https://www.linkedin.com/in/pradeep-ghorpade)

EXECUTIVE SUMMARY

Strategic global technology and engineering executive with 21+ years of experience leading large-scale R&D organizations, electrification platforms and driving digital transformation across industrial, global manufacturing and mobility ecosystems. Proven track record of building high-performance global engineering organizations, establishing international competency centers, and managing multi-billion-dollar technology portfolios across North America, Europe, and Asia. Deep expertise in software-defined vehicle (SDV) and E/E architectures, electrification platforms, cross-domain high-performance computing, and enterprise engineering infrastructure modernization. Known for creating digital-first engineering ecosystems and scalable innovation platforms that accelerate product development across ADAS, IVI, embedded systems, and e-mobility domains, while building and inspiring high-performing multicultural global teams.

GLOBAL LEADERSHIP IMPACT

- **Led and scaled global engineering organizations of size 300+**, delivering **50+ complex programs** across mobility, electrification, and embedded systems domains.
- **Managed multi-billion-dollar engineering portfolios**, driving strategic product development and platform delivery for global OEM and Tier-1 ecosystems.
- **Defined SDV and E/E architecture strategies**, delivering scalable **Zonal and Central Compute platforms** across ADAS, IVI, BCM, and eMobility systems.
- **Drove enterprise Digital R&D Transformation**, establishing **Global Engineering & IT Competency Centers** integrating CAD/PLM/CAE, HPC, AI/ML analytics, and cloud platforms.
- **Established global engineering platforms and IT infrastructure ecosystems**, enabling distributed R&D and manufacturing operations across the US, Europe, Canada and Asia
- **Strengthened strategic OEM and Tier-1 partnerships**, driving business growth, multi-million-dollar program delivery, and global engineering excellence.

CORE EXECUTIVE CAPABILITIES

- **Technology Strategy & Platform Architecture:** SDV Strategy & Roadmaps, Zonal & Central Compute Architectures, E/E Architecture (SOA), ADAS, IVI, BCM, Electrification Platforms & Embedded Systems
- **Digital Engineering Transformation:** Enterprise Digital R&D Transformation, Engineering Platforms (CAD/PLM/CAE/Simulation), HPC Integration, AI/ML-Driven Engineering Analytics, Cloud & Data Platforms
- **Global Engineering & GCC Leadership:** Establishing and Scaling Global Capability Centers, Leading Distributed Engineering Organizations, R&D Productivity and Operational Excellence
- **Industrial & Connected Systems:** Industrial IoT, Embedded Systems, Connected Platforms, High-Performance Computing and Digital Infrastructure
- **Business & Growth Leadership:** Strategic Account Management, OEM & Tier-1 Engagement, Business Development Strategy, P&L Ownership, Multi-million-Dollar Program and Product Delivery
- **Product & Program Execution:** Agile Product Development, Global Program Delivery, Cross-Domain Engineering Integration across Mobility, Industrial and Digital Ecosystems
- **Safety, Security & Compliance:** Functional Safety (ISO 26262), Automotive Cybersecurity (ISO/SAE 21434), Engineering Governance and Risk Management
- **Innovation & Future Technologies:** Strategic Technology Roadmaps, AI-enabled Engineering Platforms, Electrification and Next-Generation Mobility Systems

PROFESSIONAL EXPERIENCE

Volvo Group -Electromobility

Oct 2025 – Present | Bangalore, India

Director System Engineering, Project & Quality Management

- Leading multidisciplinary engineering organization of 100+ engineers delivering EV system programs for \$ multi billion portfolio.
- Responsible for system architecture governance, system verification frameworks, and strategic program execution.
- Building corporate electrification strategy into operational engineering roadmaps across global teams.
- Driving 3 competence site pillars with full accountability: core, application, and strategic competence.

Magna International – Corporate R&D

Aug 2022 – Oct 2025 | Bangalore, India

Director of Engineering –SDV – E/E architecture Platforms, Digital R&D

- Built and scaled a 200+ global engineering organization delivering \$1B engineering portfolio.
- Established Global Engineering & IT Competency Center in Bengaluru supporting worldwide R&D and manufacturing operations across US, Canada, Europe, and Asia.
- Defined multi-year E/E architecture and SDV strategy integrating AI-driven R&D analytics, digital twins, and cloud-based simulation environments.
- Oversaw enterprise-scale SDV product development across ADAS, IVI, Powertrain, and Body domains with measurable 30% efficiency improvement.
- Led enterprise digital transformation initiatives integrating engineering platforms across product development, manufacturing engineering, and enterprise IT ecosystems.
- Led technology roadmaps, SoC partnerships, and global vendor alignment ensuring accelerated prototype-to-production delivery.
- Enabled a seamless bridge between IT and R&D through digital collaboration frameworks, CAD/PLM integrations, and engineering data democratization.

Bosch Global Software Technologies

Jul 2018 – Aug 2022 | Bangalore, India

Engineering Group Manager – eMobility & HPC Platforms

- Managed \$500M+ OEM accounts (Renault, Nissan, Toyota) delivering electrification and digital R&D platforms.
- Built and led 300+ member R&D team for EV and HEV propulsion systems.
- Established new CoEs in Bangalore focusing on high-compute electronics, simulation, and digital engineering tools, achieving 25% cost savings.
- Pioneered central compute ECU concepts with AUTOSAR Adaptive integration and digital twin frameworks.
- Directed large-scale R&D digitization projects, driving simulation-based validation and software reuse.
- Delivered ~50 vehicle programs to SOP with continuous productivity gains with full Delivery & Revenue Portfolio Ownership

Bosch Global Software Technologies

Jul 2016 –Jun2018 | Bangalore, India

Program Manager – E-Mobility

- Acquired \$120M+ in programs through OEM (HONDA) engagement and tailored proposals.
- Program Management "womb to tomb" with P&L for E-Mobility segment (ECU/VCU)
- Delivered over 1M ECUs via local-to-local strategy.
- Directed technical workshops, pre-sales engineering, and contract negotiations.
- Program rollout GetSET to enhance powertrain system competency across business units.
- Built and led a 100+ member R&D team for gasoline and hybrid powertrain systems.

Bosch Corporation

Jun 2014 – Jun 2016 | Yokohama, Japan

ECU Product Manager – Powertrain & System Architectures

- Led acquisition of €60M gasoline projects and managed end-to-end delivery.
- Managed delivery of complete ECM product (Software, Hardware, Application and Manufacturing) lines that are released to the customers targeting worldwide market.
- Oversaw RFQ lifecycle, cost negotiations, and technical feasibility.
- Strengthened OEM trust, earning complete product management responsibility.
- Managed ISO 26262 safety lifecycle activities.

Bosch Global Software Technologies

Aug 2011 – Jun 2014 | Bangalore, India

Software Project Manager – Powertrain Systems

- Built first customer engineering team of 20 for Japanese OEM programs (Honda, Nissan, Suzuki)
- Managed end-to-end software delivery for gasoline powertrain systems.
- Expanded service business by establishing CAN release check team in India and Vietnam

Bosch Corporation, Japan

Jul 2009 – Jul 2011 | Yokohama, Japan

Software System Designer – Powertrain Systems

- Designed embedded software for powertrain systems, filing a patent on engine position detection.
- Developed complex device drivers for EPM, ignition, injection & vehicle functions for Global OEMs.
- Functioned as requirement engineering specialist for EPM, ignition, and injection function solutions.

Bosch Global Software Technologies

Nov 2004 – Jun 2009 | Bangalore, India

Senior Software Engineer – Powertrain & Transmission

- Developed functional software components for OEMs (GM, Ford, VW, Suzuki, Tata, Bajaj).
- Created complex device drivers for TATA Nano and other vehicle programs.
- Contributed to EPM, vehicle functions, and CAN modules.

EDUCATION

- PG Program in AI for Leaders – University of Texas (2025)
- MBA – Digital Transformation – IMET (2022)
- B.E. (E&C) – Bangalore Institute of Technology (2004)

PATENTS & CERTIFICATIONS

- Patent: Pre-cranking of engine to determine engine position (2010)
- Project Management Qualification (Equivalent to PMP)
- Senior Leadership Development – Bosch (2020)
- Ethical Leadership – Magna (2023)

LANGUAGES

- English, Hindi, Kannada, Marathi, Telugu, Japanese (N5), German (A1)
