

JOB OBJECTIVE

Passionate Engineer seeking opportunities across industries in engineering and project execution. Committed to applying engineering expertise to foster innovation, advance cutting-edge technologies, and contribute to shaping industry leadership through impactful developments.

EDUCATION

- B.E. in Electronics & Communication Engineering**, Thapar Institute of Engineering and Technology, Patiala, 2023
- Diploma in Electronics & Telecommunication Engineering**, Central Institute of Technology, Kokrajhar, 2020

CERTIFICATIONS

- Certified IPC Specialist (IPC-A-610), 2025
- Web Development, 2021
- MATLAB, 2020

TECHNICAL SKILLS

- Programming & Scripting:** Python, HTML, CSS, JavaScript
- SMT Equipment:** Paste Printer (SPG2), Moulder, AOI(JUTZE), Router (AUROTEK)
- Simulation & Modeling:** MATLAB, Simulink
- PCB & Circuit Design:** Eagle
- Automotive & EV Systems:** Battery Management Systems (BMS)
- Design Tools:** AutoCAD, Figma
- Software:** xcPEP, Jira, Trello, MS Excel

CORE COMPETENCIES

- PCB Automation & Analysis
- BOM Optimization & Cost Analysis
- Process Optimization & Efficiency Improvement
- Root Cause Analysis
- Quality Assurance & Compliance
- Testing, Validation & Calibration
- Solution Architecture & Product Strategy

SOFTSKILLS

- Leadership, Collaborative Teamwork, Effective Communication, Problem Solving, Adaptability

PERSONAL DETAILS

- DOB: 24th August 2001
- Languages: English, Hindi, Assamese, Bengali
- India | Open to Relocation

PROFILE SUMMARY

- Senior Engineering Analyst with 2+ years of experience in the Electronics domain, specializing in PCB automation, process optimization, and cost control.
- Expertise in refining BOM parameters, creating costing calculators, and delivering electronics and electrical projects with a strong emphasis on efficiency and automation.
- Proficient in operating paste printer machines to achieve precise solder paste application, ensuring high-quality PCB manufacturing.
- Skilled in cost analysis and product cost optimization, with expertise in supporting the full product lifecycle from design evaluation and requirements gathering to BOM structuring and feature-level cost planning.
- Showcased success in driving process enhancements, delivering a 20% defect reduction, improved first pass yield from 86% to 94%, and raised customer satisfaction by 20% through proactive quality assurance and effective issue resolution.
- Experienced in applying reflow soldering techniques and thermal profiling to maintain consistent, optimal solder joint quality using “Hella” ovens.

WORK EXPERIENCE

Senior Engineering Analyst, May 2025 - Present
Advanced Structures India, Bengaluru

Key Responsibilities

- Led execution and coordination of end-to-end electronic projects for automotive and electrical appliances, ensuring timely delivery, structured reporting, and alignment with customer and technical requirements.
- Drove project cost optimization initiatives by performing should-cost analysis, refining BOM structures, and enhancing costing tools to support data-driven decision-making.
- Implemented PCB automation solutions and process improvements to increase operational efficiency, improve reporting accuracy, and standardize documentation practices.
- Managed cross-functional coordination with finance, sales, and support teams to ensure smooth project execution, stakeholder alignment, and effective communication across all project stages.
- Facilitated regular customer meetings to present project updates, gather feedback, and ensure delivery aligned with quality and performance expectations.
- Contributed to project lifecycle activities including requirement gathering, design coordination, planning and execution to deliver scalable and cost-effective engineering solutions.

SMT Quality Engineer, August 2023 - April 2025
Neolite ZKW Lightings Pvt. Ltd., Bahadurgarh

Key Responsibilities

- Managed quality aspects of SMT pick-and-place operations for automotive electronic assemblies, ensuring accurate component placement and reducing defects through feeder validation and AOI inspections.
- Developed and maintained SMT process documentation, including SOPs and quality checklists, to ensure consistent production and compliance with automotive quality standards.
- Contributed to New Product Development (NPD) by executing Product Trial Runs (PTR) for new and modified products, ensuring effective process validation and smooth production readiness.
- Performed Root Cause Analysis (RCA) and Failure Mode and Effects Analysis (FMEA) to identify defects, troubleshoot issues, and improve process reliability and product quality.
- Collaborated with cross-functional teams to resolve production issues, improve process efficiency, and ensure alignment with customer and quality requirements.

ACHIEVEMENTS

- Contributed to the designing & implementation of PCB automation process to scan entire boards and components, removing the need for manual microscopic inspection while boosting efficiency and accuracy.
- Optimized the Bill of Materials (BOM) and refined costing calculators in xcPEP, elevating process productivity and resource utilization.
- Delivered process improvements which contributed to 20% defect reduction, 20% rise in customer satisfaction, and enhanced operational efficiency.
