Ruchi Mutneja

Engineering Leader | Leading Customer-Facing Tech Teams @
Splunk | Obsessed with Scalable Systems & Empathetic Leadership
Hyderabad, Telangana, India

Summary

I'm an engineering leader passionate about building customer-centric teams, solving complex technical problems, and driving business impact through technology. With experience across forward deployed engineering, internal platforms, and product integrations, I thrive in high-impact, cross-functional roles.

At Splunk, I lead multiple teams — from FDSE working directly with strategic accounts to platform teams building scalable demo environments that accelerate technical onboarding and sales enablement.

I bring a people-first mindset, strong stakeholder collaboration, and a deep understanding of how tech, product, and go-to-market functions intersect to move the business forward.

Experience

Splunk

Engineering Manager

March 2024 - Present (1 year 5 months)

Hyderabad, Telangana, India

- Leading multiple teams across FDSE (Forward Deployed Software Engineering) and Demo Platform initiatives
- Supporting pre-sales efforts by solving complex technical challenges for strategic customer accounts
- Collaborating with Sales and Developers to design and deliver impactful PoCs and demos
- Directly influencing revenue by enabling faster adoption and customer confidence in Splunk products
- Built and scaled internal demo platforms for Sales Engineering to showcase product capabilities
- Acting as a bridge between customers, product teams, and internal engineering for continuous feedback and improvements

Dr. Reddy's Laboratories
