

NAVEEN KUMAR SHARMA

CXO Leadership – Head Projects (PLM/NPD/FATP/RF)

Current Address: **Gurgaon (NCR) -India** Open to Relocation (**India/Global**)
Phone: **+91-9953195757, 9807585510** Email ID: **naveen7846@yahoo.com**
Passport Available **-(India)**
<https://www.linkedin.com/in/naveen1sharma/>

Career Objective

Highly accomplished Program & project Management Leader in Electronics industry with 18+ years of experience specializing in Data driven cross-functional team leadership for Product (RF/Technology) & Engineering role within OEM/ODM/EMS environments for end-to-end product lifecycle programs. Seeking a Chief Project Management / Executive position in (PLM/RF) where expertise in Product lifecycle management (PLM), particularly in RF/System PCBA and electronic hardware, to achieve strategic Management objectives.

Professional Summary

Customer Project Management & NPI/Development/Prototype

- CFT Project meeting with SMT, Quality, Engineering, NPI, Process and Production Team.
- Customer meeting with Updated and MOM circulation to transition from prototype to scalable high-volume manufacturing
- Gantt chart preparation with material follow-up and End to End Multi-Project Monitoring.
- Follow up with Sales Team for new product NPI and costing.
- BOM updating and punching as per Company part number.
- Documentation of Control Plan, PFMEA, APQP, PPAP audit documents.
- Lead capacity planning, cost optimization, and manufacturing readiness initiatives.
- CAPEX calculation as per Monthly Target Quantity with ROI calculation.
- Capacity calculation and line balancing as per cycle time & UPH.
- Internal and External Audits and NC closure with evidence.
- Coordinate with SMT, FATP, IQC, Store team for smooth execution of NPI trial/Production run.
- Timely escalation for any delay of project/issue with Cost Management.
- Kizen and Continuous Improvement projects to increase productivity.
- Coordinate with Sales and Purchase team for Material Delivery. Deal with Quality Team for 5Y ,8D ,5S and Internal/External audits.

HVM/FATP/Engineering (RF & Radio System) - C-DoT/VVDN/Quectel/Nokia/Intel/Railways

- Installation and RF Calibration GUI Jig & Fixture at FATP line as per Control Plan (Download, RF_CAL, RF_FT, ALL_Pin , FAQM etc..) – ICT/FCT/EOL Testers.
- Achieve and Maintain FPY Yield rate as per customer requirement (>98 %) for PCBA Modules.
- ICT/FCT Fixture development from Third party as per Gerber details.
- Process Capability of Test Station (Cp, Cpk >1.33) for final release to production.
- Model Changeover for different SKU to support production.
- **RF/Test Engineering** Training from **Intel (Malaysia)** for HVM/FATP of Wi-Fi/BT Module.
- Manual testing of RF Circuit & 5G Radio with test Equipment Spectrum Analyser, Network Analyser, Signal Generator... from Keysight, R&S, Litepoint, Oscilloscope etc.
- Calibration of RF/AC/DC Test Equipment and Monitoring.
- Lead Equipment Team Jig/Fixture Maintenance, Planned/Unplanned Downtime with RCA.
- Industrial Engineering for Line/Stage floor Layout for Efficient space utilisation with Infra Team.

Project Leadership and Process Management

Product Management	Prototype Validation	Process Engineering	Cost CAPEX/ROI
Production Readiness	Regulatory Compliance	Internal Auditing	Training & Mentoring
Research & Development	Engineering Management	Project/Program Management	Manufacturing/Operation Management
Product Readiness	Quality Control / Audits	Kaizen / 5S	Cross-Functional/NPI

Work Experience

Oct 2025 - Present

Manager Engineering/NPD

Indigrid Technology Pvt. Ltd(Gurgaon)

Indigrid Technology is an electronics design and manufacturing company specializing in embedded systems, PCB assemblies, and product-level electronic solutions. With capabilities spanning design, prototyping, testing, and high-volume SMT manufacturing, we support OEMs across automotive, industrial, consumer, and appliance segments. Our facilities in Manesar and Goa are equipped for traceable, certified production backed by strong R&D and in-house validation.

Technical Skills

RF Testing
5G / 3GPP 38.141
Wi-Fi/BT, IoT
Spectrum Analysis
Network Analysis
CMW-100/500
5G/4G/3G/2G
PLM(RF/PCBA)
NPI/HVM
QXDM/QCAT (RRC/RLC/PDCP/MAC)

Soft Skills

Ethical Leadership
Problem-Solving
Team Motivation
Conflict Resolution
Adaptability

Core Competencies

Product Engineering
Program Management
Technology Leadership
Wireless Specialization
Cross-Functional Team Leadership

Education

Gulbarga University (Karnataka), India
B.E (Electronics & Communication)
1995 – 1999 / Full Time

XLRI, India
CXO –XLEAD program for Strategy & Leadership Development
02/2025 – 03/2026

10th and 12th from **CBSE Board, Bangalore** (India)
1995

Languages

- English, Hindi (Native), Punjabi

Certifications

- **Appreciation Certificate for KPI** achievement Nokia BTS/RF (Elcoteq India, Bangalore)
- **NPI Engineering/Testing** (BSNL(GR) TEC and Type approval of C-Dot Equipment)
- **TNS/Telecom (Noida), India** Certificate Course in Telecom for Wireless System/Network

Hobbies

Technology
Wireless Trends
Innovation
Gadget Enthusiast

Achievements

- Awarded Appreciation Certificate by Elcoteq India, Bangalore, recognizing contributions for BTS Technology/RF KPI for Nokia.

Jul 2021–Oct 2025

Manager Engineering (RF - Wi-Fi/BT & 5G IoT)

Syrma SGS Technology Ltd (Gurgaon)

Conducted customer meetings and monthly management reviews of key Test Performance Indices (KPIs) including Alpha Rate, First Pass Yield (FPY), Product Yield, and Failure Analysis.

- Project Managed RF testing and engineering activities for Wi-Fi/BT and 5G IoT products, specifically Intel/Qualcomm-based IoT devices.
- Oversee calibration process of RF test equipment sourced from both OEM and external calibration agencies.
- Arranged for the repair and rental of RF Test Equipment through OEM channels and rental agencies.
- Implemented tester correlation methodologies between FT/FOQM by converting XML data to CSV, using Spotfire to monitor and maintain tester health.
- Operated test equipment manually, including Network Analyzers, Spectrum Analyzers, Signal Generators, Power Sensors, Power Meters and Lite Point equipment, for in-depth diagnostics.
- Conducted RF interference and isolation measurements using Spectrum Analyzers to optimize product performance. Lead PCBA debugging activities for 2x2 MIMO Chain A and Chain B Diplexers and surface mount components.

Achievement: Improved tester health monitoring by converting XML to CSV and Spotfire, ensuring reliable testing results. Enhanced RF interference identification through expert use of the spectrum analyzer during product testing.

Sep 2020 - Jul 2021

Technical Lead (NPI/RF)

VVDN Technologies Pvt. Ltd (Gurgaon)

Spearheaded DVT for 5G Power Amplifier 4x4 MIMO gNodeB (STL). Led board bring-up for Band 41 Power Amplifier 40W 4x4 MIMO gNodeB. Oversaw testing of RF S-parameters for Pre, Post Amplifier stages and evaluated RF components like Mixer, Splitter, Diplexer, Filter, Attenuators, Cable, Connectors etc. Integrated with digital boards for unit level testing (3GPP Conformance-Radio Transmitter and Receiver 5G/38.141).

- Led test and New Product Introduction (NPI) activities for Wi-Fi 6 devices, specifically for Rakuten products. Calibration of RF parameters using Litepoint equipment to ensure compliance with industry standards.
- Conducted comprehensive bandwidth testing using IXA tools for TCP/UDP connections in wireless environments.
- Management of end-to-end product validation, including detailed bug reporting using Jira for tracking and resolution for PCBA.
- Performed thorough GUI testing across various operating systems and facilitated global certifications (FCC/CE) for product compliance.

Achievement: Smooth execution of product transfer from Engineering/NPI to Mass Production (HVM). Successfully executed board bring-up for band -41 Power Amplifier of 40W 4x4 MIMO for gNodeB. Also completed the Bandwidth testing of Wi-Fi using IXEA tool for 20MHz/40MHz/80MHz.

Engineering/RF & HVM manufacturing Training from **Intel (OEM)** for Mass Production of Wi-Fi-BT PCBA Modules and Technical Project Management. (**Syrma SGS Technology**)

Certified in NPI Engineering/Testing by BSNL (GR) TEC, demonstrating expertise in Telecom equipment type approval, specifically C-Dot equipment.

Telecom/RF Training & Mentoring

PAN India Trainer for Ericson India for Wireless/RAN Network which includes offline Training for **Airtel/Ericson Technical Staff and SME** at different Telecom Circle.

Rajasthan Circle Trainer for **Jio project at Pratap Technocrats** for RAN/RF, Optical, IP and Infra SME. Training includes Jio Centers and Cell site visit.

Engineer/Fresher OJT on-site Training at College for Wireless System and RAN/Mobile/Cellular Network at Pune and Turapati.

In house Training of RF/Testing Engineering to Production, Quality, ESG, Repair, HR, Project Management teams which includes Wireless concepts and RF T&M Equipment operation. (**Syrma SGS Technology**)

Technical Trainer for VHF/UHF, Repeater, SCRR, RoIP & Trunking Radio System to **Defense, Police & Railway (Govt.)** with Tender. Worked with DCPW, WPC, RDSO and TEC.

Career Timeline
