- shreyasmodi9999@gmail.com
- shreyasmodi9999

EDUCATION

- MTECH CSE, NIRMA UNIVERSITY
- CGPA 8.14/10 - 2013 - 2015
- MSC IT, GUJARAT UNIVERSITY
- 76.76% - 2011 - 2013
- BSC IT, GUJARAT UNIVERSITY
- 76.48% - 2008 - 2011

SKILLS

ENGINEERING LEADERSHIP

- System Design, Scalability, Performance Optimisation
- Code Reviews, Mentorship, Architecture Ownership

CORE TECHNOLOGIES

- Java, TypeScript, JavaScript
- Apache Kafka, Apache Spark
- Cassandra, PostgreSQL, SQL
- REST APIs, Distributed Systems, Multithreading

FRONTEND

- React.js, Next.js

DEVOPS & TOOLING

- Git, Bitbucket, Jenkins, SonarQube, JMeter
- IntelliJ IDEA, VS Code

PROFILE

Senior Engineering Leader with 12+ years of experience delivering global, revenue-critical and regulator-facing platforms across payments and investment banking. Proven leader of large, multi-region engineering organisations, owning architecture, delivery, and compliance for systems operating at massive scale. Currently leading a greenfield credit card and payments programme across ANZ and EU, projected at ~\$8.5M annual revenue.

WORK EXPERIENCE (12+ YEARS)

Engineering Manager (Staff software engineer)

Nov'23 - Present | Pune, India

- Leading engineering for a bp credit card and payments platform for bp's Fleet division, supporting ANZ and EU markets, with end-to-end ownership of architecture, delivery, and technical quality.
- Managing a globally distributed organisation of 7 Tech Leads and ~52 engineers, driving execution across multiple teams and time zones.
- Accountable for regulatory and compliance readiness of a revenue-critical credit card & payments platform, delivering a solution projected to generate ~\$8.5M in annual revenue with continued growth.
- Partnering with senior leadership and stakeholders to guide phased rollouts, manage delivery risk, and balance technical trade-offs across complex payment workflows.
- Technology:** Java, NextJs, Kafka, AWS, Postgres, Redis

Vice President - Engineering

Mar'19 - Nov'23 | Bangalore, India

- Headed GSMaps Core Engineering, leading ~14 engineers to build a global, mission-critical SLA/SLO monitoring platform protecting investment banking operations from SEC and regulatory penalties.
- Owned architecture and end-to-end delivery of a real-time compliance platform processing ~30k transactions every 5 seconds across ~1T graph nodes.
- Provided technical and people leadership, driving scalability, reliability, and engineering standards for high-volume, regulator-facing systems.
- Technology:** Java, Apache Spark, Kafka, Cassandra, JanusGraph, REST APIs

Software Engineer

Dec'17 - Feb'19 | Bangalore, India

- Built portfolio optimisation and taxation-aware financial services supporting multi-jurisdiction compliance in an investment platform.
- Developed high-performance, multithreaded Java services and REST APIs, improving system reliability and throughput.
- Technology:** Java, Spring Boot, PostgreSQL

Application Engineer

June'15 - June'17 | Gandhinagar, India

- Worked on Oracle HCM and Retail platforms, collaborating with central architecture and US-based teams to deliver enterprise-grade features.
- Built and enhanced Java-based backend components and REST services, focusing on performance, correctness, and scalability.
- Technology:** Java, Oracle ADF, REST, SQL

Application Engineer - Intern

June'14 - June'15 | Bangalore, India

- Developed components for a hybrid framework used in Oracle's Retail division, gaining early exposure to enterprise-scale systems.
