I-1105, Bestech Park View, Ananda, Sector 81, Gurgaon

Seasoned Power Electronics Leader with 20+ years of experience in designing and delivering advanced industrial and consumer power electronics systems including high-efficiency AC-DC converters, DC-DC converters, and inverters. Proven track record of leading multidisciplinary teams, managing global projects, and driving innovation in high-performance and cost-effective power conversion systems solutions. Adept at aligning engineering strategies with commercial goals and fostering a culture of technical excellence. Deep understanding of ISO 26262, IEC 61800, and functional safety standards with strong stakeholder engagement across R&D, production, and quality teams.

CORE COMPETENCIES

- Leadership & Team Development
- Functional Safety & Compliance (ISO 26262, IEC 61800)
- Project & Program Management
- Modern semiconductor Technology Integration
- Strategic Vendor & Cost Management
- Industrial and consumer power electronics Powertrain Systems (OBC, DC-DC, Inverters)
- Simulation Tools (MATLAB/Simulink, Altium, Cadence)
- Innovation & Research Initiatives
- Stakeholder & Client Engagement

SELECT ACHIEVEMENTS

- Awarded A Philips Acceleration award.
- Best leadership award for delivering cost leadership
- Best Collaboration award for Astra Range of Downlighters
- Best Innovation award for Float Batten Concept
- Best Innovation award for Razor downlighter Design and Development
- Customer First Award for Development of Astraline Led Battens
- Stakeholder & Client Engagement

PATENT

- Patent for Astra Sleek (Glass batten)
- Patent for Edge Glow (Downlighter)

PROFESSIONAL EXPERIENCE

Senior Principal Component Engineer

Agilent Technologies

Gurugram

Oct 2020 – Nov 2025

- Developed and implemented strategies for the selection, processing, and testing of a wide range of Electronics and Electro-Mechanical Components.
- Created commodity roadmaps by conducting in-depth research across various component categories.
- Managed the process for setting up new parts based on predefined design standards for each component category.
- Suggested alternate parts from internal databases to support design optimization and part reuse.
- Maintained part database count and actively ran the part reuse program to promote standardization and reduce redundancy.

Manager

Kohler India Corporation Pvt. Ltd.

Gurugram

June 2019 – June 2020

- Managed end-to-end product lifecycle of power modules for industrial and consumer power electronics.
- Directed multi-project execution, ensuring time and budget alignment.
- Acted as primary technical liaison in customer presentations and discussions. Reduced failure rates by 40% through root-cause analysis and reliability improvements.

Manager

Philips India Private Limited

Noida

Dec 2010 – June 2019

- Led Product Development & Vendor Management: Oversaw full-cycle project management for electronics product development, coordinated with vendors and outsourced manufacturing partners, and negotiated BOM costing and quality parameters to ensure timely and cost-effective delivery.
- Established High-Performance Lab & Team: Set up a state-of-the-art electronics lab with a multi-crore INR budget and built a 5-member team that delivered design-ready prototypes within 2 months through accelerated training and onboarding.
- Streamlined Prototyping & Inventory Control: Reduced hardware development time by 50% by streamlining the prototyping process and optimized inventory of long lead-time components to ensure uninterrupted product development.
- Innovated Power Conversion Solutions: Designed and validated AC-DC and DC-DC converter modules, introduced dimmable driver platforms (a first in the Indian market), and led technical project management for multiple successful product lines.
- Improved Quality & Organizational Capability: Enhanced product quality in coordination with ODMs and strengthened team capabilities through structured training, market feedback integration, and continuous knowledge-sharing on evolving standards and technologies.

Design Engineer

Osram India Private Limited

Gurgaon

Sep 2003 – Dec 2010

- Planned and executed projects from prototyping to production, coordinating with multiple stakeholders and ensuring compliance with internal guidelines and regulatory standards, including FCC consumer requirements (USA).
- Improved technical features of key components through benchmarking and root cause analysis, enhancing the marketability of several product lines.

- Selected for and successfully completed a specialized training program at an Osram manufacturing facility in Germany.

Prior Experience

Lecturer, Dehradun Institute of Technology, Dehradun, March 2002 – June 2003

Lecturer, National Institute of Aeronautical Engineering, Dehradun, September 1998 – June 2000

Lecturer, Indira Gandhi Memorial Institute of Engineering & Technology, Dehradun, August 1998 – December 1998

EDUCTAION

- **Master of Technology (M. Tech.) - Power Electronics and Drives**, IIT Kharagpur, 2002 (8.2 CGPA)
- **Bachelor of Technology (B. Tech.) - Electrical Engineering**, M. S. University of Baroda, 1997
- Qualified **GATE** [Graduate Aptitude Test in Engineering] Percentile – 98.38%, All India Rank – 99
- **Online Courses, NPTEL: IIT Kharagpur**: Microprocessor and Microcontroller, 2018 | Introduction to Internet of Things, 2017 | Introduction to Embedded System Design, 2023 | Introduction to Industry 4.0 and Industrial Internet of Things, 2019 |
- **Professional Development**: Solar Professionals Course, National Institute of Solar Energy, Gurgaon, 2014 | Lean Basics | Emotional Intelligence | High Impact Presentation | PMP
