

Pramod Ramtekkar

9768814785 | pramod.ramtekkar25@gmail.com | www.linkedin.com/in/pramod-ramtekkar-73049b6

PROFILE

Innovative and results-oriented professional with 24 years of extensive experience in electronic design engineering, embedded systems, and product development. Proven ability to lead the complete product life cycle from concept to market, with a strong focus on hardware design, cross-functional team leadership, and program management.

SKILLS

Product & Program Management:

- Full Product Life-Cycle Management
- Project & Program Management
- Engineering Change Management
- Cost & Vendor Management
- Agile Methodologies
- Scrum Management
- Tools: Asana Scrum, MS-Project, Git, Jira (Basic), and SVN.
- Problem solving skills
- Coordination with CFT members
- Effective utilization of resources

Hardware Engineering:

- Analog, Digital, and Mixed-Signal Design
- EMI, EMC, and ESD Protection
- Signal Integrity
- DFMEA, DFM and Manufacturing Process
- Prototyping & Testing
- Certifications: CE, ATEX, EMI/EMC
- Controller & FPGA: ARM Cortex-M4,M3,M23,ARM9,8051,8031, Nxp, Microchip, Xilinx, Cypress, ST, Renesas.
- Single Board Computer: Toradex, Kontron, friendly-ARM, Raspberry PI.
- Memory: DRAM, SRAM, DDR, NAND Flash, NOR Flash, and EEPROM.
- Communication Protocols, I2C, RS485, RS422, CAN, USB, QSPI, Ethernet.
- Wireless Module: GPRS, GSM, GPS, Lorawan, Bluetooth.
- EDA Tool: Altium, Xpedition, Proteus, Ltspice, Protel99Se, OrCAD.
- Simulation Tool: LTspice, Tina, Multisim, Pspice, Altium.
- Testing and Measurement Tools: MSO, DSO, LA, Debugger, Multimeter, Current Probe, JTAG, Scopemeter.
- Display Interfaces: LCDs, Graphic LCDs, TFTs.

Embedded Systems & Software:

- Embedded Software Development
- Firmware Development
- Embedded Tool: Keil, Eclipse, Keil, AVR Studio, Mikroelektronika, HEW-Renesas, PSOC, STM cube, IAR, E2studio.
- Languages: Embedded C, Python, Assembly
- OS: Windows, Linux.

Documentation Tools:

- Microsoft Word, Excel, Power Point.

EXPERIENCE

Metal Power Analytical Pvt. Ltd. Mumbai

Manager (Research & Development) (Electronics)

Mumbai, India

Mar 2022 – Present

- High-Level (HLD) and Low-Level Design (LLD) documentation.
- Participated in end-to-end development: planning to deployment.
- Embedded Architecture develop and design of product
- Led hardware and embedded teams effectively for embedded & electronics design.
- Defined and executed NPD/NPI technical specifications.
- Designed robust and efficient hardware & embedded software for systems.
- Reported project status to senior general management.
- Resolved legacy product issues, boosting performance.
- Reviewed and improved system designs using best practices.
- Led cross-functional team (CFT) coordination and meetings.
- Ensured timely, cost-effective project execution.
- Designed hardware schematics and PCB layouts.
- Managed component selection and vendor coordination.
- Provided firmware development guidance and support.
- Solved technical issues with fast, effective solutions.
- Involvement in recruitment process.
- Hardware Reliability management.
- System Architecture Design.
- Manage ECN/ECR processes and maintain version control for hardware.

Projects:

- Mobile Meta vision MX/Mx+ Metal Optical Emission Spectrometer.
- Design Development of High current power source.
- 10008x Meta vision Metal Optical Emission Spectrometer.
- 1008i3 Meta vision Metal Optical Emission Spectrometer.
- Designed and developed Peltier Control cards.
- Meta vision-Rx Lubricant Optical Emission Spectrometer High Power Source.
- Designed UV Slave Card for Optical Emission Spectrometer.
- Graphical User HMI TFT Development.
- Toshiba Battery BMS CAN Communication interface with software.
- Lora Wan Transmitter and receiver Module Design

Jay Instruments & System Pvt. Ltd.

Manager (Design & Development) (Electronics & Embedded)

Navi Mumbai, India

Jan 2015 – Jan 2021

- Led project planning and guided teams to successful outcomes.
- Designed hardware schematics & up to 8-layer PCB layouts of multiple products.
- Designed modular product.
- Resolved legacy product issues, boosting reliability.
- Managed vendor relationships and procurement operations.
- Reviewed and improved system designs per industry best practices.
- Ensured cross-team coordination and on-time, on-budget delivery.
- Selected components aligned with circuit requirements.
- Visited Hubali production unit to resolve product issues.
- Assisted in recruitment to fulfil project resource needs.
- Created system-level documentation for project records.
- Reported project status regularly to the Vice President.

- Contributed to robust, scalable system architecture.
- Authored detailed test cases for product validation.
- Power management and cost management.
- Involvement in recruitment process

Projects:

- FW1016 Industrial Weighing scale System.
- FW6000 Linux OS based industrial weighing Scale System based on SBC.
- FW4005 High End Industrial Weighing scale based on cortex M4 Controller with TFT interface.
- FW1015 optimized industrial weighing scale.
- 20 Key Capacitive Touch for Flameproof Area for Industrial Weighing Scale.
- 20 key Capacitive touch for Penko indicator interface controller.
- 6 key Capacitive Touch Hardware and software development.

ESCON Elevator Pvt. Ltd.

Navi Mumbai, India

Sr.Embedded System Engineer (Electronics & Embedded)

Feb 2014 – Dec 2014

- Designed hardware for elevator systems, including schematics and up to 4-layer PCB layouts.
- Led firmware development to optimize elevator performance and reliability.
- Served as Team Lead, mentoring teams and driving project success.

Projects:

- ES300VF Elevator Main Controller Elevator Door Drive Card.
- Elevator Floor Display on Graphic LCD.
- ES300VF-Main Controller, Car Operating Panel, Landing Operating panel, Add on Card
- Door Drive Operation.

Edex Technology Pvt. Ltd.

Navi Mumbai, India

Sr.Embedded System Engineer (Electronics & Embedded)

Jul 2009 – Dec 2013

- Designed Linux-based board hardware: schematics & up to 6-layer PCB layout.
- Ported Linux OS and ensured successful system boot.
- Developed device drivers for processors and MCUs.
- Managed vendor development and streamlined procurement.
- Led teams and projects to successful outcomes.
- Project Planning and successful developed various project.

Projects:

- Design and developed GAS Chromatography Instrument
- Biometric System design based on Linux OS ARM processor.
- Embedded Webserver based on Cortex M3 based on FreeRTOS.
- JTAG for ARM Cortex

AE Telelink Systems Ltd.

Nagpur, India

Software Engineer (Electronics & Embedded)

Nov 2006 – May 2009

- Design and Developed electronics, embedded firmware and applications.
- Designed schematics and PCBs for reliable electronic systems.
- Developed various product for Indian Railways

- Tested products for compliance with RDSO standards.

Projects:

- Master Clock with GPS Synchronization for Indian Railway
- GPS based Synchronizing Display Platform Clock for Indian Railway
- GPS based Synchronization office clock for Indian Railway

Global System

Bhilai, India

System Software Engineer (Electronics & Embedded)

Nov 2004 – Aug 2006

- Designed schematics and PCBs for reliable electronic systems.
- Performed product testing to ensure quality and performance.
- Developed and deployed embedded software for products.

Projects:

- Master Clock with GPS Synchronization for Indian Railway
- GPS based Synchronizing Display Platform Clock for Indian Railway

Benare Electronics

Nagpur, India

System Engineer (Electronics)

Aug 2003 – Oct 2004

- Designed hardware for embedded systems.
- Created schematics and PCB layouts.
- Developed and tested embedded software.

Projects:

- Designed and developed Paging and Talk Back System
- Design and developed Large matrix LED display boards

Benare Electronics

Nagpur, India

Design Engineer (Electronics)

Aug 1998 – Jan 2000

- Performed hardware design, testing and validation.
- Designed 2-layer PCBs using Protel 99SE.
- Board bring-up and hardware validation
- Handled product installation and verification.

EDUCATION

- **Visveswaraya National Institute of Technology (VNIT)**
Master of Technology in Electronics Engineering 2003
- **Manohar Bhai Patel Institute of Engineering & Technologies**
Bachelor of Engineering in Electronics Engineering 1999

Nagpur, India

Gondia India

LANGUAGE

- *English, Hindi, Marathi*

ACHIEVEMENT

- Achieved CE certification for multiple products, expanding market access in Europe.
- Resolved legacy product issues, strengthening customer relationships.

- Reduced EMI and fixed system hanging issues in old MPA instruments.
- Developed enhanced-feature systems at Jay Instruments Systems Pvt. Ltd.
- Designed the first Linux-based board at Edex Technology Pvt. Ltd
- Arranged various training programs for the team, production team and service team.

ADDRESS

*504 Mahakali Residency
Plot No 114 Sector 5
Ulwe Node Navi Mumbai
Maharashtra 410206*

Date:

Place: Navi Mumbai
