Add-Goverdhan Colony, Gola Ka Mandir, Gwalior, M.P, Pin No-474005,

Mob-+919039647973, +919425104619, +919340440807

E-Mail: nishant_24aug@rediffmail.com, Landline Number-07514034966

Objective

Aspiring to associate with the organization that offers me opportunities to grow both as an individual and professional. Looking forward for MEP and OEM Services, where I can enhance my abilities and share my skills with others so that I will be a part of success in that organization

Work Experience:

Total Experience: 15.6 Years

Currently Working in Systra india as a Head Project Management System and Design in Projects and Services

Technical Skills: PMP®, API, EIT, NDT, OSHA, IRI, Srum Master, Agile, JIRA, ACC, Modbus, Backnet, C++, Java, SAP, Niagra, MEPF Systems-Electrical, ELV, PHE, Fire, HVAC, BMS, Solar.

Job Responsibilities:

- Managing all MEP activities for all Technical Services at site including planning, scheduling and monitoring the workflow.
- Verified the Preliminary Design, Matrix, GFC, Shop drawings along with final phase of As built for MEP related work.
- Make sure the Design needs to be Aesthetical, robust considering the other Services such as Civil and Architecture interfacing Activities during execution time.
- Providing approval to the Client and contractor related to MAR, FAT and Design related work and key progress of project day-to-day Activities on ACC platform with complete revisions of records and track proven with AI tools.

Curriculum-Vitae

- Dynamic and results-driven Solar Energy Professional with over 16years of experience in designing, executing, and managing commercial solar PV projects across India. Proven track record of delivering high-efficiency systems from concept to commissioning, with expertise in feasibility analysis, system design, regulatory compliance, and stakeholder coordination. Adept at optimizing project costs, ensuring timely execution, and driving sustainability goals for clients through innovative energy solutions. Passionate about renewable energy and committed to accelerating India's clean energy transition through scalable, data-driven solar strategies.
- Designed rooftop and ground-mounted solar PV systems.
- Protocols: MODBUS RTU, MODBUS TCP/IP
- Industrial Communication: MODBUS integration with PLCs, HMIs, and SCADA systems
- Developed and implemented MODBUS RTU communication between PLC and HMI for real-time data acquisition
- Integrated MODBUS TCP/IP protocol in SCADA system for remote monitoring of industrial processes
- Troubleshoot MODBUS network issues, improving system reliability by 30%.
- Designed and deployed MODBUS-based data acquisition system for energy meters
- Enabled seamless communication between devices using MODBUS TCP/IP over Ethernet
- Designed and implemented BACnet-based communication between HVAC systems, lighting controls, and access control devices across commercial buildings.
- Integrated BACnet/IP and BACnet MS/TP protocols with third-party devices for seamless interoperability.
- Configured and monitored BACnet objects (analog, binary, multi-state) for real-time data acquisition and control.
- Troubleshoot BACnet network issues including device discovery failures, communication timeouts, and object mismatches.
- Worked with BMS platforms like Tridium Niagara, Honeywell EBI, and Siemens Design for BACnet device integration.
- Developed custom BACnet device profiles and maintained EDE (Engineering Data Exchange) files for system documentation.
- Ensured secure BACnet communication by implementing BBMDs and VLAN segmentation in large-scale deployments.
- Protocols: BACnet/IP, BACnet MS/TP
- Tools: Wireshark (BACnet packet analysis), YABE (Yet Another BACnet Explorer), BTL-certified devices
- Platforms: Tridium Niagara, Johnson Controls Metasys, Schneider Electric EcoStruxure
- Standards: ASHRAE 135, BTL compliance
- Logged and tracked defects using JIRA, collaborating with developers to resolve issues efficiently.
- Executed test scripts across multiple environments (Dev, QA, UAT) and validated results against expected outcomes.
- Designed and developed automated test scripts using Selenium WebDriver with Java,covering functional, regression, and smoke testing.

Curriculum-Vitae

- Generated detailed test reports using Extent Reports and Allure, improving visibility of test results for stakeholders.
- Supervised installation teams to ensure adherence to safety and quality standards.
- Coordinated with vendors and contractors for timely delivery and execution.
- Performed system testing and grid synchronization in compliance with DISCOM regulations.
- Conducted site surveys and solar potential assessments using tools like PVsyst and Helioscope.
- Managed project budgets ranging from ₹50 lakhs to ₹1400 crores.
- Negotiated vendor contracts and optimized procurement strategies to reduce costs.
- Evaluated ROI, payback period, and energy yield for commercial solar installations.
- Selected appropriate modules, inverters, and mounting structures based on site conditions and client requirements.
- Acted as primary point of contact between clients, EPC contractors, and regulatory bodies
- Delivered client presentations and technical walkthroughs to explain system performance.
- BIM, AutoCAD, Autodesk, Cadmate and Revit to validate the Model is free from clash detections and with no infringements in the routing for MEP services.
- Execution of MEP related work for the HVAC, Electrical, Fire Systems, Plumbing and BMS for High side and as well as low side.

Curriculum-Vitae

- Ensuring successful project Handovers & project completion as per agreed CMRS for planned or unplanned project related activities in region.
- Expansion of Network as per the Project requirement and handle the Installation Service partners.
- Monitoring the Project partners for SLA adherence. (Cost/ Quality/ Response/ MSL)
- Monitor and resolve customer pending issues by tracking project wise snags/jobs on routine basis.
- Handling Project commissioning for Refrigeration rack sites with close coordination with Application team.
- Perform scheduled partner's evaluation with respect to compliances etc. Identify NC parameters and skill up these partners to meet our & customer's guidelines.
- Preparing and maintaining MIS reports for the Project department for the entire region.
- Maintaining adequate advance spare parts inventory as per the installation population of equipment specially for Imported ones as per project location.
- Coordination with commercial team and customers for timely collection of scope PO's, ensuring timely and correct invoices in collaboration with Sales & commercial for project related jobs.
- Train project Engineers and vendors as per standards & product/Project requirements.
- Experience in Low side Project work & BOQ understanding as per application guidelines
- Coordination with the clients for their requirements as per NBC codes and procedures with check and also review the design and drawings layout and make sure the availability for the readiness of MEP related work.
- Provide suggestions for optimization of processes with maintaining quality trademark standards.
- Follow the DBR review system for the complete reference of the design analysis and make use for the practical site availability and to control and regulate the flaws and snags as per pre checks methodological survey and inspection.
- Errection, installation and commissioning of TFA/FCU with cassette units as well as for high side VRV/VRF installation and cooling tower.
- Liasioning with the Govt Officials to meet their demands from time-to-time basis related to sub heads like Electricals, Utilities Fire NOC and HVAC.
- Make the report for errection, commissioning and installation for the services related to HVAC, Fire, Plumbing and Electricals.
- Coordination with the vendors for the supply and installation with proper B-checks Testing and Commissioning.
- Coordination with design team, contractors & vendors for all MEP works.
- Manage MEP services associated with packages, involved in techno-commercial discussions & negotiations with vendors.
- Supervision and inspection of all Electrical installation work at site with
- Commissioning and installation of HVAC/Chiller Plant with operational Activities.

Curriculum-Vitae

- WTP Plant regulates chemical dosing to condenser unit for maintenance purpose.
- Installation, commissioning and erection of TFA/FCU and cassette unit for Low side and as well as for High side to chiller Plant.
- Fire Fighting Pumps for hydrant, sprinkler and jockey installation with building side circulation for booster pumps at terrace.
- Fire shaft charged line inspection on daily basis for sprinkler and jockey pumps.
- Transformer testing with checking of oil filtration and BDV test for proper maintenance.
- Checking of RTCC with VCB inspection for maintaining Healthy Systems.
- Check/review the Contractor's design to ensure equipment and facilities are designed in accordance with project specifications & approved drawings.
- Review installations, Testing & commissioning activities as per approved drawings/specifications.
- Check project technical and material submission to ensure compliance with the statement of requirements, standard Technical Specifications and approved drawings i.e. materials submittals, Shop Drawings, method statements, calculations, etc.
- Supervise and monitor the contractor construction works and ensure compliance with project drawings/specifications and authority requirements.
- Contribute to project close-out reports and verify marked up and final as-built drawings, test reports, O&M instruction manual, etc.
- Building security systems, Access control systems, CCTV, Public Addressable systems, Fire Alarm Systems, Lighting Control systems, telecommunications data services, cable tray routing.
- Electrical load estimation, design as per international and local standards (medium and low voltage), development of single line diagram and control schematics, electrical equipment selection sizing, bus bar, earthing system according to the load analysis and routing, short circuit calculations, voltage drop calculations, Lighting and Illumination design.
- Planning and execution on the electrical side for MEP projects closely monitoring the construction activities, attending weekly meetings at site with other Engineers and Contractor- Maintained weekly approval or disapproval.
- Develop and implement quality control programs.
- Prepare progress reports and issue progress schedules to clients.
- Procurement assistance of contracting vendors and material suppliers.
- Plan, organize, direct, control and evaluate construction projects from start to finish according to schedule, specifications and budget.
- Verification of Contractor's invoices as per actual work done.
- Monitoring QA/QC.

Curriculum-Vitae

- Value Engineering.
- SAP Basics
- Plant layout Design.
- Purchase Department.

Professional Experience

Presently working in Systra India for Transportation and Data Centre MEPF services as a Key PMS and Design role for Design issues and site progress Activities respect to approval for GFC, Shop drawings and MAR as per DBR, Corrigendum along with TS and Addendum for RLDA, Metro, commercials and Renewable based projects at Mumbai Location.

Worked in Mupro India Pvt Ltd as a Head Project Management System and Design in Projects and Services from Aug2024 to April-2025(Entire MEPF-Data Centers, Metro, Commercials-Design and Execution). Client Name-Amazon, Microsoft, TPL, URC at Hyderabad Location near Gachibowli and Adani Connex-Pune Near MIDC Chakan (Project code-121,11,101,102,129,126&127)

Worked in MP Metro Indore Project as a MEP System Manager in URC Construction (P) Ltd. From Nov-2022 to Sep-2024(Entire MEPF-Metro, Data Center-Design and Execution)-Client Name-MPMRCL Indore, Consultant-GC

Worked as a Senior MEP Engineer at SVKM's NMIMS Mumbai Project based on Aug-2017 to Oct-2022 (Entire MEPF Activities for Commercial Project-Design and Execution). Client Name-Shree Vile Parle Kelvani Mandal, Mumbai for Indore site,

I worked as a Mechanical Automation and Engineering at Amity University Gwalior MP from 14/11/14 to 03/04/2017(Educational Project). Client Name-Amity University Project Noida Head Office.

I worked as an MEP in Operations and Management in BITS Gwalior MP from 13/08/12 to 14/11/14. (Entire MEPF Activities consider installation, erection and commissioning of Electrical, ELV, BMS Plumbing, Fire, HVAC, Chillers, IT Rack-Testing Labs Equipment's along with final Testing and handover. Client Name-Bethesda Group, Kerala. Gwalior site.

Training and Certifications

- Taining done on **TS-16949 by corporate Trainer in Jan 2009** and learned the objectives to implement the new policies and Techniques and documented to resolve the problems
- We participated in five days' workshop on strategic Management organized at **A.B.V.I.I.T.M. Gwalior.**

Curriculum-Vitae

- Participated in a two-day workshop on supply chain Management at A.B.V.I.I.T.M, Gwalior
- Participated as an [Entrepreneurship Awareness Camp](#) under the Sponsorship of N.S.T.E.D.B. Department of Science and Technology, New Delhi.

Curriculum-Vitae

Technical Qualifications

- **PGDMM in Marketing Management from Indira Gandhi National Open University**
- **MTech from Govt Engg College Jabalpur in Heat Power Engg Branch in 2014**
- **B.E. in Mechanical Engineering from Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal.**
- **PGDIRI (One Year Post Graduate Diploma in Rubber field from Indian Institute of Technology) I.I.T Kharagpur.**
- **Proficiency certification on Non Destructive Testing Dye Penetrant / Liquid Penetrant Testing (DP/LPT) from Advanced Training Institute Mumbai Under Ministry of Labour and Employment in 2011 (GOVT OF INDIA)**
- **Proficiency certification on Non Destructive Testing by Magna Particle Testing (MPT) from Advanced Training Institute Mumbai Under Ministry of Labour and Employment. (GOVT OF INDIA) in 2011**
- **Proficiency certification on Non-Destructive Testing by Ultrasonic Testing (UT) from Advanced Training Institute Mumbai Under Ministry of Labour and Employment (GOVT OF INDIA) in 2011.**
- **Certified PMP, API, EIT, NDT, OSHA from Pennsylvania USA.**

Personal Profile

Name : Nishant Sharma
D.O.B : 24/03/1983
Father's Name : KS Sharma
Mother's Name : Asha Sharma
Sex : Male
Marital Status : Married
Wife Name : Raksha Sharma
Languages Known : Hindi, English
Nationality : Indian
Residential Address : Flat No-905, Building No-03,
Ulwe, Sector-05, Mumbai, Maharashtra
Pin No-410206
Permanent Address : Nishant Sharma S/o Khajan Singh Sharma
Goverdhan Colony, Gola Ka Mandir,
Gwalior, M.P, Pin No-474005

Declaration

I hereby declare that the Information Furnished above is True to the best of my knowledge.
