Education

Jaypee University of Engineering and Technology, Guna, MP Aug 2023 – May 2027
Bachelor of Technology in Computer Science Engineering
CGPA: 8.31 / 10.0

Experience

Full Stack Developer Intern Feb 2025 – Present

Assemble Esports Pvt Ltd, Bharatpur, Rajasthan

- Led by a team of 7 developers to architect and deploy a scalable MERN-based esports platform with 99.9% uptime.
- Engineered CI/CD pipelines using GitHub Actions and Render, reducing deployment time by 60%.
- Architected AWS infrastructure using EC2 and S3 for secure hosting, auto-scaling, and optimized storage.
- Established code review standards and agile workflows, improving team velocity by 40%.

Software Engineer Intern May 2025 – July 2025

Consilio Intelligence Research Lab, Noida, Uttar Pradesh

- Developed responsive web interfaces using React.js, HTML5, and CSS3 with 95+ Lighthouse performance scores.
- Integrated RESTful APIs for real-time data synchronization, reducing page load time by 35%.
- Collaborated in Agile sprints, ensuring on-time delivery of 12+ features.
- Participated in daily standups, sprint planning, and retrospectives, improving sprint completion by 20%.

Projects

We-Care Dec 2024

HTML, CSS

- Designed and developed a responsive women's healthcare informational website.
 - Built sections covering health issues, preventive measures, treatments, and emergency helpline numbers.
 - Implemented departmental sections and a contact/message interface to connect users with doctors.
 - Live: ayushmaan-gupta.github.io/wellnesscare
- Role: Frontend Developer

AI-Based Civic Issue Verification Platform Oct 2025

Python, NLP, DistilBERT, MongoDB

- Developed an NLP-based platform to classify civic complaints as genuine or non-genuine.
- Fine-tuned a DistilBERT model with preprocessing steps including tokenization, cleaning, and dataset balancing.
- Implemented complaint submission, real-time prediction, and data storage using MongoDB.

- Designed extensible architecture supporting authority tagging, complaint tracking, and analytics dashboards.
- Role: ML & Backend Developer

Technical Skills

Languages: JavaScript (ES6+), C/C++, Java, HTML5, CSS3, Python

Frontend: React.js, Tailwind CSS, Material-UI, Responsive Design

Backend: Node.js, Express.js

Database: MongoDB, Mongoose, Schema Design, Query Optimization

Tools & Practices: Git, GitHub, VS Code, Code Reviews, Technical Documentation

Certifications & Achievements

ISRO – Geodata Processing using Python and Machine Learning March 2025

Indian Institute of Remote Sensing (IIRS), ISRO

Completed a 9-hour online course on geospatial data processing using Python and machine learning. Achieved Grade A.

Letter of Appreciation – JUET Youth Club (JYC) December 2024

Recognized for outstanding dedication and enthusiastic participation as a coordinator and participant in cultural events.
