Summary: Embedded Software Engineer with 3.2 years of experience in developing low-level software and diagnostics for automotive ECUs. Skilled in AUTOSAR BSW, UDS (ISO 14229) and embedded C programming. Familiar with ASPICE processes and MISRA standards, delivering reliable and well-documented embedded solutions.

Skill Set

Programming Language	C, Embedded C,Autosar
Communication Protocol	CAN,SPI,UDS,I2C,UART
Skills/Tools	Aspice,Microcontroller,Diagnostic,Git,Embedded System,AutosarCANoe, Davinci, DOORS, Polarion, Jira, Eclipse, Github,Vector Cast,CAN,SPI
Soft Skills	Strong Analytical and Problem Solving Skills, Excellent Documentation and Presentation Skills

PROFESSIONAL SNAPSHOT

- Experience in low-level software development and ECU diagnostics using Embedded C.
- Good knowledge of AUTOSAR BSW configuration and diagnostic module debugging.
- Involved in software design and unit testing activities (SWE.3) for the Low-Level Software project following ASPICE standards.for the Low-Level Software project following ASPICE standards
- Familiar with UDS (ISO 14229) protocol and CAN configuration using CANdb++.
- Hands-on with tools like CANoe, Vector Davinci, VectorCast, Eclipse and Polarion.
- Knowledge about communication protocol like CAN,UDS,SPI,I2C
- Proficient in unit testing, software validation and documentation in compliance with ASPICE standards, with hands-on experience in test environment setup, module design and customer-specific flashing and testing tools.

PROFESSIONAL EXPERIENCE

Alten India Pvt. Limited,Bangalore.

Jun-2023-Aug-2025

Client: Valeo, India.

Role: Software Engineer.

Responsibility

- Developed embedded software for **Powertrain Electrification Systems** using the **TC37 Aurix microcontroller**.
- Worked on low-level software modules like sensors, communication, and control functions.
- Prepared **design documents** for each software module and kept all requirements updated in **Polarion**.
- Created and ran **unit test cases** using **VectorCast** to check if each function worked as expected.
- Used **CANoe** to **test and simulate CAN communication**, ensuring all diagnostic messages worked correctly.
- Helped in **software delivery, version control**, and **flashing software** on hardware for customer testing.
- Took part in **design reviews, code checks**, and updated **technical documents** regularly.
- Found and fixed software problems early in development by doing **debugging** and **root cause analysis**.

Amtronics Engineering Service Pvt. Limited, Bangalore.

Jun 2022 - Apr 2023.

Role: Software Engineer.

Responsibility

- Configured and integrated **AUTOSAR Basic Software (BSW)** modules for **diagnostic communication**.
- Performed vehicle diagnostics using **UDS (ISO 14229)** protocol for ECU functionality.
- **Configured CAN IDs** using **CANdb++** and validated communication through **CANoe**.
- Set up **the test environment** using **VectorCast** for **unit and integration testing**.
- Generated and maintained test reports and documentation in compliance with ASPICE standards.
- Supported **debugging** and **validation of diagnostic services** at the ECU level.
- Collaborated with internal teams for requirement analysis and ECU-level integration.
- Used tools such as **CANoe, Davinci Configurator, VectorCast, Eclipse** and **Polarion** throughout the project lifecycle.

Educational Background:

- Graduate in Electrical & Electronics Engineering from Sri Shakthi Institute of Engineering and technology .

Personal Details:

Father Name: Venkatesan R

Date of Birth: 28-10-97

Current location: Bangalore
