

SHRASTI RAJPUT

Technical Product Manager | Industrial Automation & Robotics | AI-Driven Products

Bengaluru, India • +91 9717409207 • shrastirajput29@gmail.com • linkedin.com/in/shrastirajput-67628a1

PROFESSIONAL SUMMARY

Technical Product Manager with 7+ years of experience owning complex product roadmaps at the intersection of industrial automation, robotics, and AI-driven systems. Proven track record of leading cross-functional teams to ship hardware-software products from concept to commercialization — including a semi-automatic solar cleaning robot successfully launched at REI Expo. Deep domain expertise in ROS2, SLAM, computer vision, PLCs, and servo/VFD drives, combined with strong Agile product ownership skills. Effective at translating complex engineering requirements into business outcomes, and business goals into actionable technical backlogs. Available for fully remote global roles. Fluent English. Comfortable with async collaboration and 4–6 hours US East Coast overlap.

CORE COMPETENCIES

- Technical Product Management
- Product Roadmap & Backlog Ownership
- Agile / Scrum
- ROS / ROS2
- SLAM & LiDAR Integration
- Computer Vision (OpenCV)
- PLC & HMI Automation
- VFD / Servo Drives & Motor Control
- Embedded Systems (ARM)
- Industry 4.0
- JIRA / Trello
- Stakeholder Management
- Python & Embedded C

WORK EXPERIENCE

Product Owner / Assistant Product Manager | [Param Renewables](#) | Bangalore Oct 2023 – Jun 2025

- Owned end-to-end product strategy and roadmap for a semi-automatic solar panel cleaning robot — from concept through to commercialization and client adoption.
- Defined and prioritized the product backlog with 50+ user stories, aligning engineering sprints to market requirements and reducing scope-creep by maintaining a lean, outcome-focused backlog.
- Led Agile ceremonies (sprint planning, reviews, retrospectives) using JIRA, consistently meeting sprint delivery targets across hardware, firmware (ARM), and software workstreams.
- Conducted market research and competitive analysis that directly informed 3 major feature decisions, improving product-market fit for the renewable energy segment.
- Presented and demonstrated the product at REI Expo — resulting in successful commercial adoption by multiple renewable energy clients.
- Established KPI monitoring framework tracking product quality, field performance, and client satisfaction metrics.

Product Engineer – Software & Robotics | [Taikisha Engineering](#) | Gurgaon Apr 2021 – Oct 2023

- Served as technical product lead for an Autonomous Mobile Robot (AMR) using SLAM — integrating LiDAR, odometry, and computer vision for real-time autonomous navigation.
- Designed and integrated 6-axis and 4-axis robotic systems for automated object recognition and manipulation, improving operational accuracy by 25%.
- Implemented image processing algorithms (OpenCV) for quality inspection, reducing defect detection time by 30%.
- Managed product backlog and sprint planning using JIRA/Trello, improving project delivery timelines by 15% over two consecutive quarters.

- Acted as primary liaison between R&D and business stakeholders — translating technical constraints into roadmap decisions and ensuring alignment on product demos.

Application Engineer | **Vision Automation and Robotics Solutions** | Gurgaon *Sep 2019 – Mar 2021*

- Managed PLC-to-HMI communication architecture and created electrical drawings using AutoCAD for industrial automation projects.
- Gathered and translated customer requirements into technical specifications, contributing to a project that received a Quality Excellence nomination.

Automation Engineer | **PM Electronics** | Noida *Feb 2018 – Sep 2019*

- Led PLC programming, HMI design, and on-site panel installation across industrial automation projects.
- Built foundational expertise in Variable Frequency Drives (VFDs), servo drives, motor sizing, and drive control systems.
- Managed vendor relationships and coordinated integration of instruments into automated systems.

KEY PROJECTS

Solar Panel Cleaning Robot (Semi-Automatic) — Product Owner

- Led full product lifecycle from concept to market launch using ARM-based control systems and Agile/JIRA workflows.
- Delivered a commercially viable solution addressing a critical gap in renewable energy maintenance — adopted by multiple clients post-REI Expo launch.

Autonomous Guided Vehicle (AGV) — Technical Product Lead

- Directed development of an AGV system integrating SLAM, LiDAR, and camera-based navigation for fully autonomous operation.
- Coordinated hardware and software teams to deliver a field-ready system showcased at industry events.

EDUCATION

B.Tech – Electronics & Communication Engineering *Jul 2014 – Jun 2017*

Ajay Kumar Garg Engineering College, Ghaziabad

Diploma – Electronics Engineering *Jul 2010 – May 2013*

Anar Devi Khandelwal Women Polytechnic, Mathura

CERTIFICATIONS

- Google AI Essentials — 2025
- Robot Operating Systems 2 (ROS2) — 2023
- Network Security Specialist — 2020
- Industrial Automation — 2018
