SKILLS

- Product & Strategy: Roadmapping, 0→1 Development, GTM Strategy, Stakeholder Management
- Technical: Robotics, AI/EdTech Systems, 3D Printing, Automation

Product leader with 7+ years of experience building and scaling AI, robotics, and deep-tech products. Proven ability to drive 0→1 development, lead cross-functional teams, and translate complex research into scalable, real-world solutions. Experience across EdTech, SpaceTech, and hardware systems with global collaborations.

Work History

2024-11 -
2026-04

Project Lead (Aerospace Hardware)

Hylenr Technologies Pvt Ltd

- Led product lifecycle for advanced space-tech and Lattice Confined Fusion device concepts from ideation to validation
- Translated complex R&D into structured product initiatives and execution plans
- Managed global collaborations across engineering and research teams
- Drove feasibility analysis, technical documentation, and innovation strategy

2022-03 -
2024-11

Product Manager (Edtech)

Megaforte Global , Singapore

- Leading end-to-end development of AI-based evaluation platforms across product, engineering, and research
- Defined product roadmap, feature prioritization, and execution strategy for scalable deployment
- Collaborating with cross-functional teams to deliver high-impact product releases
- Aligning product direction with business goals and user needs

2019 - 2020

Technology Research Consultant

Coherendz India Pvt Ltd

- Conducted research on emerging technologies and innovation ecosystems
- Delivered insights for strategic planning and future opportunities

2015 - 2016

Executive Engineer / Product Manager

Aerospace Startup, Bangalore

- Led product development and engineering execution for aerospace applications

- Tools: SolidWorks, ANSYS, MATLAB, Python (Basics)
- Managed partnerships, business development, and technical training programs
- Coordinated regional operations across South India

Education

2025-12

MS by Research: ECE (Soft Robotics)
IIIT Hyderabad - Hyderabad

LEADERSHIP & RECOGNITION

TEDx Speaker – “Space for Everyone”, Mentor – NASA Space Apps Challenge, AIM NITI Aayog, Judge – IEEE IdeaFind (VIT), Hult Prize (NIT Trichy), Participant – Poland Mars Simulation, ESA Moon Challenge

KEY IMPACT

- Secured \$35K+ in government grants through product innovation initiatives for different startups
- Delivered AI-driven and hardware-integrated solutions across multiple domains
- Contributed to government-backed R&D initiatives (IGCAR collaboration)
- Developed robotics and automation systems with research publications and patent application
