

UMESH MOGALI

+91 9448004012 ◇ Bangalore, Karnataka, India

mogaliumesh1972@gmail.com ◇ [linkedin.com/in/umesh-mogali-9853b536/](https://www.linkedin.com/in/umesh-mogali-9853b536/)

OBJECTIVE

Results-driven Mechanical Engineering professional with 32+ years of experience in Product Development, Castings, Forgings, Foundry Operations, and Manufacturing Excellence. Expertise in TPM, 5S, Kaizen, Cost Optimization, Quality Systems, and Low-Cost Automation. Proven track record in driving productivity improvement, EBITDA growth, and operational excellence across automotive and industrial sectors. Seeking a leadership role to leverage technical and strategic expertise for business growth and process optimization.

EDUCATION

Diploma in Mechanical Engineering
Technical Board, Bangalore
Percentage: 60

1988-1991

SKILLS

Technical Skills: Tool design, Low Cost Automation, Product Development, 3D Model Design, Tool Manufacturing, FMEA, APQP, OSHAS, TS-16949
Management Skills: Strategic Planning, Manufacturing Excellence, Cost Optimization, Analytical Skills, Technology Change Management, EBITDA Growth, Supply Chain Development, Quality Assurance, New Business Development, Safety Management System, Operational Excellence, TPM, TQM, 5S, Six Sigma, Process Simulation

EXPERIENCE

Freelance Consultant

June 2023 - Present

Bangalore, Karnataka

- Successfully led and executed turnkey projects in casting, forging, automotive components, and aerospace manufacturing industries.
- Delivered measurable business growth through cost optimization, productivity improvement, and operational efficiency initiatives.
- Implemented low-cost automation solutions to enhance manufacturing performance and reduce operational expenses.
- Developed and deployed system-based process improvement strategies to strengthen operational excellence and business sustainability.
- Improved organizational performance through managerial competency development, leadership training, and continuous improvement programs.
- Contributed to EBITDA growth by optimizing production processes, improving resource utilization, and driving strategic operational initiatives.

Senior General Manager

July 2020 - May 2023

Kirloskar Ferrous

Koppal, Karnataka

- Managed the implementation of the Kunkel Wagner moulding line project and Loramendi robotic core-making vertical machine with integrated tooling automation.
- Led new product development for Daimler engine blocks and cylinder heads, along with Euro 6 engine components for Eicher Motors.
- Implemented Lean Manufacturing practices including 5S, TPM, and TQM to improve operational efficiency, product quality, and process reliability.

- Collaborated with consultants and technology partners to reduce casting rejections, optimize manufacturing processes, and drive continuous improvement initiatives.

General Manager

Kirloskar Ferrous

July 2013 - July 2020

Koppal, Karnataka

- Led business development initiatives with key OEM clients including Volvo, Daimler, Mahindra and Mahindra, Eicher Motors, JCB, MTU, Cummins, John Deere, and MAN Truck and Bus to drive revenue growth and customer acquisition.
- Delivered prototype components using advanced 3D printing technology to meet customer specifications and accelerate product development cycles.
- Received the Breakthrough Achievement Award for achieving significant cost reduction, productivity improvement, and operational excellence within the Kirloskar Group.
- Coordinated with Duo Point Consultancy to implement workplace safety standards and improve operational compliance across manufacturing processes
- Led the implementation of the Action Log system in collaboration with Renoir Consultancy, driving continuous improvement and process optimization initiatives.
- Spearheaded productivity improvement and low-cost automation projects, while implementing rejection control measures to achieve industry-leading foundry performance benchmarks.

Deputy General Manager

Kirloskar Ferrous

July 2010 - July 2013

Koppal, Karnataka

- Led business development initiatives for Euro 6 engine blocks and cylinder heads for Volvo customers, contributing to customer expansion and revenue growth.
- Participated in techno-commercial discussions and strategic collaboration activities with UD Trucks in Japan to strengthen business and technical partnerships.
- Spearheaded in-house tool design, CNC machining, and simulation analysis to minimize casting rejections, improve product quality, and optimize manufacturing processes.

Senior Manager

Kirloskar Ferrous

July 2007 - July 2010

Koppal, Karnataka

- Led productivity improvement initiatives by transitioning from single to double cavity molds and converting shell processes to cold box technology, resulting in optimized cycle time and improved Overall Equipment Efficiency (OEE).
- Implemented Poka-Yoke systems and quality control measures to reduce casting rejections and enhance product quality.
- Conducted workforce and managerial skill development programs to strengthen team capabilities and promote a culture of continuous improvement and operational excellence.
- Established a robotic core-making center in collaboration with Hansberg to improve core production capacity, automation, and process efficiency.

Manager

Kirloskar Ferrous

July 2004 - July 2007

Koppal, Karnataka

- Experienced in tooling manufacturing and casting inspection using CMM and advanced scanning technologies to ensure dimensional accuracy and quality compliance.
- Analyzed casting dimensional reports and implemented rejection control measures to improve product quality and reduce manufacturing defects.
- Contributed to new tooling and casting development through dedicated try-out cell operations, supporting continuous improvement and process innovation.
- Optimized tooling design and manufacturing processes to enhance production efficiency, minimize defects, and improve operational performance.

Deputy Manager

Kirloskar Ferrous

December 2002 - July 2004

Koppal, Karnataka

- Performed pattern maintenance activities and troubleshooting in Core Shop and Mould Shop operations to ensure smooth production processes
- Identified and resolved operational issues to improve foundry productivity, process efficiency, and equipment performance.
- Supported continuous improvement initiatives focused on optimizing manufacturing operations and maintaining high-quality standards in foundry production.
- Collaborated with production and maintenance teams to minimize downtime and enhance overall operational reliability.

Junior Engineer

Techser Tools Private Limited

May 1995 - November 2002

Pune, Maharashtra

- Managed an independent business unit focused on product development, tooling manufacturing, and process optimization in foundry and forging operations.
- Utilized CAD/CAM technology and reverse engineering through scanning for tooling design, development, and manufacturing improvements.
- Possessed hands-on experience in conventional tooling fabrication using PU patterns, Araldite, and other industrial materials.
- Led cost reduction initiatives by optimizing manufacturing processes, improving operational efficiency, and enhancing overall product quality.

Junior Engineer

Trinity Engineers Private Limited

July 1992 - April 1995

Pune, Maharashtra

- Experienced in sourcing, tooling operations, and quality assurance within forging industry toolrooms, including press shop and die shop operations.
- Ensured high-quality manufacturing standards through effective process management and cross-functional coordination across production teams.
- Optimized tooling processes to improve manufacturing consistency, operational reliability, and production efficiency.
- Supported continuous improvement initiatives to enhance product quality and streamline forging and tooling operations.

Junior Engineer

India Forge and Drop Stampings

July 1992 - April 1995

Pune, Maharashtra

- Managed forging production and die shop operations, overseeing the complete manufacturing lifecycle from design to final product delivery..
- Handled tooling management, process optimization, and quality control to ensure compliance with production and quality standards.
- Improved operational efficiency by reducing downtime and implementing continuous improvement initiatives in forging and die shop operations.
- Collaborated with production and engineering teams to enhance productivity, process reliability, and manufacturing performance.

CERTIFICATION

- Management Development Programme
- Six Sigma Black Belt Certification – Level I
- Implementers Program on Business Excellence
