PROFESSIONAL SUMMARY

Seasoned professional with over 20 years of expertise in delivering innovative embedded systems for automotive and electronics locks and access control projects. Proven track record of leveraging high-performance teams to achieve exceptional results. Strong passion for organizational change management and continuous improvement drives a commitment to enhancing operational efficiency and effectiveness. Extensive experience in the electrical and electronics sectors, encompassing embedded software and hardware development across automotive, security, home automation, firmware engineering, IoT, and the semiconductor industry. Demonstrated ability to navigate complex challenges and deliver impactful solutions that align with business objectives.

PROFESSIONAL EXPERIENCE

Volvo Group India Pvt Ltd (VGIPL) - Engineering Group Manager - Vehicle Connectivity

02/2025 - Current

- Leading Embedded software development groups of 40 plus engineers working on Connectivity Platforms based on SDV architecture, Onboard Telematics platform development.
- Project estimation, planning, tracking, resource allocation, handling competencies and training needs of various projects.

Allegion India Pvt. Ltd - Sr. Engineering Manager I – Firmware Engineering

05/2020 - 01/2025

- Sr. Engineering Manager for a Firmware Teams.
- The team is responsible for Firmware development for Commercial and Residential Locks, Exit Devices, Readers and Credentials for North America, APAC and EMEA regions.
- Projects planning, execution, escalation, reports submission to management.
- Resource, Risk and Project management. Budget planning, Capex, Opex, Hiring, Attrition management.

Volvo Group India Pvt Ltd (VGIPL) - Group Manager - Embedded Software - Application

06/2011 - 04/2020

PROFESSIONAL HIGHLIGHTS

- People Management
- Set team goals aligning to business and team growth.
- Performance reviews and regular feedback
- Rewards and Recognizing employees.
- Working towards operational efficiency of the teams.
- New and backfill of Engineers requests and approvals.
- Talent acquisition team discussions
- Hiring right people aligning to the company culture
- External resource hiring and vendor management.
- Retention and Attrition management
- Conflict Management
- Escalation Management
- Strong connect with individual through touchpoints.
- Discussion with Senior management and HR
- Project Management and Development
- Project delivery and content discussion with customers
- Build the project plan, schedules, risks.
- Assign project tasks to internal and external employees based on criticality and priorities.

- Responsible for recruitment within the group for ramp up and replacements along with target setting, planning, and evaluation of team members.
- Managing various project situations, technical issues, customer interface, risk mitigation, task force setup, and problem-solving techniques.
- Driving teams to achieve the project milestones as per the plan, participating in technical reviews, customer issue resolution, providing the guidance and support.
- Interaction with ECU hardware suppliers, tool partners for enhancing the product and solving issues related to product development.

Infineon Technologies India (IFIN) - Senior Software Engineer - II
06/2005 - 05/2011

- Development Lead for various AUTOSAR based projects on TriCore based platforms.
- Managed a team of size 4 working on AUTOSAR based MCAL layer development & testing.
- Interaction with customers Delphi, Bosch, and Continental for solving ECU application related issues, tool partners for enhancing the product and solving issues related development.

Indian Institute of Science (IISc) - Project Trainee
02/2004 - 05/2005

- Worked on heterogeneous UNIX environment.
- System Administration of UNIX/Linux and Windows based systems.
- Worked on LFS and PBS servers.

- Project tracking and execution by Daily standup's and scrum methods.
- Project work burndown charts
- Weekly and monthly work dashboards with key parameters to all key stakeholders
- Project escalations to management
- Project quality and ASPICE Audits
- Analyze SW requirements, CRS and SRS reviews.
- TRS preparation
- SW design reviews and approvals
- SW implementation and Unit testing
- Software Integration
- Issue resolution and root cause analysis using Fish bone diagrams and Pugh charts.
