

SHARIQUE AKHTAR

ENGINEER

I would like to serve for my occupation as an efficient and energetic engineer

WORK EXPERIENCE

New Product Development (BESS)

10/10/24 – Present

Loom Solar Pvt. Ltd. (1 Yr.)

- Working extensively on lithium-ion battery packs for residential and commercial BESS applications
- Conduct electrical, thermal, and performance testing of battery systems prior to product certification
- Analyze and verify datasheet parameters, efficiency metrics, and charge-discharge characteristics
- Evaluate battery lifecycle performance, degradation trends, and safety compliance
- Ensure correct implementation and functioning of BMS, protection logic, and communication protocols
- Perform compatibility testing with solar and hybrid inverters
- Actively involved in launching new battery packs, from testing to market readiness
- Installed and commissioned inverter assembly lines (5–100 kWh capacity)
- Supported setup and optimization of lithium-ion battery assembly lines
- Generate solar generation and performance reports using PVsyst for modules and inverters

RESEARCH WORK

Simulation and Optimization of Perovskite-Tandem Solar Cells

- Utilized SCAPS-1D to simulate the electrical characteristics and efficiency parameters under different conditions.

Comparative Study of Heterojunction with Intrinsic Thin-layer (HJT) Solar Cells and Tandem Solar Cells

- Developed models to optimize the layer structures and material properties for enhanced solar cell efficiency.
- Analyzed the impact of different lead-free materials on the overall device performance and long-term sustainability.

EDUCATION

M.Tech JAMIA MILLIA ISLAMIA, New Delhi, India

2022-2024

Nanotechnology

B.Tech JAMIA MILLIA ISLAMIA, New Delhi, India

2017-2022

Electrical Engineering

• Research Intern

Advanced Power Electronics Lab , Dept. Electrical engineering ,JMI

Sep 2021 - May 2022

I have experience with Typhoon HIL software in creating some real-time simulation models. I have created some real-time simulations on Typhoon HIL DC-DC buck converter closed loop PV system connected to DC-DC buck closed loop MPPT buck converter.

• Trainer

Advanced Power Electronics Lab , Dept. Electrical engineering ,JMI

May 2022 - June 2022

B.voc solar energy on job training Introduction to Typhoon HIL software and how to make real time stimulation models and their result differ with voltage regulation

SKILLS

- Origin (lab)
- Scap - 1D
- Microsoft Office: Proficient in Word, Excel and PowerPoint
- Coral Draw
- Autocad
- PV Syst

LANGUAGES

- ENGLISH
- URDU
- HINDI
- ARABIC

CERTIFICATES

- IIT- Jodhpur - XRD
- IIT- Delhi Inuip

23 Apr 2024
- IIT-KGP Inuip
- Servicenow Fundamentals

11 Aug 2022
- IEEE

inverter control techniques for interfacing renewable energy 7 may 2022
- Internet of things master class pantech e learning APSSDC

Oct 2021
