

RAJESH MEDIDHI

Email : rajesh.e33@gmail.com

Mobile: +91 7816027879(INDIA)

Skype : rajesh.e33

Address: Flat no: 303, 4th Floor, NL Homes apartment,
Opp Oxford international school,
Dammaiguda, Hyderabad.

SUMMARY

- Expert in PCB layout design including Altium Designer, Cadence Allegro, Cadence OrCAD Layout and schematic capture tools OrCAD, Cadstar, and Altium. Extensive experience in design of PCB layouts of any complexity including high pin counts IC packages and controlled impedance.
- Advanced knowledge of design procedures, standards and component engineering. Familiarity with Altium, Cadence Allegro PCB layout system.
- Around 14+ years of Experience in Printed Circuit Board Design and Development of Automotive, Aero space, Semiconductor, Telecom, Residential and Commercial. Executed projects in Astra microwave products limited, Neurolinx Global Pvt Ltd, Saiber Energy Conversion Systems, ADAQ Technologies Pvt Ltd and Siri Power Products.
- Possess expertise in Board stack up analysis, Library management and Impedance driven highly constraint board designing.
- Has very good knowledge of PCB & PCB manufacturing processes.
- Demonstrated proficiency as an individual performer as well as leading and mentoring individuals to maximize levels of productivity while performing cohesive Team environments.
- Effectively will speak with clients For Product Specifications and call up for meetings whenever required.
- Strong in conceptual knowledge on IPC2221, IPC7351 symbol and footprint creation, Signal integrity concepts, EMI Concepts, Impedance control design and Fabrication process of HDI boards.
- Analytical thinker that consistently resolves ongoing issues.
- Confident, self-motivated and an efficient problem solver, with patience to consider all options before taking a decision.

Job Responsibilities:

- Worked for various automotive, Railways, Semiconductors, aircraft, Residential and Commercial Printed Circuit Board design and development activities.

Skills:

- Highly capable in all aspects of layout design and troubleshooting, including: Procedure development for layout design and verification;
- Schematic capture, library management, footprint and symbol creation;
- Multi-layer dense surface mounts and through hole boards layout;
- Fabrication and assembly drawings, manufacturing panels, pick-and-place data; Bill of materials (BOM);
- Gerber data, package release; Coordination between schematic, planning, manufacturing, and quality assurance departments, as well as component vendors and PCB design software providers.

Software:

- Altium Designer, Cadence Allegro, Cadence OrCAD Layout ,OrCAD, Cadstar, MS Windows, and MS Office,Viewmate,CAM350 Gerber Tool.

Hardware:

- Analyzing and understanding of circuit diagrams, Component Selection, BOM preparation.
- Good understanding of DC-DC converters like BUCK/BOOST Converters.
- Analog design, Digital design, Power Supply – SMPS designs, Power Components.
- Good handling of electronic tools, PCB assembly and Soldering of SMD.
- Testing and measuring tools: Multi-meter, Power meter, Oscilloscope.

Career Achievements

- Extensive experience in printed circuit board design for automotive, Railways, aircraft, Semiconductors, Residential and commercial.
- A team player with a strong background in Printed Circuit Board and Design and development. Experience working with suppliers, customs and customer service departments. Involved in projects full circle, from model concepts to prototypes and first article requirements, construction and testing.

Professional experience:

Senior Engineer (Oct 2025 - Present)
Astra Microwave Products Limited, Hyderabad.

Astra Microwave Products Ltd. is one of India's top defense and aerospace electronics companies, designing and manufacturing high-performance RF, microwave and radar systems.

Responsibilities:

- Manage PCB design process through all the stages from analysis of requirements to the full package of design documents related to PCB layout.
- Take a PCB design through all the phases from a prototype release to the production release.
- To provide required functionality, introduced numerous enhancements to several types of dense 6-8 layered line-cards and other cards;
- Handling emergencies from Manufacturing, Process Engineering, Quality Assurance, and Purchasing.
- Handled various design issues of the PCB layouts.

NEUROLINX GLOBAL PVT LTD

HARDWARE DESIGN ENGINEER (OCTOBER 2024 – SEPTEMBER 2025)

NEUROLINX is one of the leading manufacturers and suppliers of MODULAR SWITCHES, WIND MILL CONTROLLERS, LED drivers of all ranges, SMPS power Supply, DC- DC converters, battery chargers, Battery charger cum power supply. Battery backup power Supply, AC-DC Adapters etc.

Responsibilities:

- Responsible for testing, preparing test reports, performing burn-in test and final test.
- Designing and developing of power supplies, PCB Designing, schematic preparation, transformer drawing preparation, preparing BOM's, sample testing and design validation.

SAIBER ENERGY CONVERSION SYSTEMS.

HARDWARE DESIGN ENGINEER (NOVEMBER 2017 – SEPTEMBER 2024)

SAIBER Energy is one of the leading manufacturers and suppliers of LED drivers of all ranges, SMPS power Supply, DC- DC converters, battery chargers, Battery charger cum power supply. Battery backup power Supply, AC-DC Adapters etc.

Responsibilities:

- Responsible for testing, preparing test reports, performing burn-in test and final test.
- Designing and developing of power supplies, PCB Designing, schematic preparation, transformer drawing preparation, preparing BOM's, sample testing and design validation.

ADAQ TECHNOLOGIES PVT Ltd.

HARDWARE DESIGN ENGINEER (May 2016 - Oct 2017)

ADAQ is a leading manufacturer and supplier of LED based products, Power Adapters, and servicing of Emergency Light Units and Berth Lamps of railway-based projects.

Responsibilities:

- Designing and Development of LED based projects.
- Designing and Testing of power adapters.

SIRI POWER PRODUCTS, HYDERABAD

TESTING ENGINEER, Dept.: PRODUCTION (March 2009 - April 2012)

PRODUCTION MANAGER, Dept.: PRODUCTION (April 2012 – MARCH

2014) DESIGN AND DEVELOPMENT ENGINEER, Dept.: R&D (APRIL 2014 – APRIL 2016)

SIRI POWER is one of the leading manufacturers and suppliers of LED drivers of all ranges, SMPS power Supply, DC- DC converters, battery chargers, Battery charger cum power supply. Battery backup power Supply, AC-DC Adapters etc.

Responsibilities:

- Responsible for testing, preparing test reports, performing burn-in test and final test.
- Designing and developing of power supplies, PCB Designing, schematic preparation, transformer drawing preparation, preparing BOM's, sample testing and design validation.

Education

- B.Tech in Electronics and communication Engineering, SCET, JNTU, Hyderabad.

DECLARATION

I, Rajesh Medidhi, declare that the above information is true and correct to the best of my knowledge and nothing has been concealed or distorted.

Place: Hyderabad
Date:
